LET US INTRODUCE OURSELVES

Pragmatics 3D is a dynamic project management consultancy specialising in serving the unique needs of UK law enforcement, emergency services, and the broader public sector. With a keen focus on efficiency and effectiveness, we simplify complex changes and ensure seamless project delivery with proportionate controls.

“ Our mission at Pragmatics 3D is to blend the agility and rapid decision-making required in large-scale crime investigations with the essential governance and control mechanisms inherent to project management. We bring structure, clarity, and transparency to the project management process. ”

Our Vision:

Recognising the diverse challenges faced by policing and the public sector, we specialise in providing swift project management solutions, mobilising quickly into complex projects when needed. At Pragmatics 3D, we excel at revitalising ongoing projects, offering expert assistance in replanning and exception management to ensure effective delivery. No matter the stage of your project, it's never too late to reach out to us for support.

Unlike large consultancies that often present challenges such as limited knowledge of policing, insufficient vetting, and generic project management approaches, we pride ourselves on our deep understanding of UK Policing and the Public Sector. **Our passion lies in leveraging this expertise to deliver outcomes that meet and exceed expectations efficiently and effectively.**

LET US INTRODUCE OURSELVES

Vetted

Every Pragmatics 3D resource is fully Vetted to NPPV3 & SC level

Cyber Security

We have achieved Cyber Essentials & Cyber Essentials Plus

Safe Communication

We have CJSW email accounts, providing our clients with confidence in communication

Operational Understanding

We understand Policing & Law Enforcement, both Organisationally and Operationally from tactical to strategic level

Terminology

We know the terminology, the governance and the politics in public sector

Network

We have a broad network of vetted SMEs to assist in bespoke areas within the complex world of public sector and Policing

SERVICES OVERVIEW

At Pragmatics 3D, we pride ourselves on offering a suite of comprehensive services, tailored to meet the unique needs of the **Policing Sector** and the wider public sector. Our portfolio encompasses a range of capabilities spanning **Portfolio, Programme, and Project Management** (PPM), designed to empower organisations to navigate the complexities of **change** and drive impactful outcomes.

With a steadfast commitment to excellence and innovation, we leverage our extensive expertise to deliver tailored solutions that address the multifaceted challenges faced by our clients. Whether it's overseeing projects of varying scales, **establishing Portfolio Management Offices** (PMOs), or providing guidance on organisational change management, we stand ready to support Forces at every stage of their journey.

Through a **collaborative** and adaptive approach, we ensure seamless integration with our clients' teams, fostering a culture of continuous improvement and knowledge transfer. Our services are underpinned by a deep understanding of the **operational intricacies** of the Policing Sector, enabling us to deliver insights and solutions that drive sustainable growth and success.

In the following section, we delve into the details of the service you have selected, and provide an overview of other services we offer.

OPERATIONAL LEADERS PROJECT MANAGEMENT COACHING, MENTORING AND TRAINING

Service introduction

Many projects in policing are led by operational leaders who are not project management specialists, yet are expected to deliver change alongside day to day responsibilities. Our Operational Leaders Project Management Coaching, Mentoring and Training service provides practical, light touch support for individuals and teams leading smaller or discrete projects. It offers a proportionate capability uplift, giving Forces access to proven project management best practice without the need for full time project management roles.

Service overview

This service provides time boxed, outcome focused mentoring and support aligned to live projects. Engagement typically begins with a group based session to establish core principles, followed by targeted one to one mentoring through regular checkpoints, often on a fortnightly basis. During these sessions we work directly with operational leaders to develop and update practical project artefacts, including plans, RAID logs, governance papers, and reporting. The approach is deliberately pragmatic, focusing on applying recognised best practice to real work, improving grip, transparency, and confidence in delivery, while remaining proportionate to the scale and risk of the project.

Service Benefits

- **Proportionate Capability Uplift** – Delivers the benefits of formal project management without the cost of a dedicated PM role.
- **Practical and Embedded Support** – Mentoring focused on live projects and real delivery challenges.
- **Improved Governance and Transparency** – Introduces clear planning, reporting, and oversight in a manageable way.
- **Regular Grip on Delivery** – Fortnightly checkpoints maintain momentum and early issue identification.
- **Flexible and Time Boxed** – Scales to the size and complexity of the project and can be applied where needed.
- **Confident Operational Leaders** – Builds sustainable skills and confidence in leading change alongside operational duties.

PROJECT FRAMEWORK: METHODOLOGY

D ISCOVER

- Seek to understand the organisation and context of our engagement.
- Initial discovery is focused around working with clients to ensure our proposals and service will deliver required outcomes.
- Review of activity already completed by the client to utilise where possible, reducing duplication and resulting in a more efficient service offering.
- We tailor our project management style and approach to suit the organisation and type of change.

D EVELOP

- Engage with key resources and develop and refine options, to ensure buy-in from resources and foster positive working relationships.
- We are expert in creating options for discussion and development where there is a broad and undefined scope, and use a range of cloud based applications under our P3O to achieve this.

D ELIVER

- Using a blend of project management styles and cloud-based solutions.
- Offering both Waterfall and Agile project management services.
- Ensuring honest and open dialogue throughout delivery, and utilise cloud-based planning tools to ensure that project progress is maintained.
- Ensure delivery occurs at pace and achieves required quality outcomes.

THE P3D WAY

PROJECT FRAMEWORK: THE P3D WAY

The Pragmatics 3D way: Pragmatics 3D's approach is grounded in **effective and efficient project** management, which adds value and removes bureaucracy without sacrificing control. We take pride in our **extensive policing expertise**, and recognise that project and change management doesn't sit in isolation and needs to be aligned to the culture, priorities and vision of the Force / Organisation, promoting a sense and culture of **accountability**. To ensure our services always align with client requirements, we adopt the following approach:

SECTORS

- 43 UK POLICE FORCES
- HOME OFFICE
- OPCCS/COMBINED AUTHORITIES
- UK PHYSICAL FORENSICS
- UK DIGITAL FORENSICS
- ROCUS
- POLICING BODIES
- WIDER LAW ENFORCEMENT
- DEFENCE
- WIDER PUBLIC SECTOR

Typical “big 4” consultant

Pragmatics 3D

“

At Pragmatics 3D, we collaborate to enhance public sector productivity and innovation, helping the government achieve more with fewer resources through our specialised expertise and capabilities.

Value for money, and achievement of outcomes are at the core of our business.

We take pride in delivering exceptional public sector projects and in transferring skills and capabilities to UK policing , ensuring they are better equipped to tackle future challenges.

”

P3D Directors

CASE STUDY 1:

SSAS PROJECT

FOR NATIONAL UK

POLICING

Pragmatics 3D Project Management of the implementation and delivery of a national software system to support critical operational policing.

Key Objective:

To successfully implement the Shared Situational Awareness System software application into specialist teams across 43 police forces in the UK, to successfully transform the way that UK Policing utilises and manages assets; enhancing visibility, interoperability and collaborative working with wider emergency services.

Scope:

Coordination of key workstreams and national implementation, Pragmatics 3D facilitated the communication and collaboration between the different stakeholders, such as users, clients, procurement and project SRO: facilitating regular meetings, workshops and updates to keep all stakeholders informed and aligned on the project objectives, progress and issues. Acting on behalf of UK Policing to facilitate discussions between supplier and national policing partners.

Benefits:

P3D's extensive experience and fully vetted team enabled rapid mobilisation and alignment with project and strategic goals. Adopting a pragmatic approach to project management has helped to effectively manage the large scope of this project.

Key Objective:

Pragmatics 3D partnered with Lincolnshire Police to review their change portfolio and implement a new approach to the management of change across the Force, including the establishment of a P3O (Portfolio, Programme and Project Management Office) following the end of their service delivery agreement with G4S. The project aim was to establish a consistent and effective approach to managing and prioritising change across the force, as well as improving the governance and controls of the projects.

Scope:

Pragmatics 3D assessed the current teams, processes and products used by the cross-functional project teams, as well as the existing change activity and its impact and priority. Pragmatics 3D then developed a Portfolio Plan supported by categorisation and prioritisation models, and governance and controls matrix. Pragmatics 3D then successfully delivered the roll-out of the new function providing training and guidance to the staff and ensuring new process was embedded.

Benefits:

Pragmatics 3D delivered a framework and operating procedures for managing change in the Force, based on clear and consistent principles. Providing the Force with tools and governance to align future change with strategic priorities, and to ensure adequate resourcing and accountability, identifying savings and enhancing project delivery and benefits realisation.

CASE STUDY 3:

HOME OFFICE:

HOLMES SYSTEM

REVIEW

Proactive assessment of the Home Office HOLMES (Home Office Large Major Enquiry System)2 contract

Key Objective:

Pragmatics 3D partnered with BlueLight Commercial to conduct a proactive assessment of the HOLMES contract, which provides a system for managing and investigating complex serious crime across UK police forces. The project aim was to evaluate the current technical and contractual landscape, explore alternative supply chain options, and propose future innovation opportunities for the system.

Scope:

Pragmatics 3D carried out a comprehensive discovery phase, where they collected and analysed operational and commercial data, conducted market research and engagement sessions, and assessed the technical capabilities and requirements of the HOLMES system. Pragmatics 3D then developed a detailed report that presented the findings and insights from the discovery phase, along with a range of options and recommendations for the future procurement and evolution of the system.

Benefits:

Pragmatics 3D successfully delivered informed and innovative recommendations for the system's functionality and interoperability beyond 2025. Ensured transparency and accountability of the project, as well as stakeholder satisfaction and alignment.

Key Objective:

Project management of the redesign of the target operating model for the 5 forces in the East Midlands region. The objective was to implement an effective governance structure aligned to demand and threat undertaking active engagement from the 5 forces, ensuring key recommendations were addressed and activity aligned to organisational priorities. Delivering an effective operating model and updating the 5 force Section 22 agreement

Scope:

The project considered capabilities across all service areas, redesign the operating model, and identifying efficiency savings to address a forecast budget gap for FY25–26. Pragmatics 3D managed the programme, facilitating extensive stakeholder engagement across five forces, establishing effective governance, and delivering a co-designed Target Operating Model alongside a refreshed Section 22 agreement, including significant Force-level changes, within challenging timelines.

Benefits:

With Pragmatics 3D expert project and change management approach, we supported the 5 forces to deliver a model that addresses HMICFRS areas for improvement, identified savings, and delivers value for money for years to come.

 01522 837 288

"I thought the project performance / management on this has been excellent. Its followed PM principles without being overly bureaucratic and has been pragmatic in its approach. Without it I do not think we would have hit the deadline. I believe it has been money well spent considering the relevant area of business this concerned and the funding, resource and risk the area of business covers."

Rachel Swann, Chief Constable, Derbyshire Police

"From the outset, [P3D] were superb in engaging our management team, studying the copious amounts of documentation, policy, guidance and quickly assessing our needs. Throughout the project, they were always accessible, providing high quality products, setting timebound objectives and deadlines. The weekly meetings and accessibility was brilliant, and kept myself and colleagues on track throughout. The knowledge of EMSOU and policing was brilliant, so much so I would have invested in any of them as part of my senior leadership team."

Ch Supt Nick Waldram, Head of EMSOU

"Over the past 3 years I have employed P3D to provide the programme and project management for two major change initiatives; project managing the end of the commercial partnership between Lincolnshire Police and G4S; and the introduction of national situational awareness systems for armed and surveillance policing.

Steve, Elise and the team have been a pleasure to work with and brought the appropriate expertise, discipline and rigour needed for such complicated and critical programmes. They have ensured projects are on track, critical paths identified, managed and escalated when appropriate, showing good judgement in all they do.

The team bring a wealth of experience and knowledge and I came to trust and rely on them hugely during the time I worked with them. As a fully vetted, cyber-assured team and service there are few companies out there offering anywhere near the value for money I was able to secure with P3D."

Chris Haward, Chief Constable, Lincolnshire Police

"The support Steve and Elise provided was central to the success of the project; their no nonsense, pragmatic approach built and maintained confidence and ensured all components of a complex project were delivered."

*Malcolm Burch, Chief Executive,
Lincolnshire OPCC*

"The P3D team were a great support to BLC during this project. They assisted in stakeholder engagement, setting objectives and mapping out all key activity in a user friendly project plan. They supported the team to maintain momentum and to complete all aspects of the project, leading to the production of the final commercial report from BLC."

*Ruth McDermott, Commercial Director,
Blue Light Commercial*
