About us:

Blinx Healthcare is a pioneering cloud-based Health Tech company specialising in solutions for Primary Care and Urgent Care settings. Our flagship product suite, PACO (The Patient And Care Optimiser), represents a paradigm shift in healthcare software-as-a-service (SaaS) solutions.

Blinx Healthcare has invested significant time and resources in developing PACO, leveraging advanced technical integration, data analytics, and user experience (UX/UI) expertise. Designed by healthcare practitioners for healthcare practitioners, PACO is built on a modern cloud architecture with scalability at its core.

PACO is the single platform that supports the full patient journey, from GP to hospital and everything in between. PACO brings together GPs, PCNs, Federations, community services, social care, mental health, and hospitals – enabling shared records, real-time communication, and modern digital tools that work with, not against, existing systems.

PACO Patient Portal

The PACO Patient Portal is a secure, patient-facing digital access platform designed for **acute Trust environments**. It enables patients to manage appointments, receive communications and access clinical and administrative documents through a single, consistent interface.

The portal integrates with core acute clinical systems (including EPR, PAS and scheduling systems such as Meditech) and can be deployed across outpatient, diagnostic and elective pathways.

It is designed to reduce administrative burden, improve patient engagement and support modern access standards at scale.

Types of Licence

PACO Patient Portal is licensed based on **annual outpatient and diagnostic appointment volumes**, ensuring costs scale fairly with Trust size and usage.
