MOODY'S

Pricing for UK Public Sector Entities

Product Summary: **Project Finance Scorecards** include models to assess the credit risk of project finance transactions. This includes a probability of default (PD), implied rating (IR), and loss given default (LGD). There are three distinct scorecards available:

- **Project Finance Generic PD** is designed to rate major types of projects with common risk characteristics, including Power, Infrastructure, and Oil & Gas.
- **Project Finance Renewable Energy** Probability of Default is designed to rate power generating projects that use renewable energies.
- **Project Finance Generic LGD** is designed to estimate the Loss Given Default for any project finance transaction.

Pricing:

Project Finance Scorecards is dependent on: number of Projects analyzed on a yearly basis and number of Scorecards contracted. (Unlimited number of Users)

Training and Support: On-site or remote training is included in the cost of Project Finance Scorecards.

Other Information: PoC available upon request. Minimum contract period is 12 months.
