Introduction

ODCGIS is an innovative company specialising in the provision of GIS mapping services for Geographical Information System (GIS) users. XMAP is a cloud-based GIS developed by Geoxphere and adapted by ODCGIS to suit social housing providers. XMAP is a cost-effective solution to GIS mapping avoiding the cost of employing an inhouse GIS Officer and benefitting from having expert GIS help during normal working hours, 52 weeks a year.

XMAP Packages

Each Managed Service package is tailored to meet the requirements of the customer. Factors taken into account include the number of properties the customer is responsible for, the area of their land registry boundaries, their budget, the number of users and how they will use the GIS.

Included In Package:

XMAP Set Up
Consultancy Days
Project Management
Training
Account Management
System Administration
Software Updates
Phone Support Monday- Friday 9.00-5.00
XMAP Online Mapping
