

VIRGULE /
International
...Possibilities to Certainties!

SERVICE DEFINITION

Microsoft Power Platform

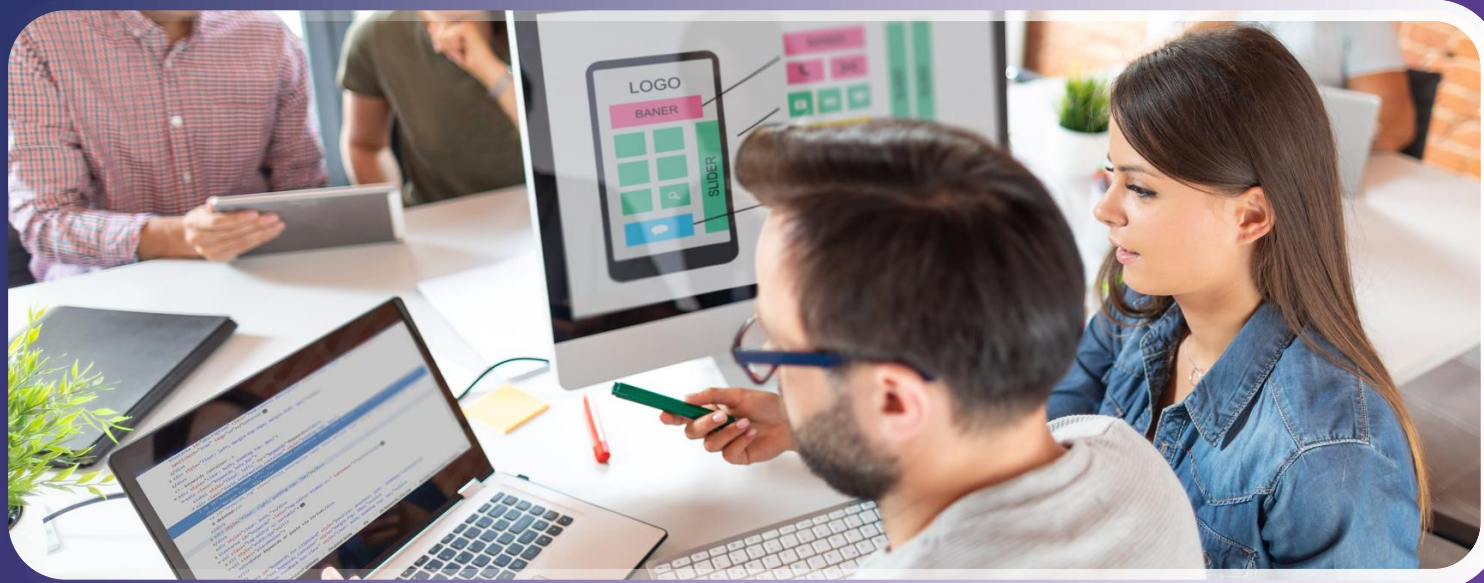

INTRODUCTION

- ✓ VIRGULE empowers businesses with Microsoft Power Platform to maximise data usage.
- ✓ We connect Power BI, Apps, and Automate to Office 365, Dynamics 365, and Azure.
- ✓ Our service enables building custom business solutions, automating processes, and uncovering actionable insights from hundreds of services.

Services Features

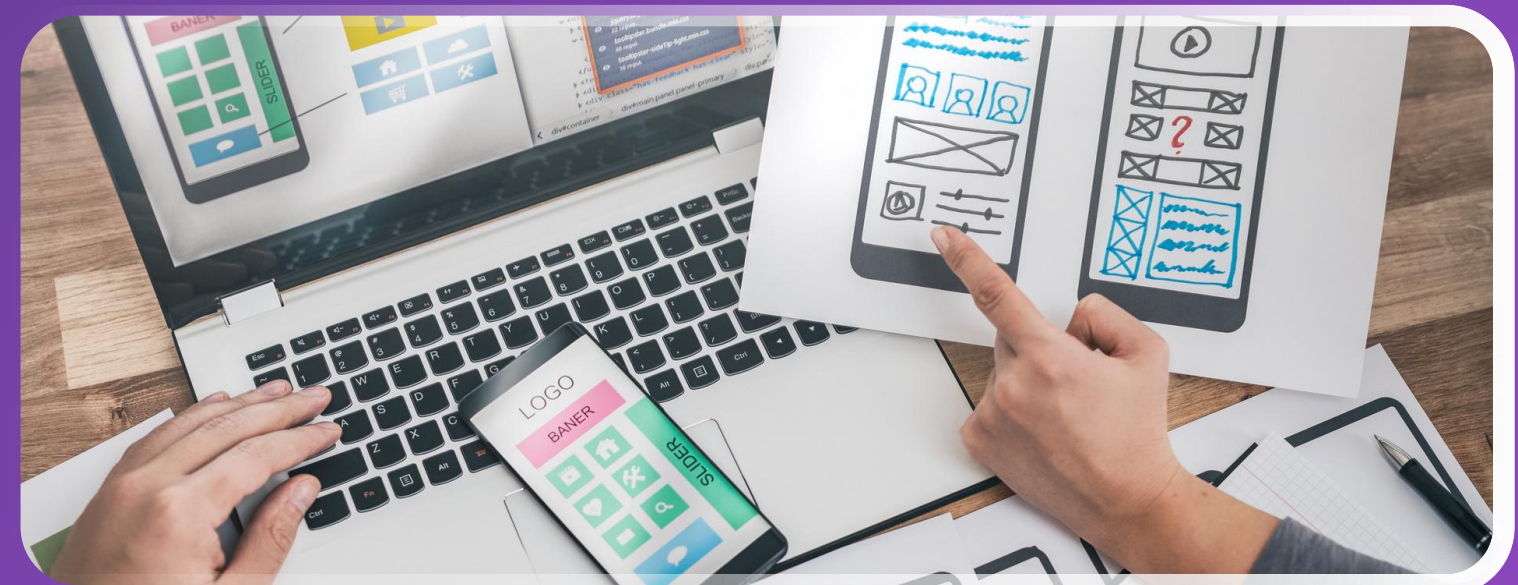

- ✓ Connects data from hundreds of sources and services
- ✓ Build custom business applications quickly
- ✓ Automate processes with Power Automate
- ✓ Data visualisation and analytics with Power BI
- ✓ Integration with Office 365 and Azure
- ✓ Utilises Microsoft Common Data Service
- ✓ Low-code platform for rapid development
- ✓ Mobile-friendly business solutions
- ✓ AI Builder for intelligent automation
- ✓ Secure enterprise-grade governance

Service Benefits

- ✓ Reduced development costs and time
- ✓ Scalable solutions for enterprise needs
- ✓ Empowers non-technical users to build apps
- ✓ Streamlined workflows across applications
- ✓ Real-time visibility of key metrics

- ✓ Uncover hidden insights from existing data
- ✓ Automate manual tasks to save time
- ✓ Rapid development of business solutions
- ✓ Seamless integration with Microsoft tools
- ✓ Enhanced data-driven decision making

Approach to Design

Azure-First Architecture

Designing solutions that fully leverage Azure services such as Azure Virtual Machines, App Services, Containers, and PaaS offerings to ensure scalability and long-term flexibility.

Microsoft (CAF) Alignment

Following Microsoft's proven Cloud Adoption Framework to guide planning, readiness, migration, innovation, and governance across the cloud journey.

Business-Centric Solution Planning

Translating business goals into technical roadmaps through close alignment with stakeholders, ensuring measurable outcomes and value-driven cloud design.

Iterative Migration & Deployment Model

Executing phased migrations with continuous validation, reducing risk while enabling faster time-to-value and minimal business disruption.

User Experience–Driven Design

Focusing on performance, accessibility, and usability to ensure cloud applications deliver consistent and intuitive experiences for end users.

Built-In Governance & Security Controls

Integrating identity management, encryption, compliance controls, and monitoring at every design stage to ensure end-to-end security.

Development Approach

01

Cloud Readiness–Driven Execution

We begin by assessing application, data, and infrastructure readiness to define the right Azure migration path rehost, refactor, re-architect, or rebuild ensuring optimal outcomes.

03

Infrastructure as Code (IaC) Enablement

Azure environments are provisioned using ARM templates, Bicep, or Terraform to ensure consistency, repeatability, and faster environment setup across development, test, and production.

02

Continuous Integration & Deployment

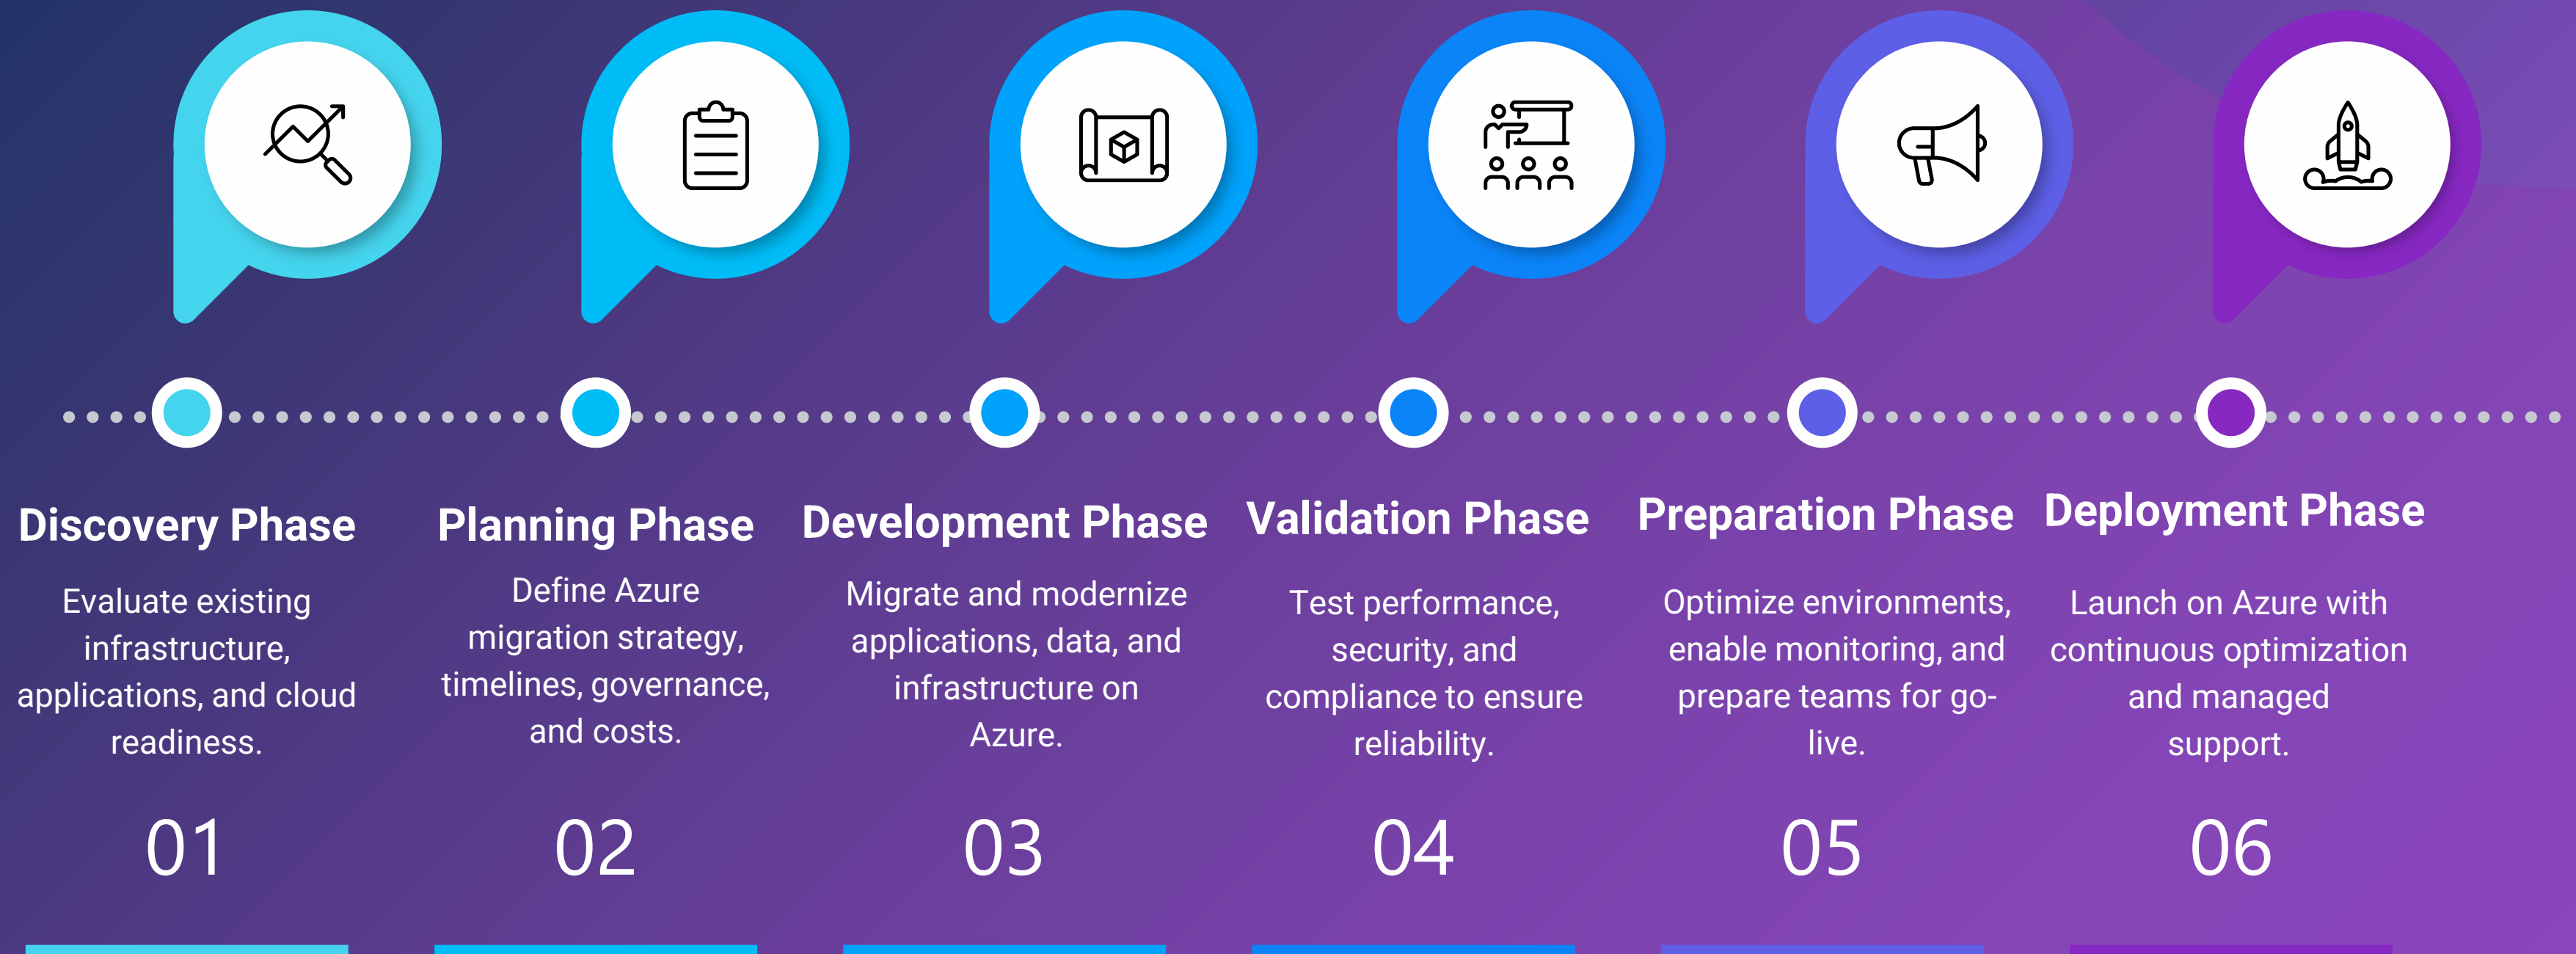

Azure DevOps pipelines automate build, test, and release workflows, enabling frequent, reliable deployments with reduced manual intervention and faster release cycles.

04

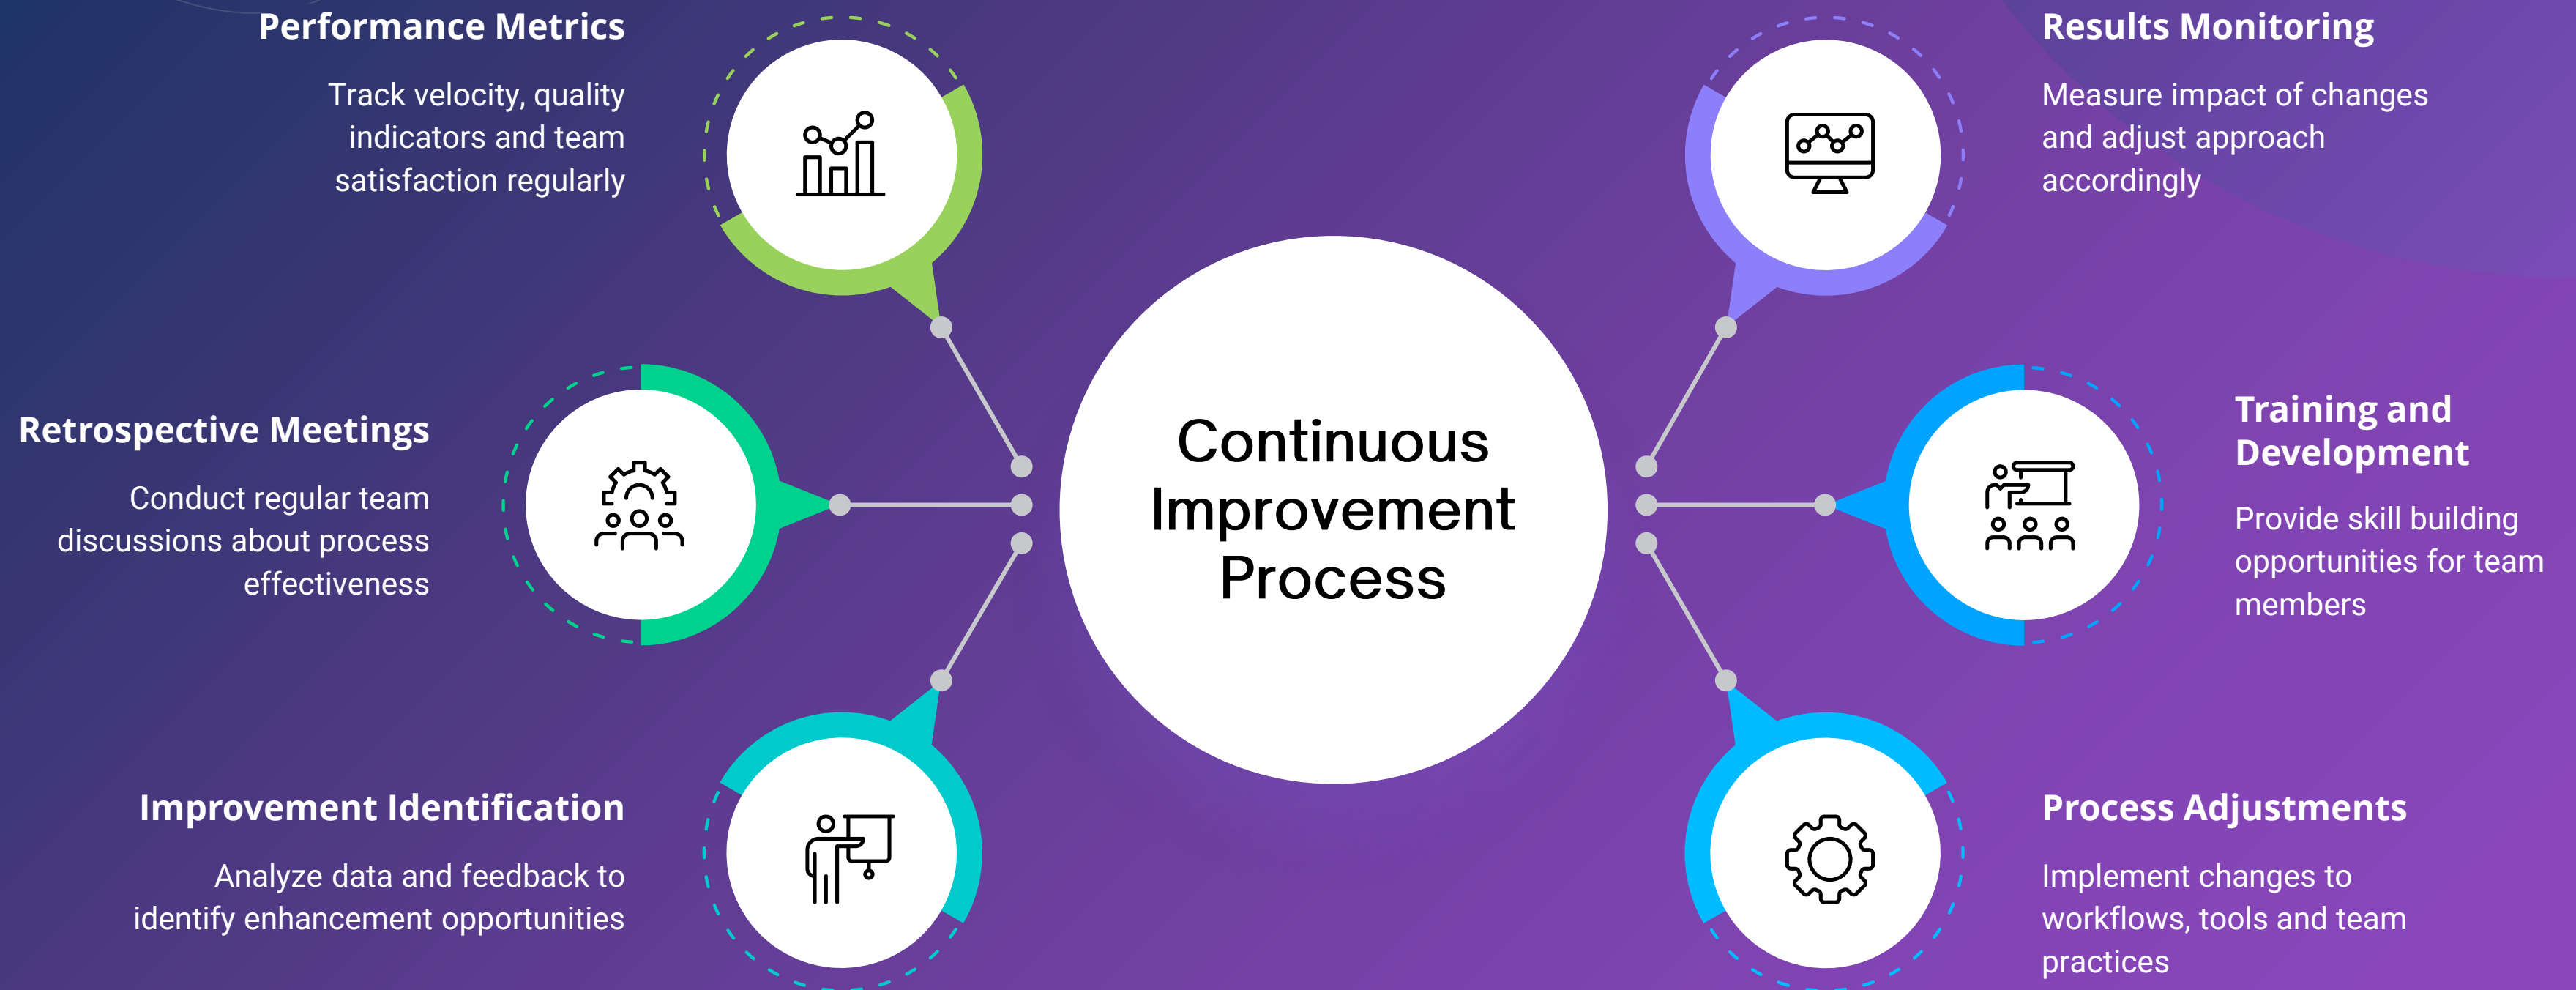

Monitoring-Led Optimization

Post-deployment, we leverage Azure Monitor, Log Analytics, and Application Insights to proactively track performance, reliability, and cost efficiency for continuous improvement.

Strategic Product Development Roadmap

Development Approach

Our Differentiators

Virgule International, located in the heart of UK and has been serving its key clients for over a decade now. Our strong delivery model and customer focus is a key differentiator while we continue to engage into new territories with our clientele.

Partner with purpose

We embed within client ecosystems to understand unspoken cultural nuances, team dynamics, and innovation tolerance

Industry Expertise

Apply Digital Solutions to IT problems

Digital Technologies

Latest Technologies. Implemented

Return on Investments
