Pricing for – Grey Fleet & Driving Licence Checking Services

Pricing is fixed for the term of the agreement, with no hidden costs or extras.

Online UK Electronic Driving Licence Checks

A DVLA (UK driving licence check request), operates on a direct debit or invoice in arrears basis, unless there is agreement to pay in advance for the service. Each lookup on the DVLA (ADD service) will provide one driving licence to be checked and the following driving licence data will be provided:

- Driving licence (Full & Photocard) status, licence number & end dates
- Endorsements & penalty points
- All Disqualifications
- Provisional licence status
- Expired, due to expire and revoked licences
- Category entitlement (and expirations of the categories)
- Address (as notified by the driver to the DVLA)
- CPC card number and start & end dates
- Tacho Card number and start & end dates
- Medical (where provided by the DVLA) and any other restrictions

DVLA - Nil Return

NIL Return (DQ3) – requires Investigation & resolution. This is where a driving licence record returned with 'licence holder's record is being worked on by the DVLA', following a request to the DVLA against that licence holders' record. This means that the record is not available electronically from the DVLA and a manual submission will need to be made to obtain the details in the licence holder record. There are a number of reasons for which a record may be marked, a full list is available on request.

Online Northern Irish Driving Licence Checks

A DVA (Northern Irish driving licence check request) for Northern Ireland licence (NI) information does not form part of the Safe2Drive's UK licence checking service and therefore require a manual submission and data processing & entry by Safe2Drive's data processing team for which a different process and a separate charge will be incurred. *We operate on a direct debit or invoice in arrears basis, unless there is agreement to pay in advance for the service. One lookup on the DVA will provide one driving licence to be checked along with one result (where available).*

Online Foreign Licence Check (Ghost Record)

A DVLA foreign licence check is where a driver holds a non UK driver licence, but commits a motoring offence in UK the DVLA will record any endorsement/points against that driver record by allocating a UK driver number.

Customers can check whether an EU licence holder has a UK record by conducting a so-called "Ghost Record Check" against the foreign licence number. This is a manual process. *We operate on a direct debit or invoice in arrears basis, unless there is agreement to pay in advance for the service. One lookup on the DVLA will provide one driving licence to be checked along with one result (where available).*

Online Grey Fleet Check

A Grey Fleet Check on a UK registered vehicle will consist of a DVLA lookup on the registration and return the vehicle record. The vehicle record will contain information such as, MOT date / Road Tax date / CO2 Emissions / Date of First Registration / Fuel Type / Manufacturer Types / Euro Ratings / Engine Capacity / and a manual check and electronic verification of Business Insurance / Breakdown Cover. The system reports and alerts both the system users as well as the driver of all expired information. *We operate on a direct debit or invoice in arrears basis, unless there is agreement to pay in advance for the service. One lookup on the DVLA will provide one grey fleet check along with one result (where available).*

Software/System Deployment

Safe2Drive will deploy the following elements, as part of a standard system implementation:

- One instance of Safe2Drive's - Driving Licence Checking cloud hosted software/system
- Set up of locations and departments within the system
- Set up of unlimited, role-based users that are authorised to access the system
- Mandate provision service, both D906 and the electronic sending of the E-Declaration
- Cloud Hosting in MS Azure is inclusive in the costs

Training / Client Specific Or Repeat Training

A training online webinar, with any client staff, no attendee limits.
The training service is included within the pricing.

Optional Onsite Training

Transport, accommodation and subsistence charged separately, details upon request.

Optional Bespoke Management Reports

This option is to have a client define the data columns that the report should contain, and for Safe2Drive to develop these reports on the client's behalf.

Optional Client System Branding

The option to include corporate logos, change font colour

Optional Services & Addons

Online Driver Profiling & Driver E-Training

Safe2Drive also offers clients access to Online Profiling and E-Training for drivers of all types of vehicles. The system uses a combination of high-definition video footage and still images, and the driver risk assessment system is a 'skills and knowledge' system which means it adopts the tried and trusted approach of assessing drivers 'in vehicle' but places the process online.

Online Management of Road Risk Compliance

The Safe2Drive Fleet Academy is an online service providing businesses with legal guidance and resources needed to tackle occupational road risk within your business. Up-to-date policy templates are 'ready to use' and roll out across your business which improve procedures and communications to create a positive driving at-work culture and improved driver engagement.

Terms & Conditions & Service Level Agreement

- **Terms and Conditions** are available upon request.
 - **Service Level Agreement (SLA)** is available on request and forms a schedule within the Terms and Conditions.
