

SmartSimple Cloud is the latest generation of our cloud-based automation and collaboration platform that powers all our solutions. Our next-generation technology builds on our nearly two decades of empowering organizations to solve their complex process challenges.

Best-of-breed tech for your operations

Organizations are increasingly adopting a best-of-breed approach for their IT strategy, bringing the best technologies together under one roof to unlock greater ROI. Most have an ERP and a CRM system in place to manage finances and contact relationships. SmartSimple Cloud manages a key third aspect that neither ERP nor CRM systems are intended to manage, an organization's complex operational process. Through configuration, SmartSimple Cloud has the flexibility to manage any unique process, while seamlessly connecting your ERP and CRM systems. As one, SmartSimple Cloud enables organizations to optimize all aspects of their tech stack, from their ERP system, CRM system, to everything in-between.

A 'Continuum of Choice'

The uniqueness of SmartSimple Cloud is defined by one guiding characteristic: a Continuum of Choice. Our platform technology was designed with the highest degree of flexibility, meaning that any solution built upon it comes with the scalability and configurability needed to meet any requirement in your processes – no matter how nuanced. In turn, your vision of what a solution can look like on SmartSimple Cloud is entirely up to you.

Configurability at its best

SmartSimple Cloud is configuration-based technology that enables you to endlessly tailor the platform to meet your current and future needs as they evolve. Your entire organization will benefit from a highly personalized, moldable solution that avoids the costliness and riskiness of maintaining customized software. Every SmartSimple client will always use the latest version of SmartSimple Cloud, regardless of how the platform has been uniquely configured to meet their needs.

As SmartSimple Cloud continues to evolve over the new decade, our technology will be driven by the key pillars that have been fundamental in our approach to its development. As an ecosystem from which implementation and consulting partners are building solutions around, along with a [growing marketplace of applications and services](#), SmartSimple Cloud's functionality can be extended to connect to your other key business processes – all under one roof.

Web Based

All functionality is delivered through any supported browser on any computer or mobile device. No software installation is required.

Role Based Security & Permissions

Access to all data, including down to the level of individual fields, is controlled by the user's role and its permissions.

Role Based Interfaces

Configured to meet the needs of different user groups. This approach provides an appropriate interface for specific stakeholder groups, such as applicants and reviewers.

Modular Applications

Our proprietary Universal Tracking Application technology provides the ability to easily configure modules that address your key requirements.

Extensible Data Model

SmartSimple Cloud can be extended without programming. As your business requirements evolve, you can modify the field sets to meet new requirements.

Extensive Web Services

Comes with support for multiple API standards to connect to other systems, including OData, JSON, and SOAP/XML.

Built-in Reporting

SmartSimple Cloud includes a native reporting system for ad-hoc reporting and user-definable dashboards and charts. Reports can be exported into any format, including OData.

Cost Effective

SmartSimple Cloud, modules, and features are all included in a single annual subscription fee. Flexible licensing makes our solutions affordable, particularly for large user communities.

SmartSimple Cloud for Grants Management

We empower grantmakers with a centralized suite of customizable modules that work for you. These will help you to...

- Manage grants, programs, contracts and payments all in a single centralized system
- Track progress towards your goals
- Deliver targeted and automated communications
- Report outcomes and impact over time Grant lifecycle management

Our platform manages everything from grant proposals and submissions to approvals and reporting, so you can focus on the bigger picture.

- Efficiency
- Security
- Automation
- Transparency

Simplified collaboration

Our grants management solution simplifies collaboration across all stakeholders and areas of the granting cycle.

- Easily share and work on an application together
- Keep grantees, reviewers, staff and other stakeholders up-to-date with notes
- See the full history of communications between stakeholders at a glance

SmartSimple Cloud for Research Grants Management

Focus on the impact of your research grant funding rather than the complexities of its administration

SmartSimple Cloud for Corporate Social Responsibility

The world's first end-to-end giving and CSR solution that tells the complete picture of your global impact – all on one platform.

SmartSimple Cloud for Scholarship Management

Maximize efficiency and measurement throughout your award lifecycle with our highly flexible, all-in-one solution for scholarship providers.

SmartSimple Cloud for Government Funding

Manage your entire grant lifecycle under one roof with full transparency over your incoming and outgoing funds.

SmartSimple Cloud for Salesforce®

Bring unity to how you manage your funding processes and add best-in-class CRM with SmartSimple Cloud for Salesforce® advanced capabilities for managing your complex administrative operations

SmartSimple Cloud for Salesforce® is an enterprise-ready solution that combines the power of two best-of-breed platforms – for an even better way to meet your mission. Bringing together SmartSimple Cloud for Salesforce® to automate your complex administrative processes, and Salesforce CRM to manage all your relationships, you get the best of both platforms without compromise.
