Pricing notes:

- 1) Pricing includes access to the Compliance OS Platform as well as the estimate of the maximum quantity of Unique Data Artifacts which will be processed during each year.
- 2) CUSTOMER is responsible to ensure that its actual usage does not exceed the Permitted Maximum as set forth above. The Parties will continue to monitor usage during the Term and anecdotes will make commercially reasonable efforts to notify CUSTOMER when it appears that its use may exceed the Permitted Maximum.
- 3) At a minimum, anecdotes will review usage on a quarterly basis and if consumption of Unique Data Artifacts or User Licenses exceeds the Permitted Maximum during the quarter, anecdotes shall issue a report to CUSTOMER at the end of the relevant quarter, describing the usage management in CUSTOMER' account. It is understood and agreed that Anecdotes may only charge CUSTOMER for excess usage up to twenty five percent (25%) of the annual subscription cost per year.

Usage Measurement

- a) Unique data artifacts will be measured based on the total number of unique evidence artifacts from any source (Automated/custom/merged/API/manual). A unique source is considered as the combination of system & account. Each unique artifact can be reused across frameworks and applications with no additional cost. A
- b) The number of users will be determined by the amount of active users (users that were invited to the platform and never signed in will not be defined as active users).
