Blüm.

“

At Blüm HQ, we utilise our expertise in engineering, life science, and compliance to support our partners and clients by developing healthcare innovation, improving patient outcomes, and expanding decision-making capacity for healthcare professionals. We are devoted to delivering top-tier products and services that allows healthcare providers to offer superior care, empowers patients to manage their health, and stimulates innovation in the healthcare ecosystem.

DR MICHAEL WATTS, CEO

Medicines Optimisation and Waste / Cost Saving

Triscribe addresses the critical issue of fragmented and inconsistent medication data across NHS hospital ePMA systems by providing a centralised, automated analytics platform that transforms siloed prescribing data into actionable insights.

We enable hospitals to monitor medicines usage, antimicrobial consumption, missed doses, and high-cost drugs through intuitive dashboards, exportable reports, and automated alerts.

By doing this, Triscribe reduces the manual burden on clinicians and pharmacy teams, saving them an average of one hour per week, while enhancing medication safety, optimising procurement, and supporting productivity tracking and carbon emissions monitoring.

"The NHS deserves better use of hospital medicines data"

DASHBOARDS

Our analytics platform integrates and visualises medicines data across NHS hospitals. The platform aggregated siloed data from multiple prescribing systems and presents it through intuitive dashboards to support both frontline and strategic decision-making.
