

Pricing Overview

The following pricing structure outlines the commercial model for the **SchoolBusNET Platform** under the **G-Cloud Framework**. Pricing is designed to be transparent, scalable, and aligned with the varying needs and sizes of public sector organisations. The model supports deployment across single schools, multi-school trusts, and local authorities, with costs structured according to student volume and service scope.

The pricing tiers reflect differences in scale and operational complexity, while ensuring consistent access to core platform functionality, security controls, and standard support services. This approach enables buyers to clearly understand baseline costs and any applicable one-time or optional charges prior to contract award.

	Tier 1 up to 5,000 students	Tier 2 up to 20,000 students	Tier 3 over 20,000 students
Software License	£ 10 per student/year	£ 9 per student/year	£ 8 per student/year

Pricing Notes and Commercial Terms

The pricing structure above is indicative and applies to annual call-off contracts under the G-Cloud Framework. Software licence fees are calculated on a per-student, per-year basis and are tiered according to the total number of students covered by the contract. One-time fees apply where stated and are payable at the commencement of the service.

Implementation and set-up fees include system configuration, environment setup, and initial onboarding activities. Data migration fees cover structured import of buyer-provided datasets and validation of migrated records. Online training fees include remote instructor-led sessions

as specified. Maintenance, standard support, and access to the Parent and Driver applications are included in the licence fee unless otherwise stated.

Optional services, including bespoke development, integrations, extended training, and consultancy, are charged separately based on the rates outlined above or subject to mutual agreement.

Additional costs may apply where buyer requirements fall outside the standard service scope, and will be agreed in advance prior to delivery.

All prices are exclusive of VAT. Discounts may be applied at the supplier's discretion for large annual call-off contracts, in accordance with the discount structure published within the G-Cloud pricing section. Final pricing is confirmed at the point of call-off agreement.
