

VIRGULE /
International
...Possibilities to Certainties!

SERVICE DEFINITION
Microsoft SharePoint

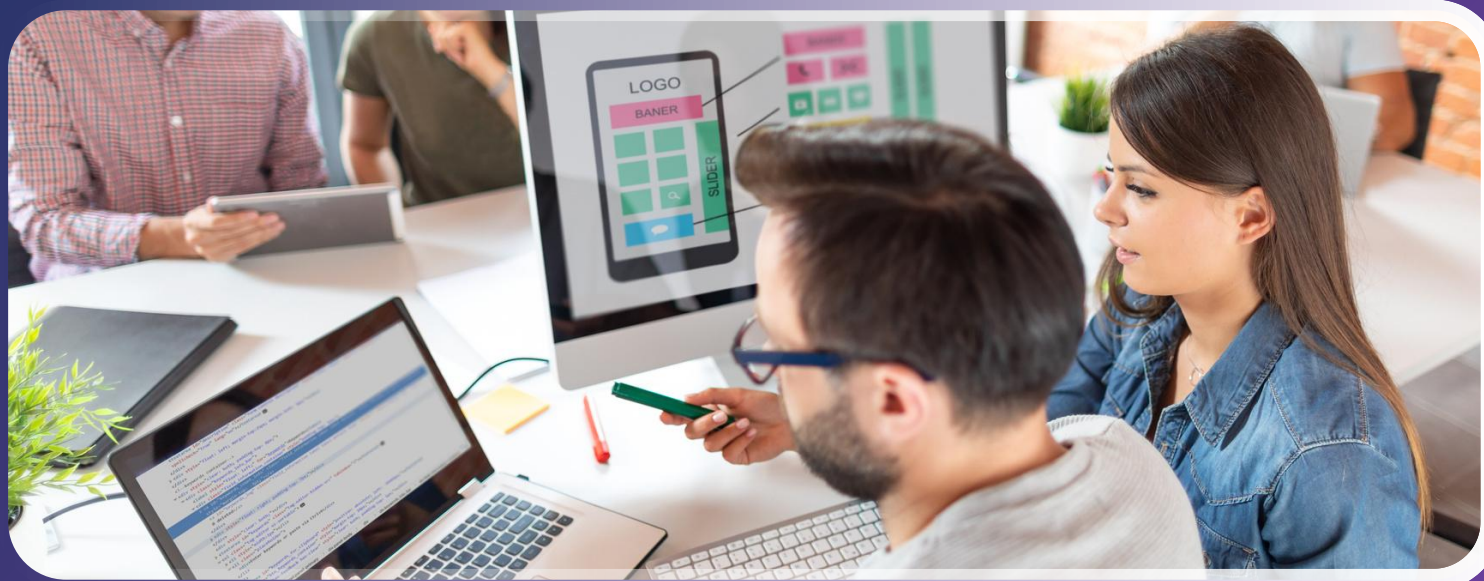

INTRODUCTION

- ✓ VIRGULE implements Microsoft SharePoint to improve storage, sharing, and information leverage.
- ✓ We integrate SharePoint into automated workflows within Office 365, CRM, and ERP.
- ✓ Our solutions include bespoke .NET development, enhancing internal efficiencies and providing cost-effective collaboration platforms for modern businesses.

Services Features

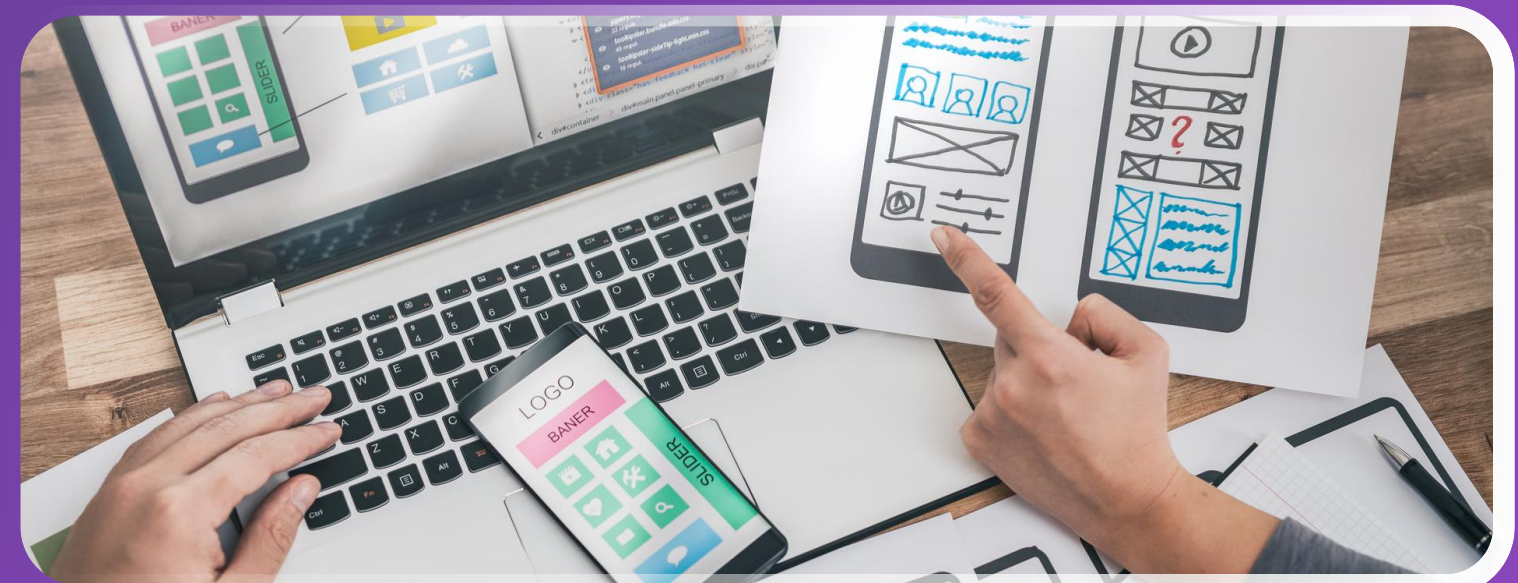

- ✓ Centralised document storage and sharing
- ✓ Integration with Office 365 suite
- ✓ Automated business processes and workflows
- ✓ Seamless connection to CRM and ERP
- ✓ Bespoke .NET application development
- ✓ Secure internal and external collaboration
- ✓ Enterprise-grade content management
- ✓ Customisable intranet and team sites
- ✓ Mobile-friendly access to information
- ✓ Version control and document co-authoring

Service Benefits

- ✓ Improved access to critical information
- ✓ Secure sharing with external partners
- ✓ Scalable platform for content growth
- ✓ Reduced reliance on email attachments
- ✓ Better version control and compliance

- ✓ Tangible improvements in business efficiency
- ✓ Enhanced collaboration across the organisation
- ✓ Streamlined automated business workflows
- ✓ Cost-effective information management solution
- ✓ Seamless integration with existing tools

Approach to Design

Azure-First Architecture

Designing solutions that fully leverage Azure services such as Azure Virtual Machines, App Services, Containers, and PaaS offerings to ensure scalability and long-term flexibility.

Microsoft (CAF) Alignment

Following Microsoft's proven Cloud Adoption Framework to guide planning, readiness, migration, innovation, and governance across the cloud journey.

Business-Centric Solution Planning

Translating business goals into technical roadmaps through close alignment with stakeholders, ensuring measurable outcomes and value-driven cloud design.

Iterative Migration & Deployment Model

Executing phased migrations with continuous validation, reducing risk while enabling faster time-to-value and minimal business disruption.

User Experience–Driven Design

Focusing on performance, accessibility, and usability to ensure cloud applications deliver consistent and intuitive experiences for end users.

Built-In Governance & Security Controls

Integrating identity management, encryption, compliance controls, and monitoring at every design stage to ensure end-to-end security.

Development Approach

01

Cloud Readiness–Driven Execution

We begin by assessing application, data, and infrastructure readiness to define the right Azure migration path rehost, refactor, re-architect, or rebuild ensuring optimal outcomes.

03

Infrastructure as Code (IaC) Enablement

Azure environments are provisioned using ARM templates, Bicep, or Terraform to ensure consistency, repeatability, and faster environment setup across development, test, and production.

02

Continuous Integration & Deployment

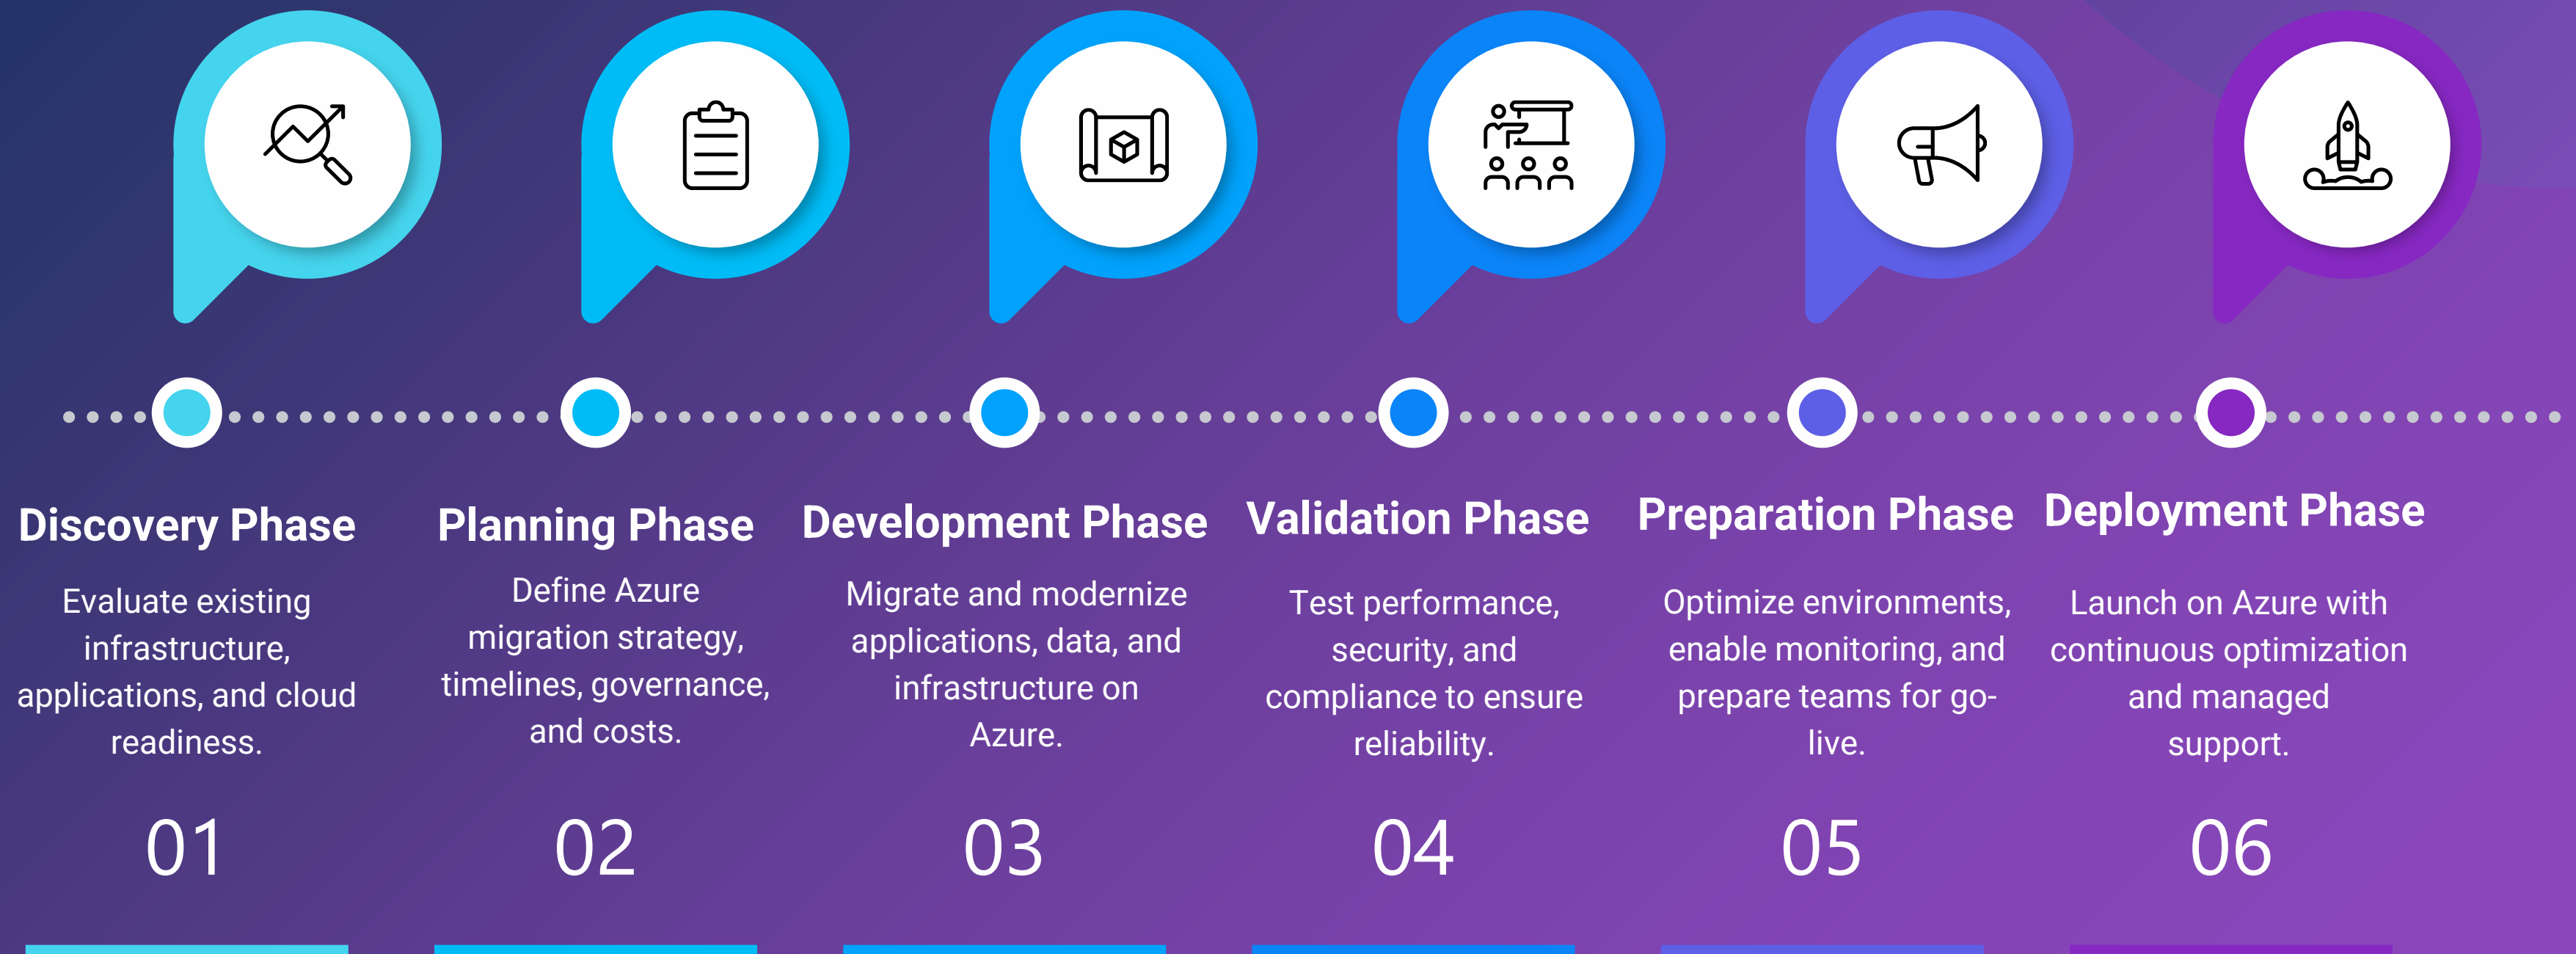

Azure DevOps pipelines automate build, test, and release workflows, enabling frequent, reliable deployments with reduced manual intervention and faster release cycles.

04

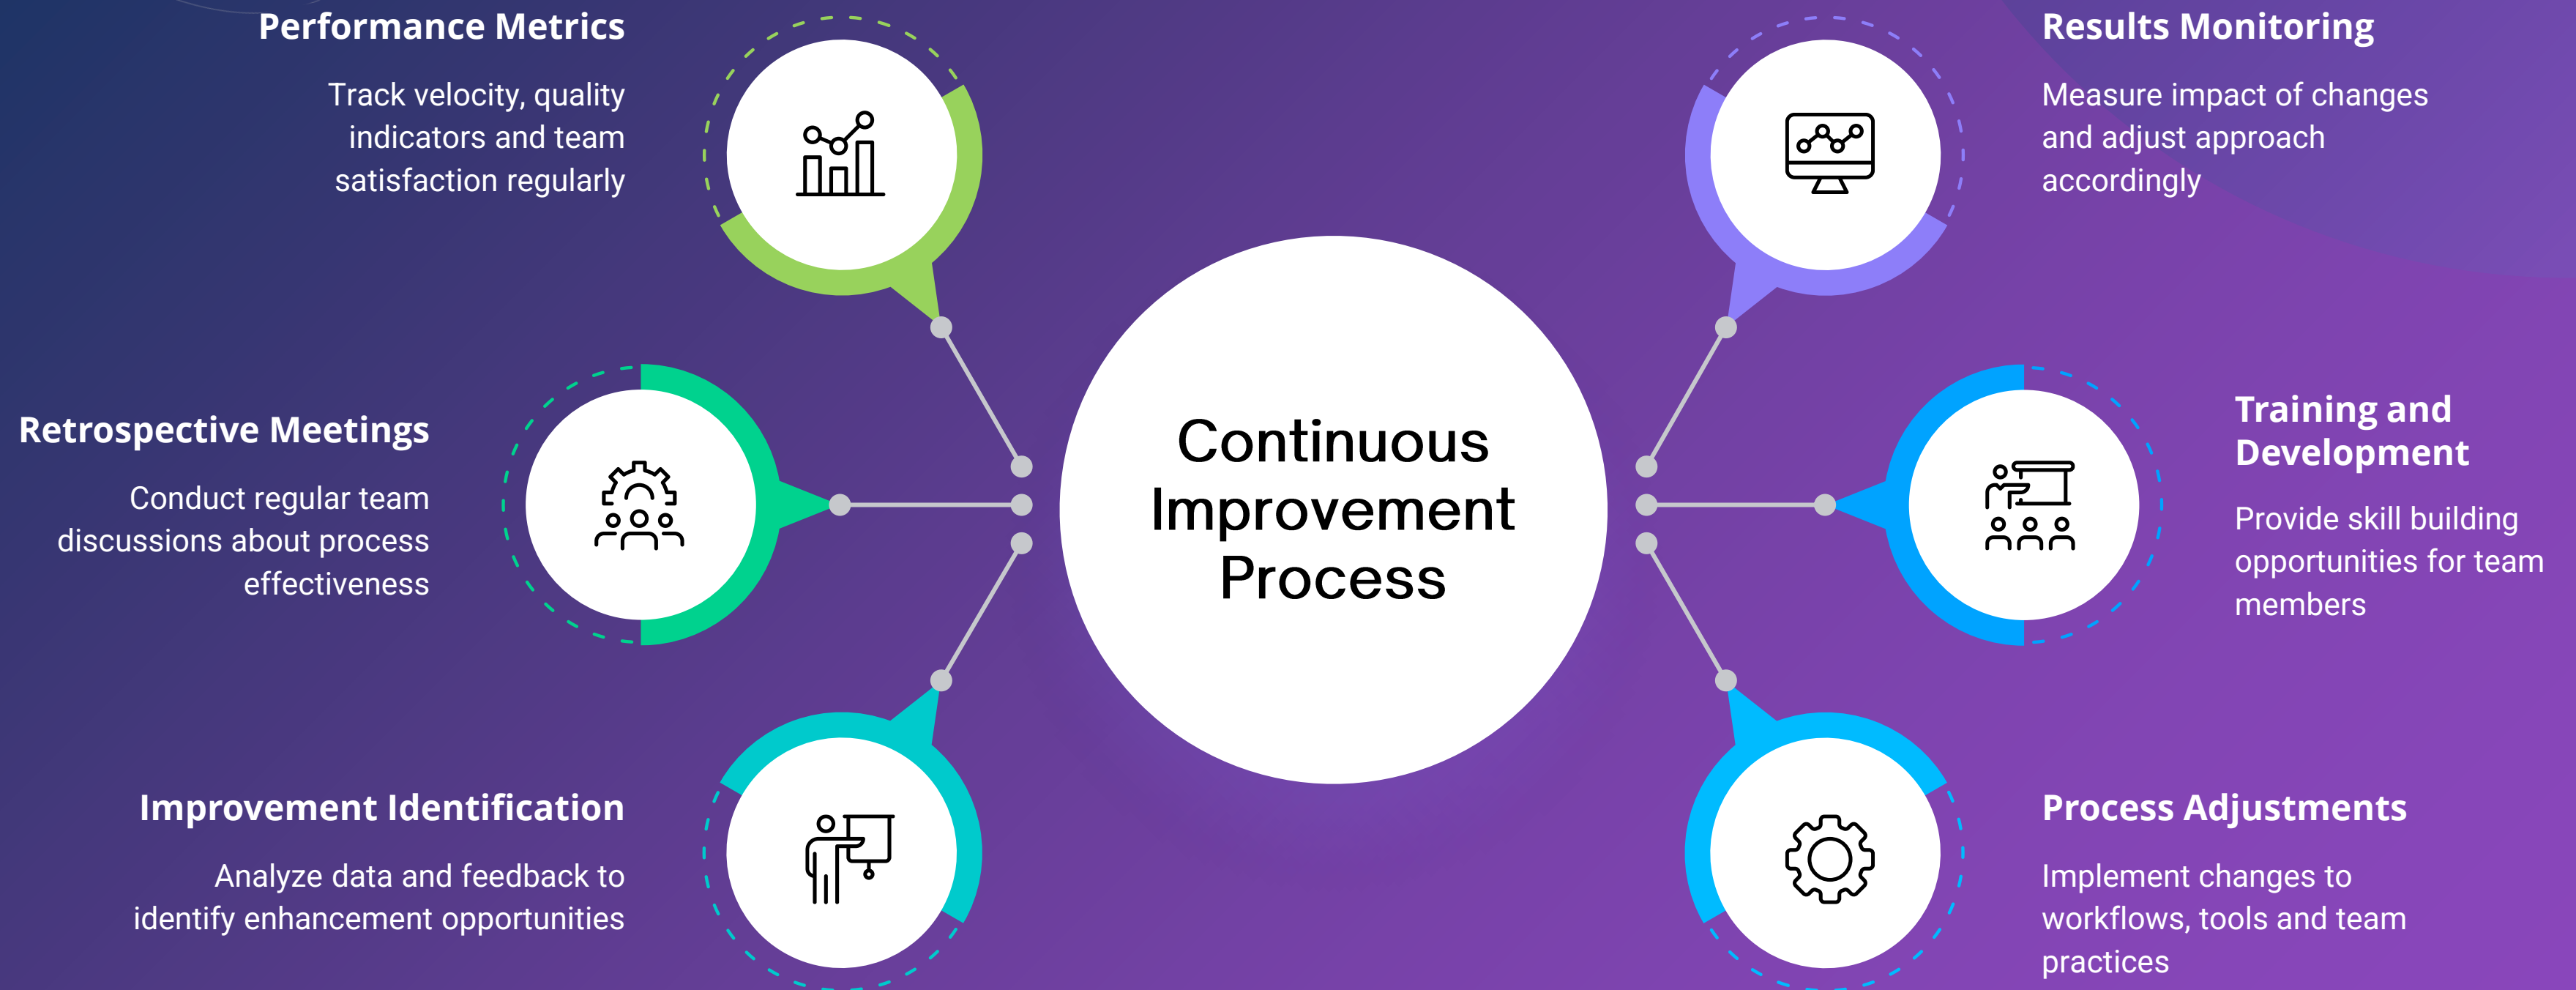

Monitoring-Led Optimization

Post-deployment, we leverage Azure Monitor, Log Analytics, and Application Insights to proactively track performance, reliability, and cost efficiency for continuous improvement.

Strategic Product Development Roadmap

Development Approach

Our Differentiators

Virgule International, located in the heart of UK and has been serving its key clients for over a decade now. Our strong delivery model and customer focus is a key differentiator while we continue to engage into new territories with our clientele.

Partner with purpose

We embed within client ecosystems to understand unspoken cultural nuances, team dynamics, and innovation tolerance

Industry Expertise

Apply Digital Solutions to IT problems
