

G Cloud 15

Pricing

Feebris Virtual Care Platform

Pricing – G Cloud 15

Our pricing is designed to be transparent and sustainable for health and social care environments. All prices published are complete, with no hidden or conditional costs. Pricing is structured to support predictable budgeting while remaining scalable as service usage grows.

Our standard pricing includes the most common components required to achieve successful outcomes, including access to core platform functionality, change management, project management, onboarding, and ongoing service support. This approach reduces the need for buyers to procure additional services to achieve operational value and supports faster mobilisation and adoption. Optional add-ons and configuration services are clearly defined and priced where applicable.

We recognise that service requirements are not fixed in time, and we work flexibly within the framework to support buyers in achieving their target outcomes. Our platform is continuously improved based on feedback from existing customers and emerging service needs. Enhancements to existing platform capabilities are provided without additional charge. From first engagement through to live service, our experienced delivery and solution teams support a smooth onboarding and deployment process, aligned to buyer implementation goals and focused on achieving a faster time to value.

Core SaaS Licenses

Service	Description	Unit	Price
Virtual Hospital - High Acuity	SaaS licence for high-acuity, high-throughput virtual beds supporting continuous and intermittent monitoring, real-time alerts, patient engagement, clinician workflows and escalation. Delivered using standard platform functionality.	Bed / calendar month	£65
Virtual Hospital - Low Acuity	SaaS licence for lower-acuity and long-term condition management, supporting intermittent monitoring, patient engagement, real-time alerts, proactive review and escalation using standard platform functionality.	Bed / calendar month	£30
Social Care - Deterioration Monitoring	SaaS licence for proactive identification of deterioration using connected devices, automated alerts and escalation workflows.	Kit / calendar month	£120
Social Care - Care Home Licence (Add-on)	SaaS add-on licence covering platform access for care home use, including standard onboarding, training materials, customer support and technical support.	Care Home / calendar month	£100

Core SaaS Licenses includes the below services:

- Software access web & mobile
- Standard Activation and Implementation Support
- Dedicated Account Manager
- Remote Training & Onboarding
- Access to self-help and online training materials
- Standard Support Desk
- Standard Reporting

Optional SaaS Add-ons

Add-on	Description	Unit	Price
Efficiency Suite	Optional SaaS add-on providing AI-enabled operational features including automated summaries, agentic task workflows, referral module and operational dashboards.	Licence / calendar month	From £30
Medical Algorithm Plus Suite	Optional SaaS add-on providing access to additional clinically certified medical algorithms.	Licence / calendar month	From £25

Integrations

Integration Type	Description	Pricing
Existing Integrations	Integrations already supported by the platform and available via standard APIs.	Included
Integration Configuration	Configuration and enablement of existing integrations using standard platform controls and settings only.	As per published SFIA-aligned rate card (where applicable)

Medical Devices

As a device agnostic provider the range of available devices is subject to change. We can provide an up to date list of supported devices on request.

Payment Options

Payment may be made monthly, quarterly or annually, as agreed with the Buyer in the Call-Off Contract.

Ancillary Services (SaaS Enablement)

The below is a list of non exhaustive services that are priced in line with our SFIA rate card to comply with G-Cloud 15 requirements.

- Ongoing cloud support and operational service delivery
- Advanced and extended support services (including out-of-hours, by agreement)
- Incident management, escalation, and proactive service monitoring
- Service mobilisation, onboarding, and change support
- Bespoke configuration and integration to enable cloud services
- Quality assurance, testing, and service optimisation
- Training and enablement for clinical, operational, and service teams
- End user onboarding support
- Collection, preparation, and distribution of technology kits
- Coordination of returns and decommissioning
- Logistics process management and tracking
