MOODY'S

# Pricing for UK Public Sector Entities

| | |
|---|---|
| **Product Summary:** | **With default data going back to 1920, the Default & Recovery Database (DRD) allows you to look at how default experience varies at different points in the economic cycle. It also enables you to identify factors contributing to default experience in each economic cycle.** All data is derived from the Moody's Investors Service proprietary database of issuer, default, and recovery information. Moody's Ratings analysts use this data to produce the Annual Default Study, read by market participants globally. Clients frequently use this data to conduct credit research as well as build and update credit risk models, particularly those focused on probability of default and loss given default |
| **Pricing:** | The cost of DRD is dependent on:<br>- Single Analyst Access (Individual research with a defined team, data not licensed for enterprise use or consumption by 3rd party applications.)<br>- Enterprise Access (Allows organisations to use data across their estate.) |
| **Training and Support:** | Remote training is included in the cost of DRD. |
| **Other Information:** | Minimum contract period is 12 months. |
