

Microsoft Defender for CNAPP

Keeping you protected.

What we offer

Ingentive provides Microsoft Defender for Cloud-based CNAPP services that deliver unified cloud security posture management and workload protection across Azure, AWS and Google Cloud. The customisable service identifies misconfigurations, prioritises vulnerabilities, strengthens permissions, protects workloads and provides continuous compliance monitoring using Microsoft's native analytics and automation capabilities.

Service categories:

- System infrastructure software
- Cloud native application protection
- Endpoint security
- Data security
- Governance, risk and compliance

Benefits:

- Centralised visibility fo cloud security risks

- Reduced breach risk through proactive hardening

- Enhanced indentify permissions and governance
- Lower operational effort with automated assessments

- Faster identification of misfigurations and vulnerabilities
- Improved DevOps security with integrated checks
- Improved security posture across multu cloud environments
- Protection for workloads without additional agents

Add-ons & extensions

This can be used as a standalone service, or as an add-on.

Microsoft Defender for Cloud extends Azure security services and integrates with Azure-Resource-Manager, Azure-Policy, Microsoft-Entra-ID and a wide range of cloud platforms including AWS and Google Cloud. It also connects to container platforms, DevOps pipelines and workload protection services to provide unified cloud security posture management and workload protection.

Getting started

Microsoft Defender for Cloud requires an active Azure subscription. Ingentive assists with onboarding, including multi-cloud connector setup, policy configuration, workload protection enablement and compliance baseline creation. Access is controlled through Azure role-based access control and managed by the customer's Azure administrator.

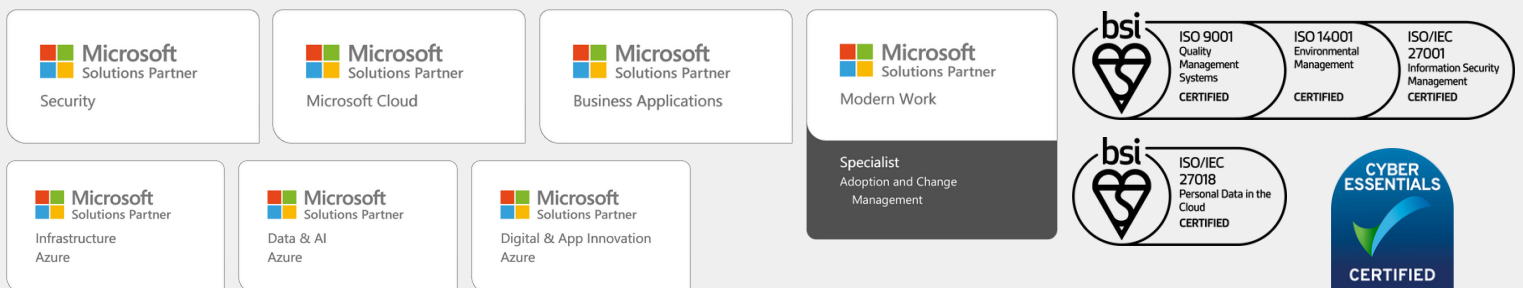

Why choose us?
