

PartnerLinQ
Connect Possibilities.

Enabling Digital Supply Chain Connectivity.

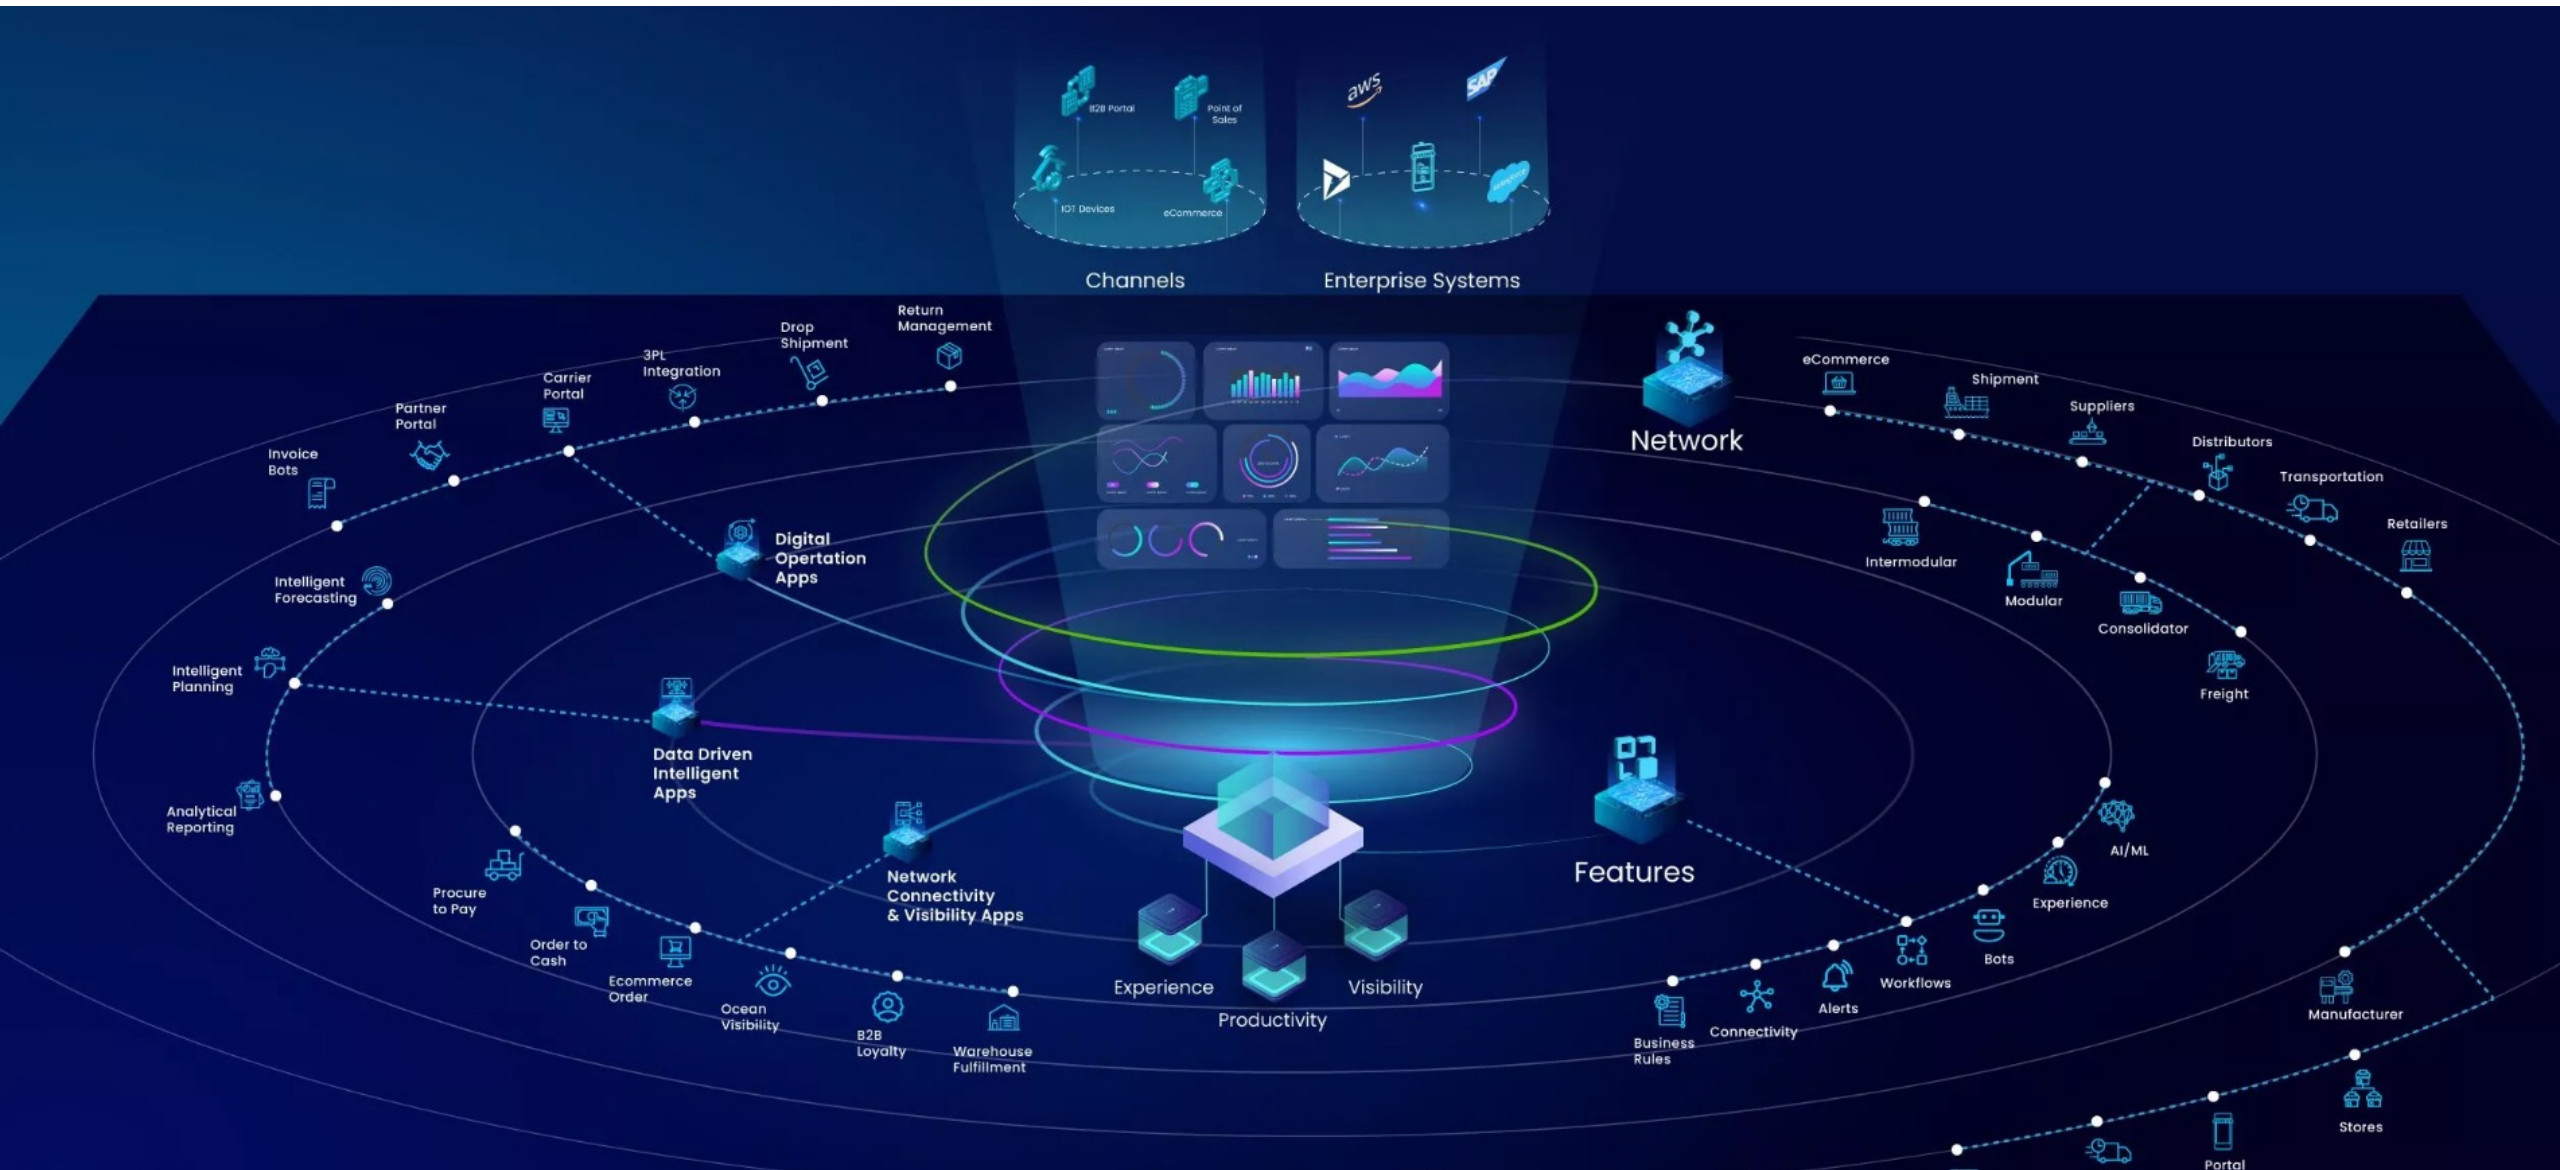

13th March 2024

PartnerLinQ stands out as a premier supply chain platform that **redefines digital connectivity, end-to-end visibility, and decision intelligence.**

Reimagine the Digital Supply Chain

Digital Connectivity, End-to-End Visibility, and Decision Intelligence

What makes us unique...

- Dynamic digital connectivity as a service across whole host of enterprise applications (from legacy to modern SaaS solutions), channels, customers, third party services and business partners
- Highly scalable and robust IT infrastructure to manage continued rise in data volumes, compute capacities, security and experiential aspects
- Streamlined and democratized access to semantically linked information for everyone who needs it - extracted from data coming from involved parties, systems, event streams and outside world through highly automated and contextualized processing.
- New generation of digital tools allowing business teams to monitor business processes across the entire value chain, make predictions and leverage them to make timely and inform decisions across planning & execution spectrum.

Our platform facilitates seamless sharing and collaboration, making predictive modeling a reality, anticipating change, and significantly improving risk mitigation.

**Unified digital connectivity
of the future.**
