## SERVICE DEFINITION

# SAP All-in-One

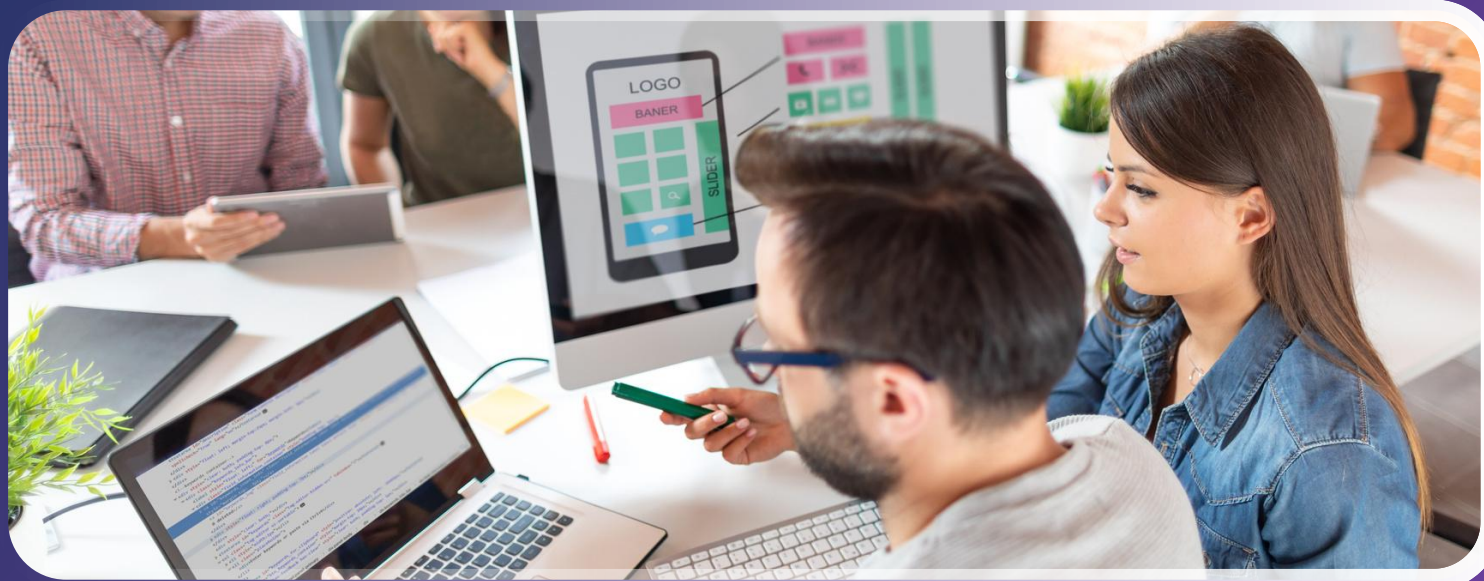

# INTRODUCTION

- ✓ VIRGULE delivers SAP S/4HANA Edition for SAP Business All-In-One, tailored for SMEs.
- ✓ Running on the HANA in-memory database, it drives innovation at speed.
- ✓ Our solution offers industry-specific ERP capabilities, intuitive user experiences, and quick, cost-effective go-live using best practices.

# Services Features

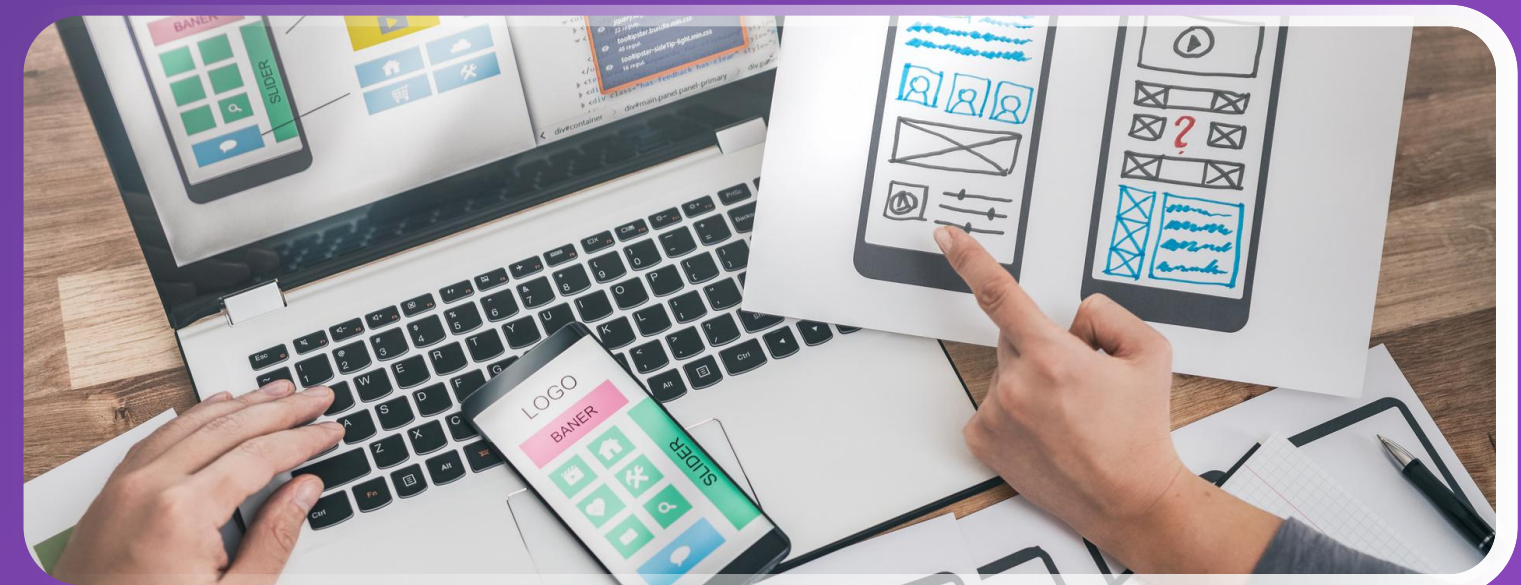

- ✓ Industry-specific ERP for SMEs
- ✓ Localised versions for 55 countries
- ✓ Runs on SAP HANA in-memory database
- ✓ Real-time analytics and reporting
- ✓ Intuitive personalised user experience
- ✓ Scalable architecture for digital economy
- ✓ Connects people, devices, and networks
- ✓ Rapid deployment using best practices
- ✓ Best-in-class ERP for 25 industries
- ✓ Mobile-enabled for remote access

# Service Benefits

- ✓ Thrive in the digital economy
- ✓ Improved operational efficiencies
- ✓ Compliance with global regulations
- ✓ Unified view of business operations
- ✓ Future-proof technology platform

- ✓ Accelerated user adoption with intuitive UX
- ✓ Drive innovation and growth efficiently
- ✓ Real-time visibility into business performance
- ✓ Quick and cost-effective implementation
- ✓ Industry-specific functionality out of the box

# Approach to Design

## Azure-First Architecture

Designing solutions that fully leverage Azure services such as Azure Virtual Machines, App Services, Containers, and PaaS offerings to ensure scalability and long-term flexibility.

## Microsoft (CAF) Alignment

Following Microsoft's proven Cloud Adoption Framework to guide planning, readiness, migration, innovation, and governance across the cloud journey.

## Business-Centric Solution Planning

Translating business goals into technical roadmaps through close alignment with stakeholders, ensuring measurable outcomes and value-driven cloud design.

## Iterative Migration & Deployment Model

Executing phased migrations with continuous validation, reducing risk while enabling faster time-to-value and minimal business disruption.

## User Experience–Driven Design

Focusing on performance, accessibility, and usability to ensure cloud applications deliver consistent and intuitive experiences for end users.

## Built-In Governance & Security Controls

Integrating identity management, encryption, compliance controls, and monitoring at every design stage to ensure end-to-end security.

# Development Approach

**01**

## Cloud Readiness–Driven Execution

We begin by assessing application, data, and infrastructure readiness to define the right Azure migration path rehost, refactor, re-architect, or rebuild ensuring optimal outcomes.

**03**

## Infrastructure as Code (IaC) Enablement

Azure environments are provisioned using ARM templates, Bicep, or Terraform to ensure consistency, repeatability, and faster environment setup across development, test, and production.

**02**

## Continuous Integration & Deployment

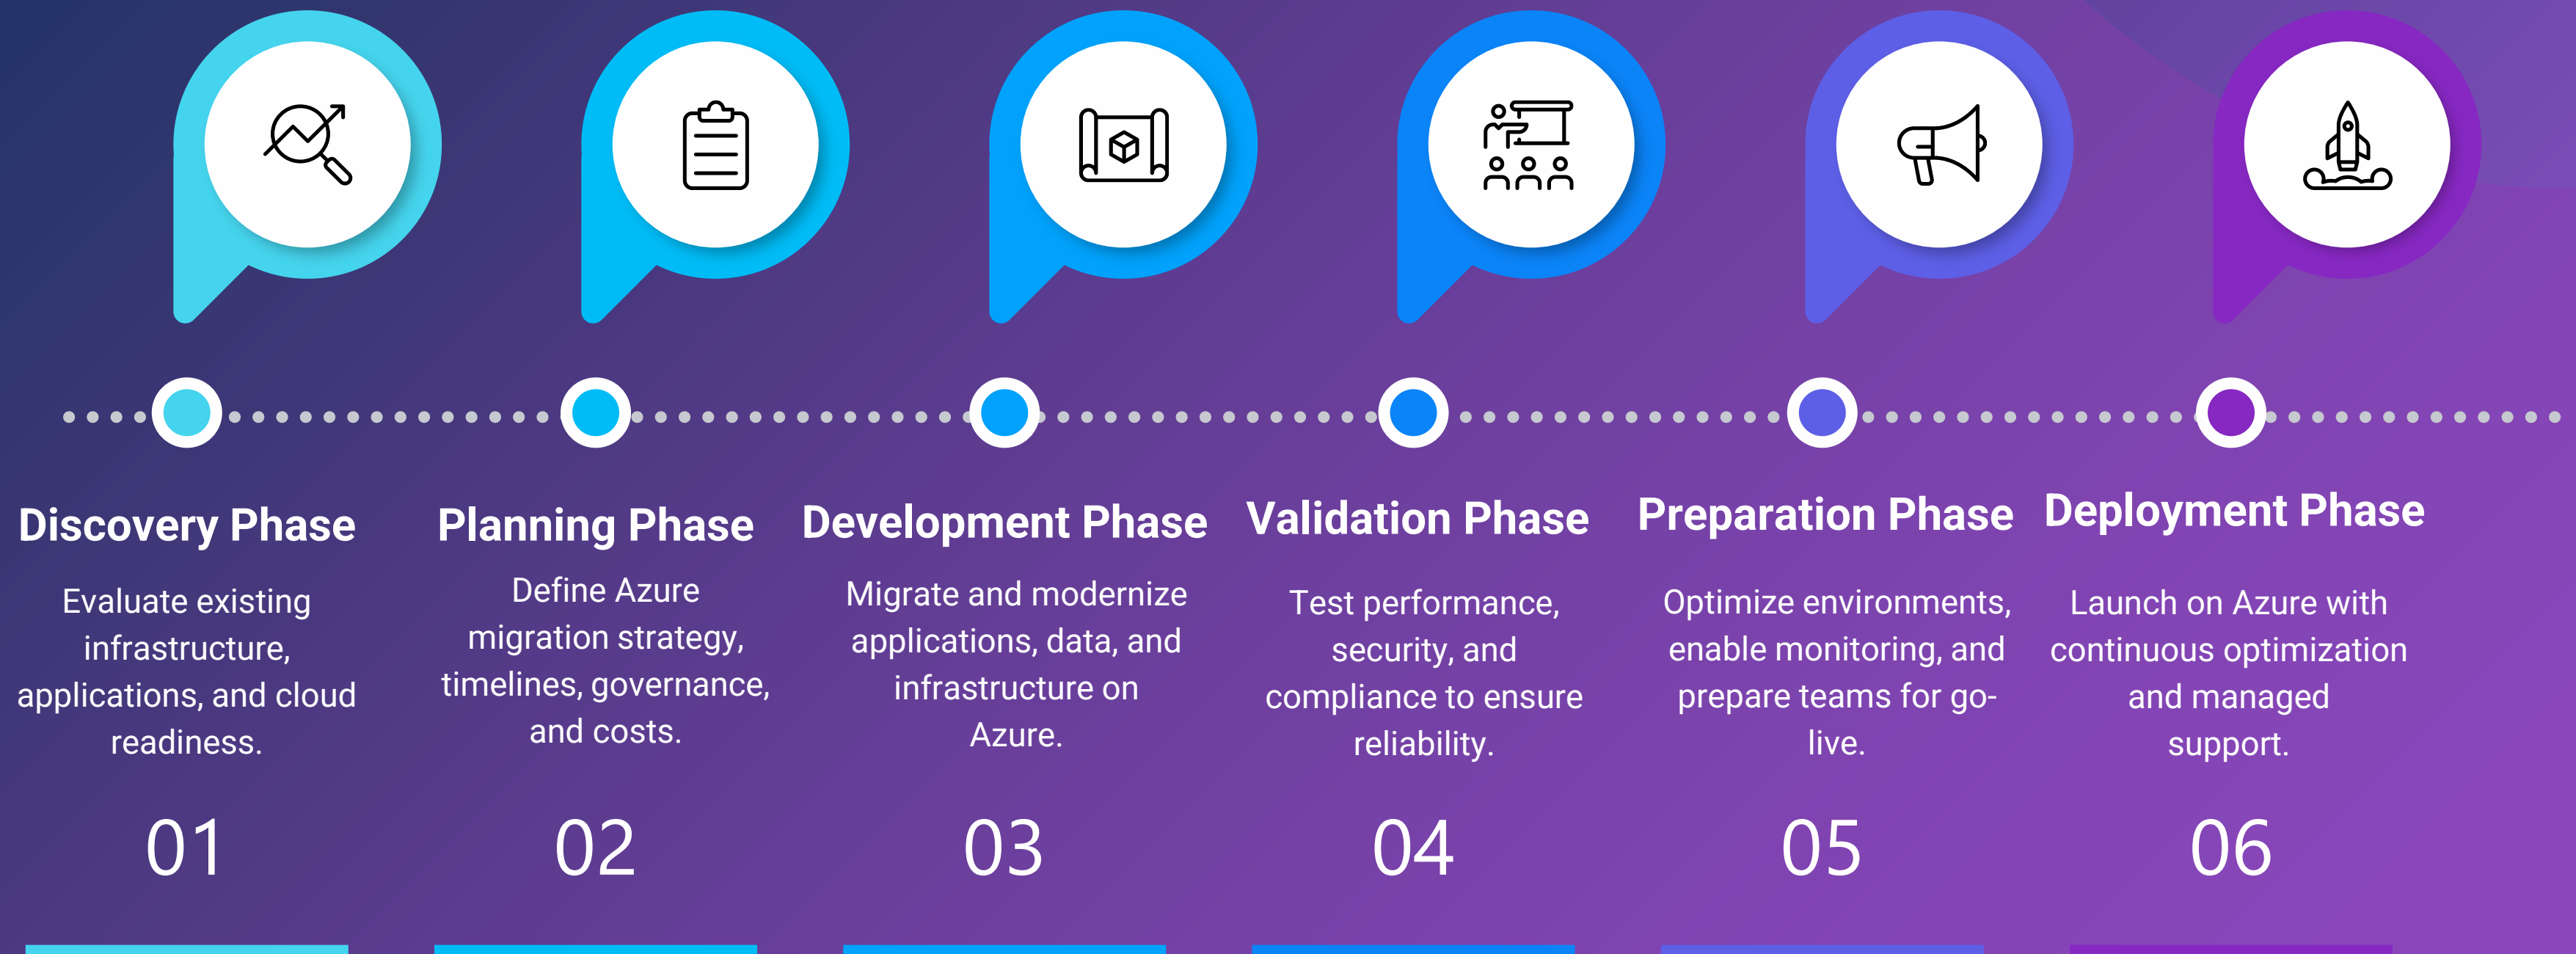

Azure DevOps pipelines automate build, test, and release workflows, enabling frequent, reliable deployments with reduced manual intervention and faster release cycles.

**04**

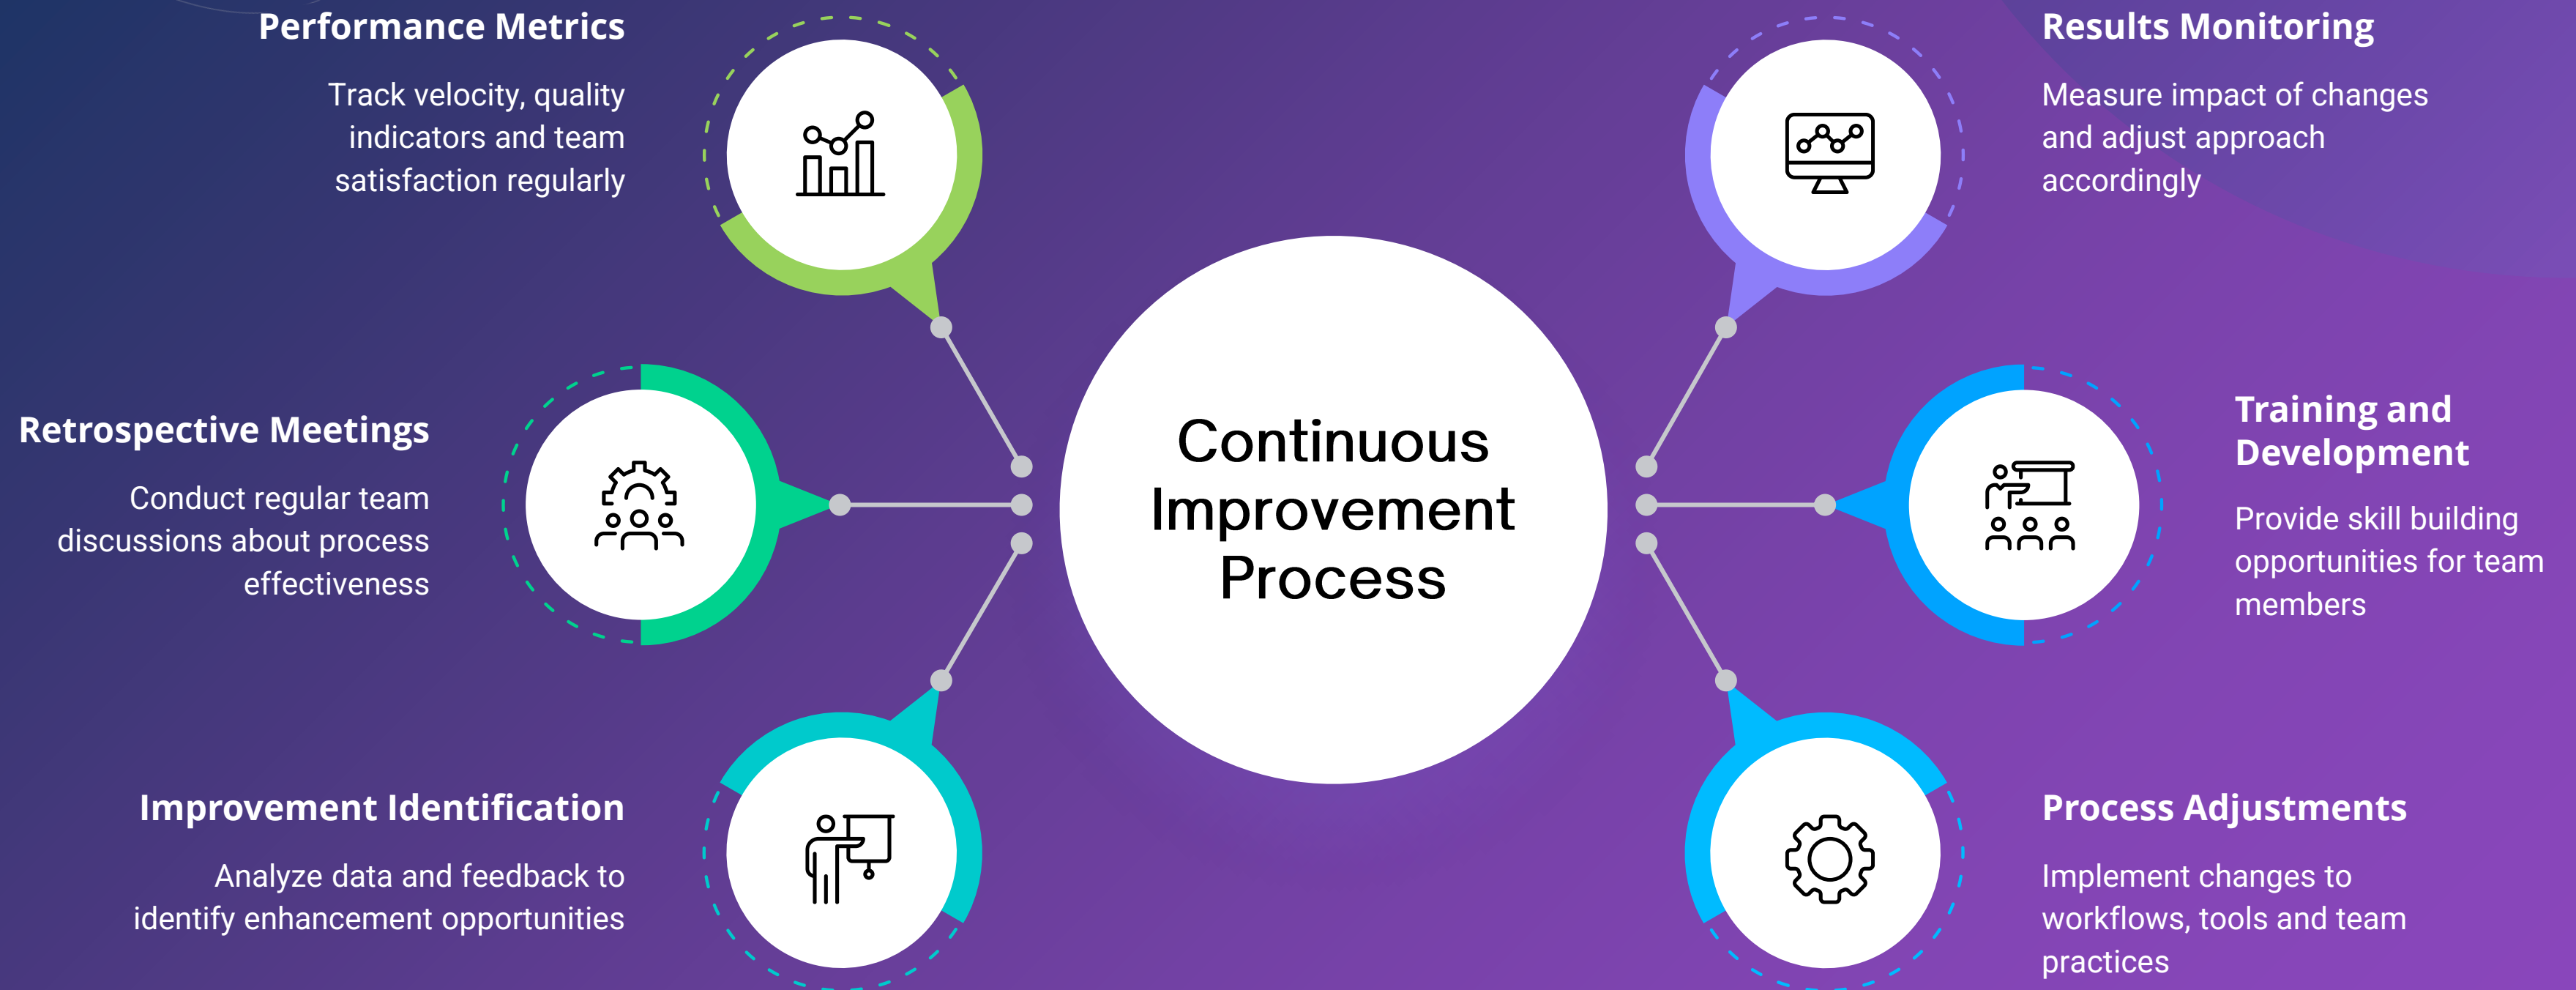

## Monitoring-Led Optimization

Post-deployment, we leverage Azure Monitor, Log Analytics, and Application Insights to proactively track performance, reliability, and cost efficiency for continuous improvement.

# Strategic Product Development Roadmap

# Development Approach

# Our Differentiators

Virgule International, located in the heart of UK and has been serving its key clients for over a decade now. Our strong delivery model and customer focus is a key differentiator while we continue to engage into new territories with our clientele.

## Partner with purpose

We embed within client ecosystems to understand unspoken cultural nuances, team dynamics, and innovation tolerance

### Industry Expertise

Apply Digital Solutions to IT problems

### Digital Technologies

Latest Technologies. Implemented

### Return on Investments

Making solutions drive growth
