

Extending health span at home with AI-powered wisdom

www.miicare.co.uk

We believe everyone deserves to live the life they choose without worrying about their health as they age.

The Problem

The Silver Tsunami is fast approaching, with observable signs nationwide.

By **2050**, the number of people over 80 will **triple** and those over 65 will **double**.

32% of the world's older population lives alone and experiences loneliness and mental health issues.

85% of older adults have at least 1 chronic health condition which they struggle to manage.

Over **65%** of older adults don't have a smart phone or internet at home.

The Solution

Older adults deserve a solution that is alert, interactive and intelligent.
This is where **MiiCare** steps in.

Keeps them safe, healthy and
happy in their own home

Helps them to stay connected
with their community

Supports them to better
manage their chronic conditions

Saves money and
reduces hospital visits

MiiCare is a preventative, AI-powered healthcare solution which helps professional care providers and families to evaluate, plan, and drive positive health impact to older adults and those with chronic conditions

Meet Monica, your care **co-pilot**

Hosted by the MiiCube, **Monica**, our digital health coach, empowers older adults to **self-care at home** through **voice** interactions and conversational **AI**, guiding them on their well-being journey.

Making care at home effortless

A DIGITAL HEALTH COACH

Our home hub (**MiiCube**) includes **Monica**, the digital health voice assistant, offering personalised digital health therapies for sleep, exercise, nutrition, and more.

AI-POWERED HEALTH INSIGHTS TOOL

We gather user health data and utilise machine learning algorithms to **detect health issues early** and empower users to **manage chronic conditions** autonomously.

A HEALTH NAVIGATOR FOR CAREGIVERS

Our **dashboard** tracks the health and well-being of users and makes this data available to those who care. It is also available as a mobile **app**, with population views to **prioritise** and **monitor** care in one platform.

Accessible wherever you are

Making sure you are always up to date, regardless of your location.

Digital
Therapeutics

Focusing on Sleep,
Nutrition, and
Exercise

Care Pathway

Respiratory,
Cardiovascular,
Diabetes, Dementia,
and Frailty.

Features

Insights for clinicians,
wellness score,
reminders, CBT for
Sleep, Digital
Therapeutics to help
manage chronic
conditions.

Proactivity

A **decline in user health** is easily identifiable, with conversation summaries combined with the data collected to generate smart insights.

Precision

Accurate data showing **user health** and **home activities**, highlight the need for prompt action.

Efficiency

Clearly presented data on the areas that **matter most**, filtering out unnecessary noise.

Made possible by our accessories

Multi-Sensor

Meant to be placed in the rooms that you use throughout your day.

They monitor movement, temperature, humidity, and light intensity in every room, helping Monica keep you safe by understanding your daily routine and alerting your caregivers in case of anomalies.

Door Sensor

Keeps track of entry and exit through doors, as well as appliance usage, ensuring your safety.

Smartwatch

Logs vitals, daily activity and sleep quality. Designed for easy use with large and clear fonts.

Pulse Oximeter

Measure and log your oxygen levels and pulse rate.

IR Thermometer

Enables accurate temperature readings in a flash.

Blood Pressure Monitor

Monitors your blood pressure with seamless data syncing.

Smart Scale

Stay on top of your weight goals.

NHS Bedfordshire, Luton and Milton Keynes ICB

Supporting D2A & Reablement in recently discharged patients

Key Outcomes
