

Pervade Software's products **OpView™**, **OpIndex™** and **OpAudit™** are able to stand alone or combine to provide SOC, NOC & GRC in a single configurable system. The products sit on the same Central Server and share the same set of software engines. So, if a Central Server is deployed for one of the products then expanding the solution is very cost effective.

Individual Components

| Product         | Requirement                                | Product              | Requirement                                 |
|-----------------|--------------------------------------------|----------------------|---------------------------------------------|
| Central Server  | At least one per deployment                | Dark Web Spiders     | At least one per <b>OpIndex™</b> deployment |
| Data Collectors | At least one per <b>OpView™</b> deployment | Organisation License | At least one per <b>OpAudit™</b> deployment |

Please refer to the pricing tables on the following pages for options...

Components that can be acquired through Pervade Perpetual Licensing with Support

| Component                                          | Description                                                                                                                                 | Perpetual License Price | Annual Support Price |
|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------|
| Central Server for OpView™ or OpIndex™ or OpAudit™ | <b>Central Server - Software</b><br>(software only to be installed on client hardware, refer to minimum systems requirements)               | £25,000                 | £5,000               |
|                                                    | <b>Central Server - Virtual Appliance</b><br>(VMware virtual machine installation package)                                                  | £25,000                 | £5,000               |
|                                                    | <b>Central Server - High Availability</b><br>(secondary active/passive Central Server provided as Software, Virtual Appliance or Appliance) | £15,000                 | £3,000               |
| Data Collectors for OpView™                        | <b>Data Collector - Software</b><br>(software only to be installed on client hardware, refer to minimum systems requirements)               | £5,000                  | £1,000               |
|                                                    | <b>Data Collector - Virtual Appliance</b><br>(VMware virtual machine installation package)                                                  | £5,000                  | £1,000               |
| Dark Web Spiders for OpIndex™                      | <b>Spider – Software</b><br>(software only to be installed on client hardware, refer to minimum systems requirements)                       | £5,000                  | £1,000               |
|                                                    | <b>Spider – Virtual Appliance</b><br>(VMware virtual machine installation package)                                                          | £5,000                  | £1,000               |
| Compliance Licenses for OpAudit™                   | <b>Organisation License</b><br>(one required for each Organisation that is tracking it's compliance against one or more Policies)           | £5,000                  | £1,000               |

Bulk purchases of Data Collectors, Dark Web Spiders or Compliance Licenses are discounted 1%per item (maximum of 50)

Components that can be acquired through Pervade Subscription Licensing including Support

| Component                                          | Description                                                                                                                                 | 3 Year Price (pcm) | 5 Year Price (pcm) |
|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------|

Professional Services that can be provided by Pervade Software Engineers

| Services               | Description                                                                                                                       | Price                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| Deployment Services    | <b>Initial Installation &amp; Configuration</b><br>(deployment of the software to a running state at the Central Server location) | £950 per day                            |
|                        | <b>Additional Installation &amp; Configuration</b><br>(deployment of the software to a running state at additional locations)     | £950 per day                            |
|                        | <b>Initial User knowledge Transfer</b><br>(a run through of the functionality of the software provided for a designated user)     | £0<br>(typically 3 hours)               |
| Configuration Services | <b>Initial System Configuration</b><br>(configuration work, over and above that required to get to a running state)               | £950 per day                            |
|                        | <b>Additional System Configuration</b><br>(additional configuration work as a Change Request or a Feature Request)                | £1,250 per day                          |
| Customization Services | <b>Initial System Customization</b><br>(customization work carried out at the time of initial deployment of the software)         | £950 per day                            |
|                        | <b>Additional System Customization</b><br>(additional customization work as a Change Request or a Feature Request)                | £1,250 per day                          |
| Development Services   | <b>Software Development</b><br>(bespoke feature development and/or integration with 3 <sup>rd</sup> party systems)                | £950 per day                            |
| Training Services      | <b>Pervade Administrator Training*</b><br>(certified training for a single user to administer all aspects of the software)        | £3,000 per person<br>(typically 3 days) |
|                        | <b>Pervade Analysts Training*</b><br>(certified training in the forensic and analytical functions of the software)                | £3,000 per person<br>(typically 3 days) |
|                        | <b>Bespoke User Training*</b><br>(ad-hoc training for individuals, or a group of up to 4 people)                                  | £1,250 per day                          |

\* Training can be carried out on customer premises or at Pervade offices, the costs for independent venues such as hotels or training centers is not included

### About Pervade Software

Pervade Software has been named one of the most innovative cyber security companies in the UK and is the creator of OpView™, OpIndex™ and OpAudit™.

Thanks to award-winning new architecture, OpView™ can collect, correlate and display every data type, OpIndex™ can search and index Dark Nets with the highest degree of accuracy & detail and OpAudit™ can capture both technical and manual compliance evidence. All of this functionality is enabled from a single configurable portal-based system.

The products are used by a wide range of private and public sector clients across all verticals operating in more than 80 countries.
