

Agility PIM Pricing – as at 7th January 2026.

Agility private SaaS pricing is based on three components;

1. A Production instance of the software
2. The number of named-user licences required by the client
3. The number of non-production instances of the software required by the client

List pricing (up to 500,000 SKU's)

One Production Instance = £55,000 per annum, based on a minimum three-year commitment. Includes support, maintenance and entitlement to receive all new service pack releases.

System Administrator user licences = £1,000 per annum, each

Standard user licences = £800 per annum, each

Light user licences = £450 per annum, each

Read only user licences = £200 per annum, each

InDesign Connector user licences = £1,000 per annum, each

One Non-Production Instance = £19,000 per annum. Non-Production instances can be added for periods as short as two months.

Site-to-site VPN provision = £3,000 per annum.

Pricing increases by c£10,000 per annum for each additional 500,000 SKU's. This is to cover additional hosting costs in terms of processors, RAM and storage as the system scales up.

Data retrieval costs at end of contract

We do not charge clients to export their data at the end of the contract. The export would be in a standard XML format. Should the client require us to transform the export into a different format, this would be performed at the prevailing professional services rate, on a time & materials basis.

Discounts

Public sector discount is 25% off the list prices quoted above.
