

Pricing

Pricing depends on the project complexity, sales team can provide pricing on request following some information. Factors we need to know for pricing:

- Number of users
- Size of data universe in scope
- Number of data sources and types (number of connectors)
- Information on the project

How is it deployed?

After initial scoping with you, we do all the heavy lifting for you.

About Insightful Technology

Established in 2014 and based at the very heart of the City of London in Royal Exchange, we're an international compliance and risk management company delivering innovative solutions for businesses in highly regulated and litigious industries.

Organisations use us to capture their communications and other data so they can mitigate risk to their business by monitoring for misconduct, fraud, misbehaviour and non-compliance. We do all the legwork, so clients don't have to worry about understanding the technical aspects and format of their data.

To find out how we can cost-effectively help you control your data, email us at enquiries@insightfultechnology.com
