« Purchase it directly from Microsoft »

NUMBER OF USERS	1 MONTH	6 MONTHS	12 MONTHS	24 MONTHS	36 MONTHS
10 – 30	13.00 € User / Month	8.00 € User / Month	6.50 € User / Month	6.25 € User / Month	6.00 € User / Month
31– 200	11.00 € User / Month	7.50 € User / Month	5.50 € User / Month	5.30 € User / Month	5.20 € User / Month
201 – 500	9.00 € User / Month	6.50 € User / Month	4.50 € User / Month	4.30 € User / Month	4.20 € User / Month
501 – 999	8.00 € User / Month	6.00 € User / Month	4.00 € User / Month	3.80 € User / Month	3.70 € User / Month
More than 1000	Let us know how many users you need and we will provide you with the price within 24 hours.				

Traffic packages (Batteries)

5 GB 30.00 €	20 GB 99.00 €	100 GB 299.00 €	1 TB 990.00 €
-----------------	------------------	--------------------	------------------

Sometimes you need to sync a large number of files, or big files. For that, we provide our traffic packages. The traffic that is part of your plan (500 MB per user per month) is always used first. Then, if necessary, traffic from the battery is used. As long as you have an active plan, you can use traffic from the package you purchased – there is no expiration date. When there is no more traffic available in the package, it stops automatically.

Community Users and Experience Cloud Users are fully supported and benefit from usage-adapted pricing models. Contact us for more details.

Supported versions

Salesforce Enterprise, Unlimited, Developer, Classic and Lightning Experience
SharePoint 2013, 2016, 2019 and Online
Office 365

PRICE LIST FOR THE SELF-HOSTED OPTION

DOCUMENT Extractor built for Salesforce platform™

| Productivity increase in document handling built for Salesforce platform™ in combination with Microsoft SharePoint / Office 365

Help your organization to save storage cost, improve your team's productivity and boost collaboration

Description

The solution to connect **Salesforce and SharePoint/Office 365** and have a single document repository for all your files and attachments - all while **running automatically** in the background without disrupting your users' interface. It allows companies to be in **full control of documents** and comply with the most rigorous data protection regulations: **country-specific or the GDPR**.

Features

1. Background Solution with no changes to the Salesforce interface - Avoid extra loading times due to extra iframes
2. Increases compliance with data protection regulation
3. Slashes Salesforce document storage costs
4. Better document management and team collaboration
5. Ability to share and work on documents with Non-CRM Users
6. Fully integrated to support Community Users
