Salesforce Commerce Cloud

Salesforce Commerce Cloud is a cloud-based solution (SaaS) that offers a comprehensive set of tools and features to manage all aspects of your online store. It enables retailers to deliver a consistent shopping experience to their customers, regardless of how or where they choose to shop.

Core Features

- Connected B2C/B2B Customer Experience
- Self-Service Online Buying
- Order Management System (OMS)
- Faster Go-to Market
- New Revenue Channel
- Payment Gateway Integration
- Data Driven Insights
- Cart Configurations
- Mobile Friendly Commerce

Our Strength

Our organization has over 60+ Commerce Cloud specialists engaged in over 80 diverse projects and areas within Salesforce.

Commerce API

Salesforce Practice Overview

Our team has extensive experience in implementing Salesforce CPQ, Sales, Commerce, Service, and Marketing Cloud along with MuleSoft and PartnerLinq middleware integrations.
