G-Cloud Pricing document User Access Audit Reports

The Service

Samkit's User Access Audit Reports is a software tool designed to provide organisations using Oracle ERP Cloud with clear visibility into user access, role assignments, and access-related activities across their Oracle Fusion environment.

The service enables customers to audit who has access to what functions, when access was granted or changed, and whether access levels align with internal control and governance requirements. It supports audit readiness, access reviews, and ongoing monitoring of user privileges across finance, procurement, HR, and other Oracle ERP Cloud modules.

The service operates using read-only access to Oracle ERP Cloud and **does not store customer data on external or third-party systems.**

Pricing Model

User Access Audit Reports is licensed on a **per-user, per-month basis**, invoiced **annually in advance**. The service is subject to a **minimum user commitment**. All prices are **exclusive of VAT**.
