

Microsoft Power Platform Low Code Apps

Keep your applications talking to one another.

What is low code?

Low code refers to a visual development approach that allows people with little to no traditional programming experience to create applications or software through graphical user interfaces and configuration instead of traditional computer programming. Ingentive delivers Microsoft Power Platform low-code solutions that enable organisations to build secure, scalable applications using Power Apps, Power Automate, Power Pages and Dataverse.

Service categories:

- Application development and deployment
- Software quality life-cycle
- Software change, configuration on process management

Benefits:

- Faster delivery of business applications
- Reduced reliance on traditional development

- Improved automation and operational efficiency
- Empowered staff building in-house solutions

- Scalable solutions aligned to organisational growth
- Lower development and maintenance costs

- Rapid prototyping and iterative innovation
- Enhanced data consistency through Dataverse

Add-ons & extensions

This can be used as a standalone service, or as an add-on.

This service extends Microsoft Power Platform and integrates with Microsoft 365, Dynamics 365, Azure services and supported third-party applications. It enables organisations to connect systems, reduce duplication, improve data accuracy and create capabilities not available in existing tools.

Getting started

Users require the appropriate Microsoft Power Platform or Microsoft 365 licences, assigned by a customer Global Administrator. Once licences are allocated, users gain access to the relevant Power Apps, Power Automate, Power Pages and Dataverse modules needed for their role.
