

RI Platform

Pricing Document (G-Cloud 15, Lot 2b SaaS)

1. Pricing Overview

This document sets out the pricing for RI Platform – Explainable Time-Series Analytics as a Service, available through the G-Cloud 15 framework.

All prices are exclusive of VAT unless otherwise stated.

Pricing applies for the duration of the G-Cloud 15 framework unless updated in accordance with framework rules.

2. Pricing Model

RI Platform is priced as a subscription Software-as-a-Service (SaaS).

Pricing is based on:

- Subscription tier
- Number of user seats
- Optional usage-based bands covering:
 - Engine calls for model builds and inferences
 - Overall data storage usage within a workspace
 - Number of automated data feeds
- API access
- Service level requested
- Optional professional services

There are **no mandatory minimum contract values**.

3. Subscription pricing

3.1 Service Bundles

All bundles are invoiced 1 month ahead on the first day of the month. Initial part month is added to the first invoice.

Buyers select a single subscription tier per workspace. Additional services may be added as required (see section 3.2).

Engine call allowances apply per calendar month and do not roll over unless explicitly agreed at call-off.

Service	Description	Unit	Price (£)
RI Platform – Core	Platform access for and low-volume use. Including: - Single Workspace - 100 Engine calls per month - 3 Users - Up to 10 data feeds - Up to 500MB storage - Standard support	Per month	£600
RI Platform – Pro	Platform access including: - Single Workspace - 2000 Engine calls per month - 5 Users - Up to 50 data feeds - Up to 2GB storage - Data Ingress API - Standard support	Per month	£2,236
RI Platform – Enterprise	As RI Platform – Pro, with additional functionality for high-capacity and regulated use cases, including: • Full service API access • Enhanced security and data residency options • On-premise or private cloud containerised deployment • Bespoke service levels and support arrangements (SLA) Pricing is provided on application and agreed per call-off contract, based on scale, deployment model, and support requirements. -	POA	POA

3.2 Additional Services

Additional services are valid for 1 month, purchased in advance and on a monthly basis. All services are invoiced 1 month ahead on the first day of the month. Initial part month is added to the first invoice.

Engine call allowances apply per calendar month and do not roll over unless explicitly agreed at call-off.

6. Discounts

A 10% discount is applied where 12 months of services are paid in full in advance.

The discounted price applies for the prepaid 12-month period only and does not alter the standard monthly pricing for subsequent periods unless renewed under the same terms.

Educational, research, and pilot discounts may be available on request.

Any discounts are applied transparently and confirmed at call-off.

7. Assumptions and exclusions

Prices exclude:

- VAT
- Buyer-provided data connectivity
- Third-party licences unless explicitly stated

No charges apply for contract exit or data extraction.
