

FREE TO USE

What is Cyber Toolkit?

Cyber Toolkit is a new free-to-use portal that combines a multitude of premium cyber security tools into in one easy to manage toolkit. From technical assessment tools such as vulnerability scanning and DNS audits, to compliance self-assessments and supply chain cyber risk management, Cyber Toolkit is a one-stop-shop for cyber security and available to all UK registered public and private organisations from March 1st 2026.

Our Mission

“Cyber Toolkit aims to help improve overall security posture by ensuring that the smallest 99% of organisations in the world understand their cyber security risks and have access to professional cyber security tools to help mitigate them.”
