SHAREPOINT STRUCTURE CREATOR

| Automatically generate document libraries in SharePoint using predefined rules to prevent exceeding unique permission limits

Automatically create document libraries in SharePoint based on defined rules to avoid reaching unique permission scope limitations.

Description

SharePoint Structure Creator resolves the issue of the limited document library permissions in SharePoint.

A unique ready to use solution to keep your document folders in SharePoint standardized and well-protected.

SharePoint Structure Creator

It automatically creates or selects document libraries in SharePoint based on the rules you define:

- A document library per letter or letter set (based on starting character(s) of the record name or the starting character(s) of the record ID)
- A document library per period (year, quarter, month, week, day or custom)
- A document library per record
- Custom - define any business rules you can imagine by using custom scripting and LUA programming language

Benefits

- ✓ Avoid reaching the 50k unique permission limit ([Microsoft recommends not going over 5,000 unique permissions](#))
- ✓ Saves time on searching documents
- ✓ Increases the integrity of your business and GDPR compliance
- ✓ Keeps SharePoint folders organized, standardized and protected
- ✓ Allows to arrange SharePoint the way your business needs it – storing records in the alphabetic, calendar order, etc.

Features

Automated creation of Document Libraries

Enhance User Experience

Available for On-premises or Microsoft Azure Deployment, cloud

Rich Configuration Possibilities

Supports multiple SharePoint sites installations
