

Microsoft Azure Monitor

What is Azure Monitor?

Ingentive provides Microsoft Azure Monitor as a cloud-based monitoring service that collects, analyses and visualises telemetry from Azure, hybrid and on-premises environments. The service enables organisations to monitor infrastructure health, performance and availability using metrics, logs, alerts and dashboards delivered through Microsoft's native Azure monitoring platform.

Service categories:

- Application development and deployment
- Application platforms
- Deployment centric application platforms
- Application server software platforms
- Cloud deployment-centric application platforms
- Transaction processing monitors

Benefits:

- Improved visibility of infrastructure health and performance
- Faster detection of availability and performance issues
- Reduced downtime through proactive alerting

- Centralised monitoring across hybrid environments
- Better operational decision-making using real-time insights
- Scalable monitoring without additional hardware

- Lower operational overhead through automation

- Improved service reliability and availability
- Flexible monitoring aligned to business needs
- Native integration within the Azure ecosystem

Add-ons & extensions

This can be used as a standalone service, or as an add-on.

Microsoft Azure Monitor extends Azure infrastructure services and integrates with Azure Resource Manager, Azure Log Analytics, Microsoft Sentinel, Microsoft Defender for Cloud and a wide range of Azure and hybrid workloads to provide centralised monitoring and observability.

Getting started

Azure Monitor requires an active Azure subscription and Log Analytics workspace. Ingentive assists with initial configuration, agent deployment, alert setup and dashboard creation. Access is managed through Azure role-based access control.
