PRICE LIST FOR SAAS VERSION

CB DYNAMICS 365 TO SHAREPOINT PERMISSIONS REPLICATOR

| Protect your SharePoint Documents

CB Dynamics 365 to SharePoint Permissions Replicator is the only solution on the market that strictly enforces all Dynamics permissions to documents in SharePoint. Protecting personal and sensitive data from unauthorized access. It is Azure Government-approved and supports your GDPR compliance.

Description

A solution that **synchronizes the document access** rights between **Dynamics 365** and **SharePoint** and keeps your **sensitive data protected**.

A standard Dynamics 365 CE to SharePoint integration doesn't synchronize permissions and privileges between the systems. Confidential documents like salaries, contract values etc. may become available to those who **don't have permissions for them**. We resolve this by replicating the document access rights between the systems.

Success Stories

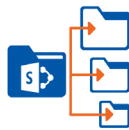

"We are very satisfied. The administrative effort we have to put in is minimal"

"The most important issue we solved was limiting access to confidential documents via Dynamics security roles and entities. ..."

Peter Lukschanderl

Head of Applications, IT at Liebherr Tower Cranes

Dynamics 365 + SharePoint Document Management Suite

SharePoint Structure Creator

Organize the Microsoft Dynamics 365 documents you have in SharePoint in the exact way that works for your team. Avoid the dreaded unique permissions limit.

CB Dynamics 365 Seamless Attachment Extractor

Use your Dynamics storage space wisely and don't waste it on attachments. Automatically move attachments to SharePoint or other storage, even historical ones.

Truth Enforcer for SharePoint

Go the extra mile with Blockchain! Guarantee that no one manipulated those important files you have in SharePoint. Ensure authenticity and keep your system GDPR-compliant.
