

Power Platform Low-code support & enablement

What we offer

Ingentive delivers Microsoft Power Platform low-code solutions that enable organisations to build secure, scalable applications using Power Apps, Power Automate, Power Pages and Dataverse. We provide design, development, governance and enablement services so teams can create, extend and support applications in-house, reducing manual processes and improving operational efficiency.

Service categories:

- Application development and deployment
- Software quality and life cycle
- Software change, configuration and process management

Benefits:

- Faster delivery of business applications
- Reduced reliance on traditional development
- Improved automation and operational efficiency

- Empowered staff building in-house solutions
- Scalable solutions aligned to organisational growth

- Lower development and maintenance costs
- Rapid prototyping and iterative innovation

- Better integration across business systems
- Enhanced data consistency through Dataverse
- Increased agility in process improvement

Add-ons & extensions

This can be used as a standalone service, or as an add-on.

This service extends Microsoft Power Platform and integrates with Microsoft 365, Dynamics 365, Azure services and supported third-party applications. It enables organisations to connect systems, reduce duplication, improve data accuracy and create capabilities not available in existing tools.

Getting started

Users require the appropriate Microsoft Power Platform or Microsoft 365 licences, assigned by a customer Global Administrator. Once licences are allocated, users gain access to the relevant Power Apps, Power Automate, Power Pages and Dataverse modules needed for their role.
