

Pricing - Climate Essentials for Organisations

The platform is priced based on the number of sites an organisation wishes to include in its carbon emissions measurement and reporting.

Each subscription also includes six (6) days of Project Management support, provided as part of the standard service. Pricing for the platform is based on the number of sites included.

In addition, organisations may purchase optional additional sites and support if required, which can be procured separately.

All available extras, support options, and associated pricing are set out clearly in the tables on this page.

N° Sites	Total per year
up to 100	£19,500.00
up to 250	£27,500.00
