

International Clinical Resourcing

SERVICE

Introduction

The world's first intelligent global medical careers hub and recruitment platform. Using a unique and easy to use cloud-based system you'll quickly find doctors, nurses and allied health professionals with the correct training and qualifications to meet your requirements.

A Global Medical Careers & Recruitment Eco-System

A medical careers ecosystem providing one intelligent system with access to:

- A network of users – connecting recruiters, healthcare workers and other 3rd parties from across the globe in a single environment
- A global job board and the world's largest talent pool
- Access to accredited online training via strategic partners.

The SaaS Platform - Powering Healthcare Careers

The system provides a regional and global job board, accessible to local medical facilities and by candidates from across the world.

Providing healthcare professionals one single point of access to information, including careers, medical licensure, direct access to hiring medical facilities, children's education, housing or living in the region.

The online medical marketplace is a 'one stop shop' for candidates where they will find support from medical recruitment professionals, identify suitable training opportunities enabling them to apply to opportunities where they don't currently meet the requirements.

The talent sourcing platform will highlight the gaps in their training or licensure support where 3rd party organisations will offer guidance/ assistance to meet the legal requirements per region.

What's unique to other recruitment platforms?

- Dedicated to medical recruitment – designed by medical recruiters
- Intelligent understanding of the whole medical recruitment process
- Instant candidate to job matching based on individual country's health authority/regulator's licensing criteria and your own job criteria
- Smart Search and filtering using AI – a unique understanding of medical training and associated qualifications across the globe
- Credentialling/Compliance management module, delivering an improved and efficient onboarding experience whilst cutting time and admin
- Manages single or group hospital organisations
- Supports centralised, de-centralised recruitment or a combination of both
- One single environment to manage all your recruitment needs
- Integrated branded job board and Smart candidate registration
- Built to be networked together to form an online 'marketplace' – this interface enables users to access candidates and conversely allows candidates to access international or regional opportunities.
- Instant candidate to job matching ensuring that candidates meet all the qualification criteria for the required level, licensure and experience requirements
- Instant understanding of a candidates medical training and associated qualifications
- The intelligent eligibility checker enables candidates to search internationally
- Provision of an end to end international medical recruitment CRM/ATS system
- Inbuilt communications – using platforms such as WhatsApp, Voice, SMS, email, Video - all in one single message stream
- Personalised candidate portals enabling candidates to manage their applications both locally and regionally, in a global single environment basis.

Key Benefits

Reduce Costs by 40%

A revolutionary intelligent system, built specifically for the complex global healthcare recruitment market.

Improve Quality and Accuracy by 90%

AI matching ensures candidates have the exact qualifications and experience to meet both job and regional healthcare authority criteria.

Accelerate Recruitment and Cut Timescales by 33%

In one single environment, reduce the time required to source and select candidates, assess their skills and onboard them.

Revolutionary

Revolutionising global healthcare recruitment. A SaaS cloud-based solution providing your HR Recruitment team with a single environment to manage all your recruitment processes.

Job Board and Branding

Individually branded state-of-the-art job board integrates into your website, enabling automatic job postings directed to your job board, social media and 3rd party job boards worldwide.

Unique Intelligence

The brain of the unique intelligent knowledge base understands the complexity of regional medical licensing and the global medical training pathways.

Eliminate Filtering CVs

Using the sophisticated matching algorithms of the AI, candidate applications are immediately and intelligently matched against your current jobs, sending alerts to your recruiters.

Quick and Easy Onboarding

The AI understands the complex medical licensure, visa and compliance processes across individual regions, automatically sending alerts to candidates for missing information and to recruiters when updates are received. Ensuring a streamlined process.

Easy to Use

Anytime, Anywhere, Any device.

The intelligent and intuitive interface simplifies the user knowledge and experience.

Scalable

Scalable for all sizes of organisations, supports both individual or large group operations whilst also supporting centralised or de-centralised recruitment – or a combination of both in a single environment.
