
Service Description

G-Cloud - 15

DECEMBER 2025

CCB Consultancy Ltd

CCB Consultancy Overview

CCB Consultancy Ltd provides a range of project, programme, and portfolio management services to help clients migrate to cloud. We specialise in helping organisations deliver meaningful change and realise benefits in complex and demanding environments. We have proven expertise in the management of challenging, multi supplier transformation and integration projects across a wide range of sectors including Public Sector, Defence, and Emergency Services. Pragmatically using industry standard programme and project management methodologies (MOP / MSP / PRINCE2 / PMI / APM) we can help clients develop robust plans and strategies that reduce risk and deliver programme outcomes to meet their business case. Our services include assessment and recovery of existing deliveries as well as full lifecycle delivery of programmes and projects. We can help with all aspects of cloud migration from strategic portfolio management, business case development, through programme or project setup, initiation, execution and finally closure.

This document should be read as part of the CCB Consultancy Ltd G Cloud 15 offering. This consists of a set of 3 documents:

- G-Cloud – 15 – Services Description
- G-Cloud – 15 – Pricing Document
- G-Cloud – 15 – Terms and Conditions

Services Overview

CCB Assurance Service

CCB Consultancy Ltd can provide a comprehensive independent review of your cloud portfolio, programmes and projects, focussing on how well delivery is likely to perform compared with your business case. Our assessment will also identify key early recommendations to reduce risks and protect your investment.

Features

- Rapid initial assessment of the business case risk
- A focus on key decision points
- Reviews supply chain risks and commercial returns
- Considers future solution agility
- Comprehensive operational readiness approach
- Business readiness assessment
- Reviews approaches to maximise benefits

Benefits

- Proven extensive experience in complex business case delivery assessment
- Full portfolio, programme, and project lifecycle review
- Robust and pragmatic review of planning and dependencies
- Can be used to re-establish confidence in delivery
- A mechanism for knowledge transfer and in-house mentoring
- Industry standard methodologies including MOP, MSP, PRINCE2, APM, PMI

CCB Delivery Service

The CCB Delivery Service ensures portfolios, programmes and projects are managed within an agreed risk profile and delivered to meet business case expectations. We will establish priorities, create governance frameworks, develop robust plans, prepare risk mitigations, mobilise resources, and execute delivery. Finally, we ensure lessons are learned effectively at closure.

Features

- Rapid implementation of effective governance
- Focus on business benefits, driving prioritisation and decision making
- Full portfolio, programme, and project lifecycle support from setup to closure
- Robust integration of planning, dependency, issue, and risk management
- Proven extensive experience in complex delivery and recovery
- Pragmatic approaches to reduce risk and improve chances of success
- Knowledge transfer and in-house mentoring
- Industry standard methodologies including MOP, MSP, PRINCE2, APM, PMI

Benefits

- Proven extensive experience in complex delivery and recovery
- Realistic, pragmatic approaches
- Improved chances of benefit achievement
- A flexible approach, bringing the best of appropriate methodologies
- Using the bigger picture to drive strategy and balance realities
- Extensive supplier experience allowing collaboration and integration with supply chains

Planning cloud implementations is a complex activity. Our planning approach combines a focus on the business case with robust integration of planning, dependency, and risk management disciplines. This leads to pragmatic and coherent plans, improving the chances of successful outcomes.

Our success in migrating to the cloud and between cloud services is driven by robust plans focussed on risk mitigation and achievement of business benefits. With detailed plans building to an operational readiness process that determines the readiness to migrate, we integrate testing and assurance strategies with operational readiness leading to formal acceptance.

CCB Consultancy Ltd provides support individually agreed for each engagement, with prices detailed in the Pricing Document. For a particular assignment, support may be via email and phone or onsite dependent on client preferences.

Examples of previous successes

With over 30 years of consultancy experience delivering complex multi supplier system integration projects, CCB Consultancy is very well placed to help organisations migrate to cloud technologies. The following examples outline some of this leadership experience.

- Recovery of a large agile software development, implementation, and business change programme across a large police force consortium. This programme involved the management of the senior stakeholders, reporting at Police Crime Commissioner and Chief Officer level. The assignment entailed developing a programme implementation strategy, budget ownership, a departmental reorganisation, supplier management, contract change negotiation and business change management.
- Led the retendering and turnaround of a complex implementation programme for a new Integrated Command and Control system spanning two Police forces and a regional Fire service in the East of England. Responsibilities included shaping programme strategy, directing planning and delivery, managing key stakeholders, and overseeing budget control, supplier negotiations, and supplier performance management.
- Leader of the UK programme and projects organisation for a major IT outsourcer, reporting at board level with responsibility for the governance of 50 active programmes and 350 projects at any given moment. In parallel with delivery ownership and governance, managed a workforce transformation programme using a best shore and client proximity model, delivering £28.8m in annual savings and reducing red projects to less than 5% over a year period.
- Assessment and recovery of a £40m outsourcing transformation contract for c80,000 EMEA users including data centre consolidation, application migration to cloud, desktop migration and email migration. This was a construction industry client based in Madrid.
- Designing a £240m transformation strategy including LAN refresh, WAN migration, desktop migration and hardware refresh. This was a UK public sector client.
- Design and launch of a £32m Windows 7 rollout for c100,000 users for a German based utilities organisation, across 18 countries, predominately in EMEA.
- Management of the core infrastructure for a global implementation of consolidated email and desktop with secure data centre consolidation solution for 160,000 users. UK defence sector.
- Recovery of a £10m service management system migration and re-organisation replanning for an IT outsourcer.
- Project assessment and recovery for a £5m system implementation for an Integrated Childcare application for a UK county council.
- Management of a £28m IT outsourcing contract, including datacentre migration and migration from Lotus Notes to MS Outlook for a UK government department.
- Management of a £16m pa UK network and telephony transformation contract for an IT Outsourcer on behalf of UK telecoms provider.
- Management of a £65m infrastructure outsourcing contract for a UK government department, including data centre transformation, desktop refresh and email migration.
