

SERVICE DEFINITION

Microsoft Dynamics Business Central

D365 Business Central

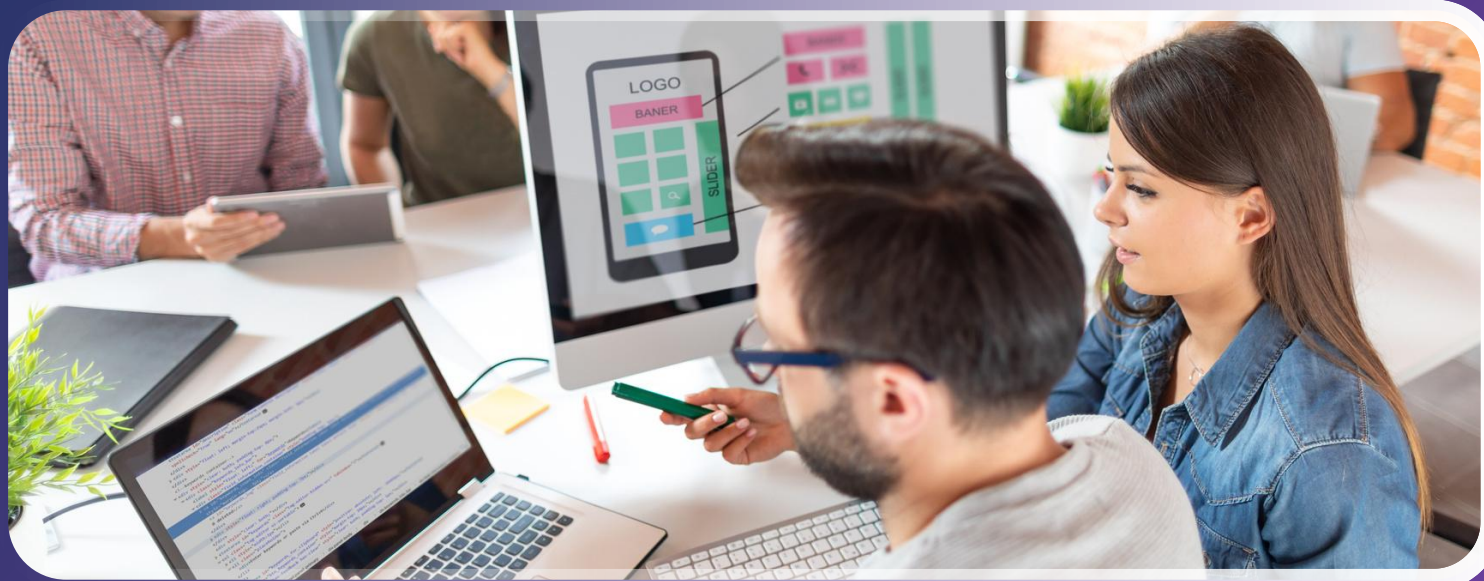

INTRODUCTION

- ✓ VIRGULE delivers Microsoft Dynamics 365 Business Central, a cloud-based all-in-one management solution.
- ✓ We help upgrade legacy ERP systems to a single platform for finance, operations, sales, and service.
- ✓ Our solution connects businesses, automates workflows, and provides actionable insights using AI and analytics.

Services Features

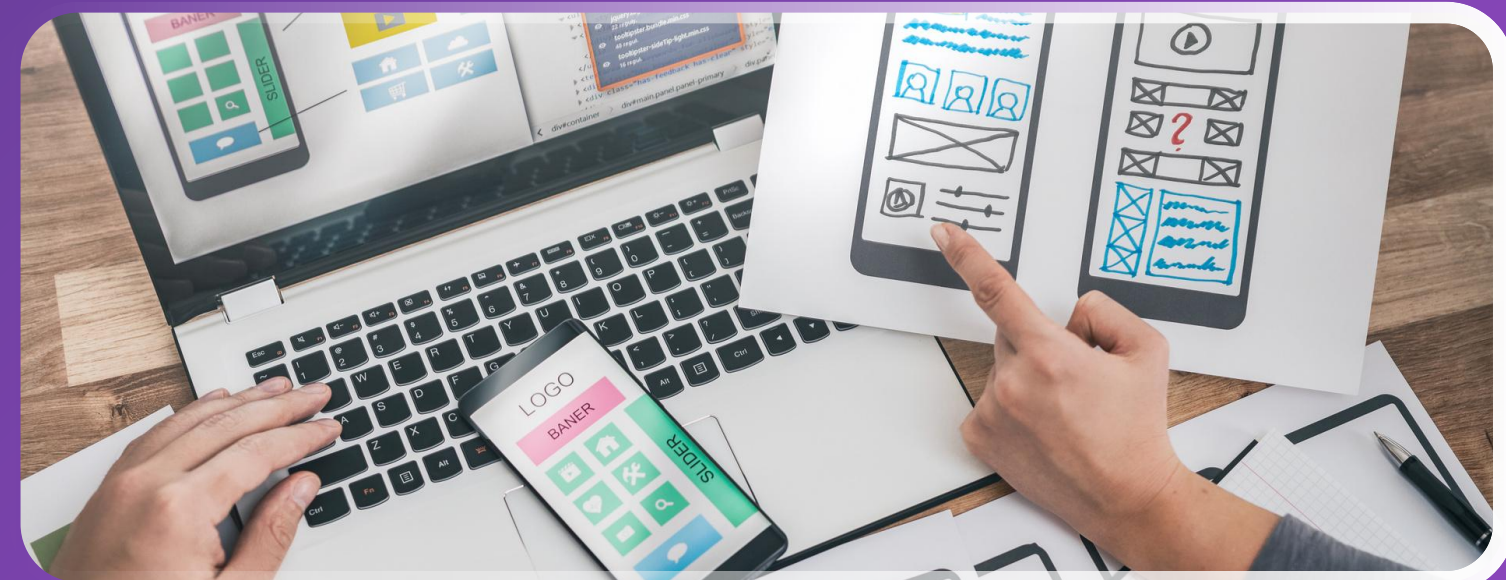

- ✓ All-in-one business management solution for SMEs
- ✓ Cloud-based finance and operations platform
- ✓ Automated tasks and business workflows
- ✓ Integration with Outlook, Word, and Excel
- ✓ AI-driven actionable insights and analytics
- ✓ Comprehensive sales and service management tools
- ✓ Real-time business performance visibility
- ✓ Scalable platform for evolving business needs
- ✓ Mobile access for remote workforce productivity
- ✓ Seamless upgrade path from legacy ERP
- ✓ Connected data across all departments

Service Benefits

- ✓ Real-time data facilitates better decision making
- ✓ Streamlined financial and operational processes
- ✓ Cloud-based flexibility and remote accessibility
- ✓ Reduced IT maintenance costs vs legacy systems
- ✓ Enhanced collaboration across teams

- ✓ Eliminates business silos for greater efficiency
- ✓ Boosts productivity with automated workflows
- ✓ Complete view of business performance in real-time
- ✓ Scales easily with business growth
- ✓ Familiar Microsoft interface reduces training time

Approach to Design

Azure-First Architecture

Designing solutions that fully leverage Azure services such as Azure Virtual Machines, App Services, Containers, and PaaS offerings to ensure scalability and long-term flexibility.

Microsoft (CAF) Alignment

Following Microsoft's proven Cloud Adoption Framework to guide planning, readiness, migration, innovation, and governance across the cloud journey.

Business-Centric Solution Planning

Translating business goals into technical roadmaps through close alignment with stakeholders, ensuring measurable outcomes and value-driven cloud design.

Iterative Migration & Deployment Model

Executing phased migrations with continuous validation, reducing risk while enabling faster time-to-value and minimal business disruption.

User Experience–Driven Design

Focusing on performance, accessibility, and usability to ensure cloud applications deliver consistent and intuitive experiences for end users.

Built-In Governance & Security Controls

Integrating identity management, encryption, compliance controls, and monitoring at every design stage to ensure end-to-end security.

Development Approach

01

Cloud Readiness–Driven Execution

We begin by assessing application, data, and infrastructure readiness to define the right Azure migration path rehost, refactor, re-architect, or rebuild ensuring optimal outcomes.

03

Infrastructure as Code (IaC) Enablement

Azure environments are provisioned using ARM templates, Bicep, or Terraform to ensure consistency, repeatability, and faster environment setup across development, test, and production.

02

Continuous Integration & Deployment

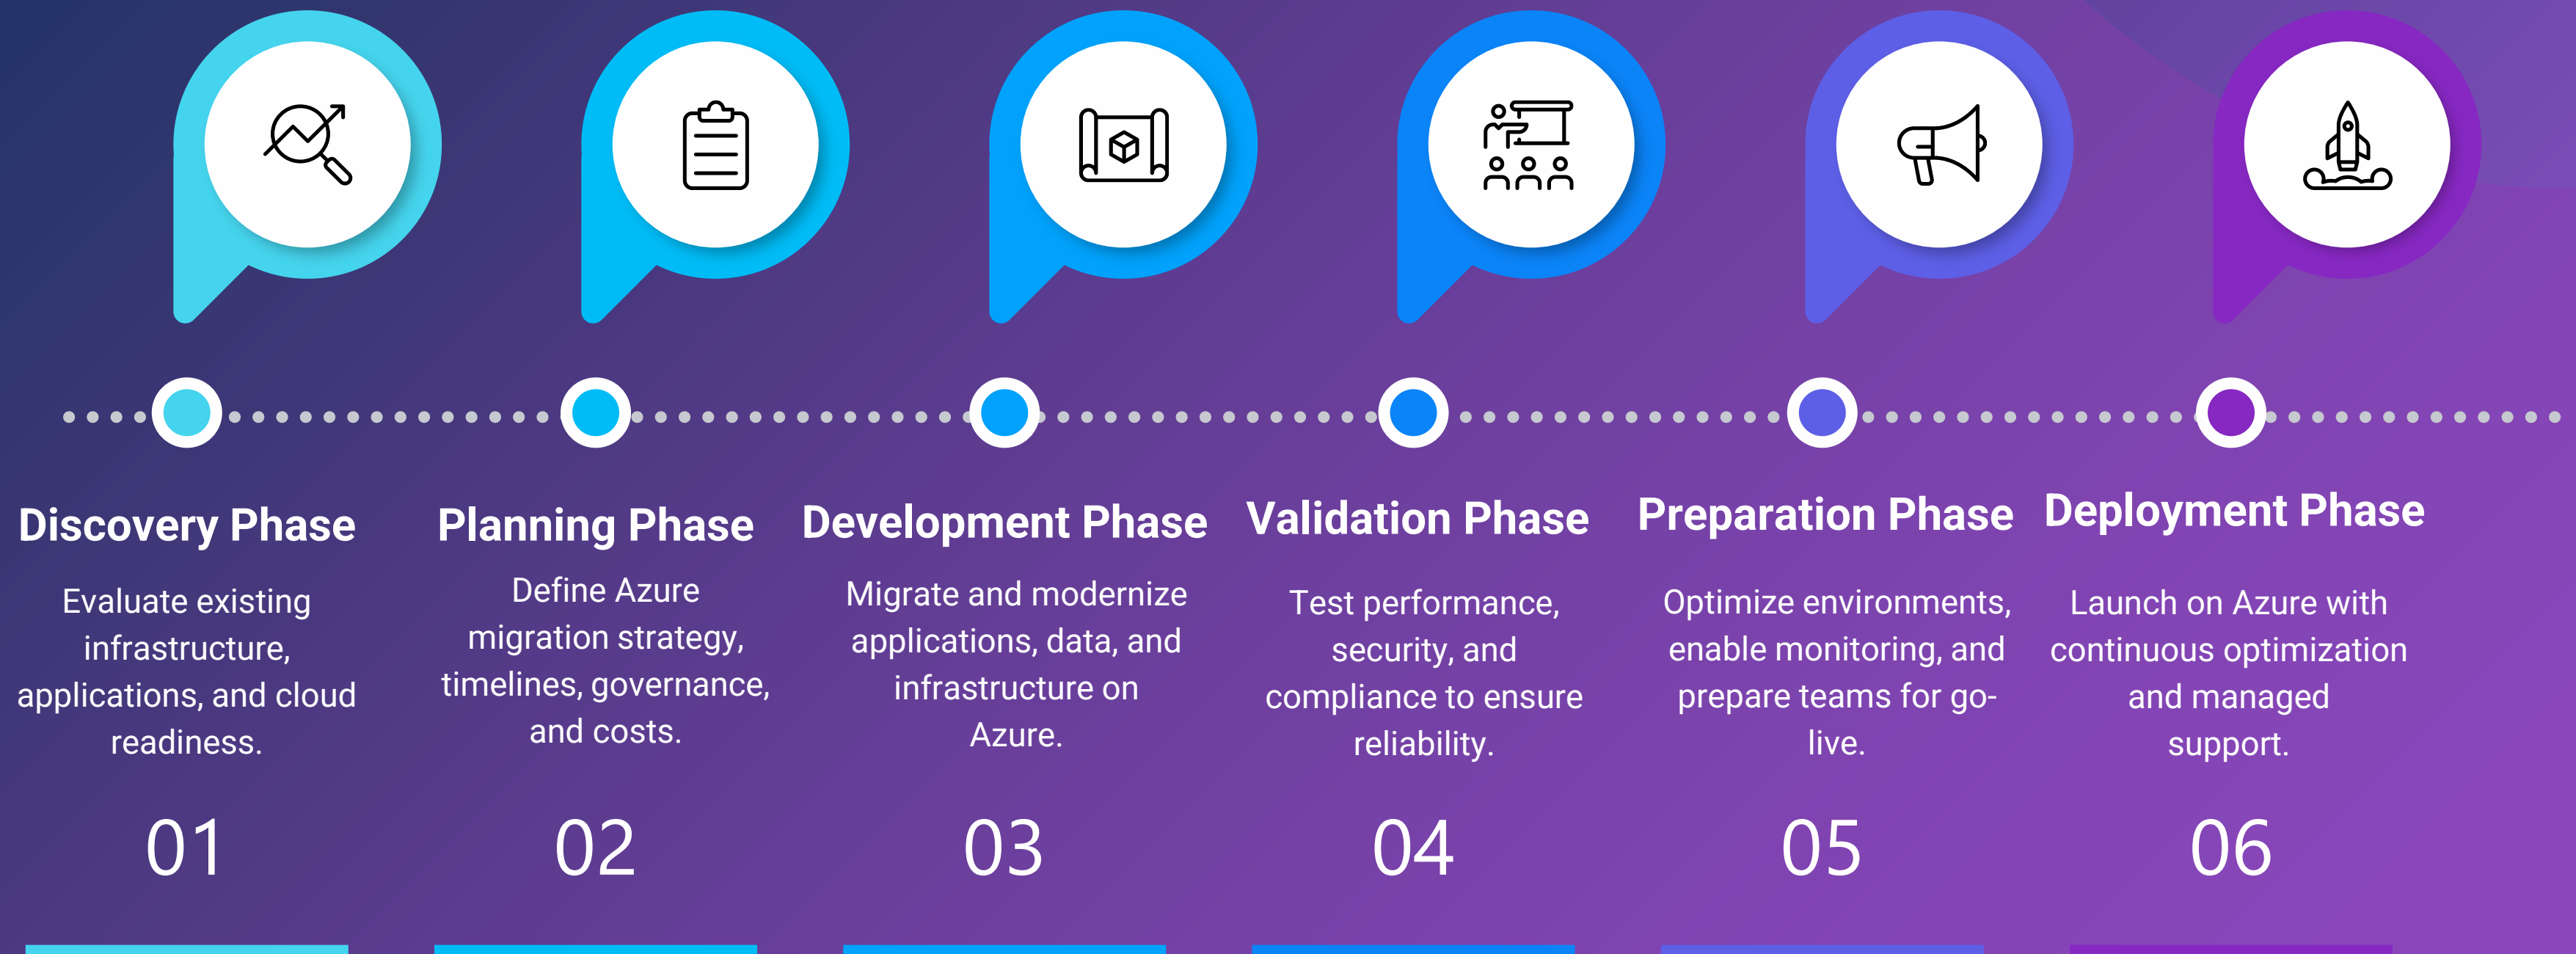

Azure DevOps pipelines automate build, test, and release workflows, enabling frequent, reliable deployments with reduced manual intervention and faster release cycles.

04

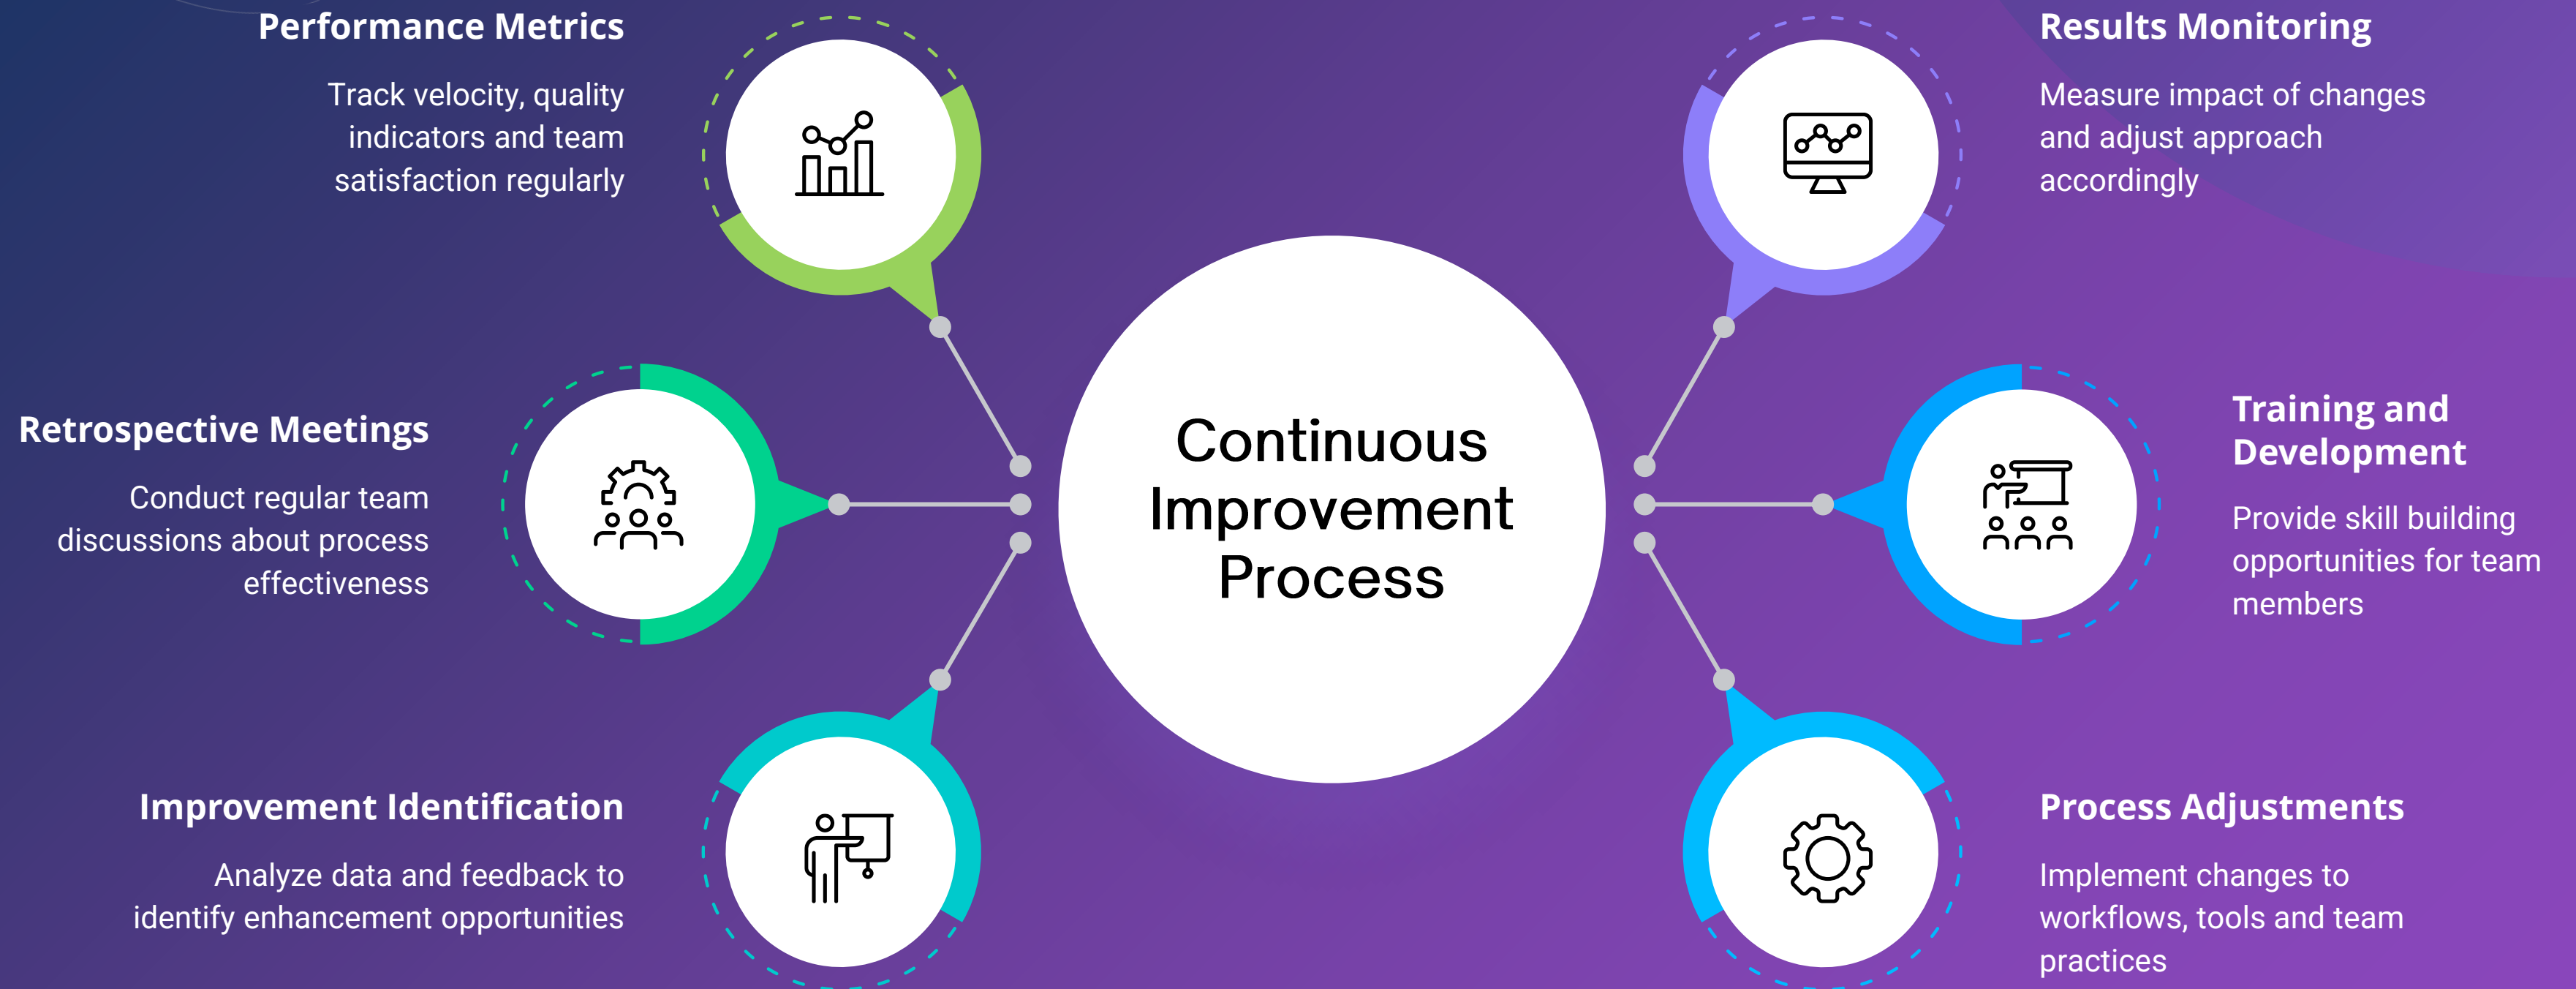

Monitoring-Led Optimization

Post-deployment, we leverage Azure Monitor, Log Analytics, and Application Insights to proactively track performance, reliability, and cost efficiency for continuous improvement.

Strategic Product Development Roadmap

Development Approach

Our Differentiators

Virgule International, located in the heart of UK and has been serving its key clients for over a decade now. Our strong delivery model and customer focus is a key differentiator while we continue to engage into new territories with our clientele.

Partner with purpose

We embed within client ecosystems to understand unspoken cultural nuances, team dynamics, and innovation tolerance

Industry Expertise
