Delivering Microsoft Power Platform Solutions

Delivered Diligently For The NHS by M8 Solutions

WHY M8 SOLUTIONS FOR POWER PLATFORM SOLUTIONS?

A safe, governed approach to Power Platform delivery, aligned to Microsoft standards and NHS governance.

THE IMPORTANCE:

The effective use of Microsoft Power Platform is increasingly critical to improving efficiency, visibility, and consistency across the NHS. Low-code solutions must be designed with clear governance, security, and purpose to ensure they are scalable, supportable, and trusted. M8 Solutions Power Platform services provide structured, NHS-grade delivery - combining technical expertise, information governance, and practical enablement.

THE M8 SOLUTIONS DIFFERENCE:

Our Microsoft Power Platform solutions deliver structured, expert-led capability without introducing unnecessary complexity, working seamlessly alongside the NHS to support safe, scalable adoption. We provide a governed, end-to-end approach tailored to your data landscape, digital maturity, and regulatory requirements, ensuring low-code solutions are implemented with confidence, control, and long-term sustainability. The following pages outline the key components of our Microsoft Power Platform delivery framework.

“Power Platform enables real operational capability. In regulated environments, success depends on strong governance, trust, and purposeful deployment.”

Milly Beech,
Business Manager.
M8 Solutions

MICROSOFT POWER AUTOMATE DEVELOPMENT AND CONSULTANCY

AUTOMATE PROCESSES, ACCELERATE PRODUCTIVITY, AND REDUCE MANUAL EFFORT:

Our Power Automate service supports NHS organisations to improve processes by streamlining workflows and integrating systems using low-code automation. From discovery and design through to deployment, governance, and training, we deliver secure, scalable solutions that align with NHS standards, support safe adoption, and maximise value across the Microsoft Power Platform.

WHY POWER AUTOMATE:

- Rapid workflow design - quickly build NHS-ready automations
- System integration - connect Microsoft 365, Dynamics 365, and key NHS systems
- AI-assisted automation - enable smarter, context-aware decisions
- Legacy system support - modernise older systems using RPA
- Power automate desktop - automate dynamic, less-structured tasks safely

OUTCOMES YOU CAN EXPECT:

- Reduce repetitive tasks and minimise human error
- Improve productivity through automated approvals and routing
- Adapt workflows quickly without bespoke development
- Scale automation safely across NHS services
- Strengthen visibility, auditability, and process control

OUR APPROACH:

We provide end-to-end support across discovery, design, configuration, deployment, governance, and training, ensuring Power Automate solutions are implemented safely and effectively within NHS environments. Our approach aligns automation with clinical, operational, and information governance requirements, delivering measurable improvements while supporting organisational priorities, service resilience, and long-term digital strategy.

MICROSOFT POWER APPS DEVELOPMENT AND CONSULTANCY

DIGITISE PROCESSES, MODERNISE EXPERIENCES, AND BUILD SECURE BUSINESS APPS FAST:

Our Power Apps service supports NHS organisations to replace manual, paper-based processes with intuitive, low-code applications that work securely across web, mobile, and Microsoft Teams. From discovery and design through to deployment, governance, and training, we deliver NHS-grade, scalable solutions that integrate seamlessly across the Microsoft Power Platform and align with NHS standards and controls.

WHY POWER APPS:

- Rapid app creation: Build NHS-ready apps using low-code tools
- System integration: Connect Microsoft 365, Dynamics 365, Dataverse, and NHS systems
- AI-enabled apps: Use AI Builder for secure forms, insight, and automation
- Flexible app types: Deliver canvas, model-driven, and Power Pages solutions

OUTCOMES YOU CAN EXPECT:

- Replace paper forms and manual tasks with secure digital apps
- Improve accuracy and consistency
- Deploy approved apps across web, mobile, and Microsoft Teams
- Adapt solutions quickly without heavy development
- Strengthen governance through role-based access and DLP controls

OUR APPROACH:

We work closely with NHS clinical, operational, and digital teams to design, build, and deploy applications aligned to service priorities and patient safety. From initial consultation through to governance, assurance, and training, we ensure applications are adopted safely and deliver measurable, sustainable impact across NHS services.

MICROSOFT POWER BI DEVELOPMENT AND CONSULTANCY

TURN DATA INTO INSIGHT WITH INTERACTIVE DASHBOARDS AND POWERFUL ANALYTICS:

Our Power BI service helps NHS organisations transform operational and clinical data into meaningful, actionable insights through modern reporting and visualisation. From discovery and data modelling to dashboard design, information governance, and user training, we deliver secure, scalable analytics solutions that integrate seamlessly across the Microsoft ecosystem used within NHS and public sector environments.

WHY POWER BI:

- Interactive Dashboards: Clear dashboards for informed NHS decisions
- Robust Data Modelling: Accurate, scalable NHS data models
- Wide Integration: Secure connection across NHS Microsoft systems
- AI-Powered Insights: Governed AI-driven insight and analysis
- Enterprise Reporting: Secure reporting with RLS and governance

OUTCOMES YOU CAN EXPECT:

- Create a trusted, single view of NHS data
- Support timely, informed clinical and operational decisions
- Reduce manual reporting and associated data risk
- Provide consistent insight across services and teams
- Strengthen information governance, security, and access controls

OUR APPROACH:

We support the full analytics lifecycle, from data discovery and modelling through to visualisation, deployment, information governance, and user training. This ensures analytics are delivered safely and consistently, provide measurable operational and clinical value, and align with NHS priorities, regulatory requirements, and organisational objectives.

MICROSOFT CUSTOM FORMS AND APPS VIA POWER APPS

REPLACE MANUAL PROCESSES WITH SECURE, INTUITIVE DIGITAL EXPERIENCES:

Our Custom Forms and Apps service helps NHS organisations modernise paper-based and manual processes using Microsoft Power Apps. We design and deliver tailored, NHS-aligned applications and forms that work seamlessly across web, mobile, and Microsoft Teams, supporting safer data capture, improved productivity, and a consistent user experience for clinical and non-clinical teams.

WHY CUSTOM FORMS AND APPS:

- Flexible Form Design: Dynamic NHS forms with structured data capture.
- Seamless Integration: Microsoft 365, Dataverse, Dynamics, and NHS systems.
- Modern User Experience: Accessible forms across devices and Teams.
- Automation Ready: Power Automate approvals and workflows.
- Secure by Design: NHS-aligned security, governance, and data protection.

OUTCOMES YOU CAN EXPECT:

- Reduce paper forms and manual data entry
- Improve data accuracy through validated inputs
- Speed up processes with automated approvals
- Reduce operational backlog and administrative burden
- Deliver consistent, user-friendly experiences across NHS teams

OUR APPROACH:

We support the full NHS delivery lifecycle, from discovery and service design through configuration, deployment, governance, and user training. This ensures every form or application is aligned to NHS operational needs, information governance requirements, and clinical and non-clinical workflows, delivering measurable and sustainable value.

DELIVER POWER PLATFORM SOLUTIONS WITH M8 SOLUTIONS

Strong Power Platform Governance for Trust, Compliance, and Continuity

Partnering with M8 Solutions for Power Platform governance provides your organisation with the strategic leadership needed to deploy and scale Power Apps, Power Automate, and related capabilities safely and sustainably. Our approach ensures data is managed responsibly, security and compliance obligations are met, and service continuity is maintained across clinical and non-clinical workflows. This service delivers a balanced combination of technical assurance, governance oversight, and trusted leadership, enabling NHS organisations to realise the benefits of the Power Platform while maintaining control in a regulated environment.

Contact us today to explore how M8 Solutions can strengthen your Power Platform adoption and governance, providing the leadership and assurance needed to deliver sustainable value.

“M8 Solutions’ Power Platform services create a trusted environment that enables controlled adoption, strong governance, and organisational confidence”

Tracy Scriven,
Chief Executive Officer.
