

SERVICE DEFINITION

Microsoft Power Platform Services

Introduction

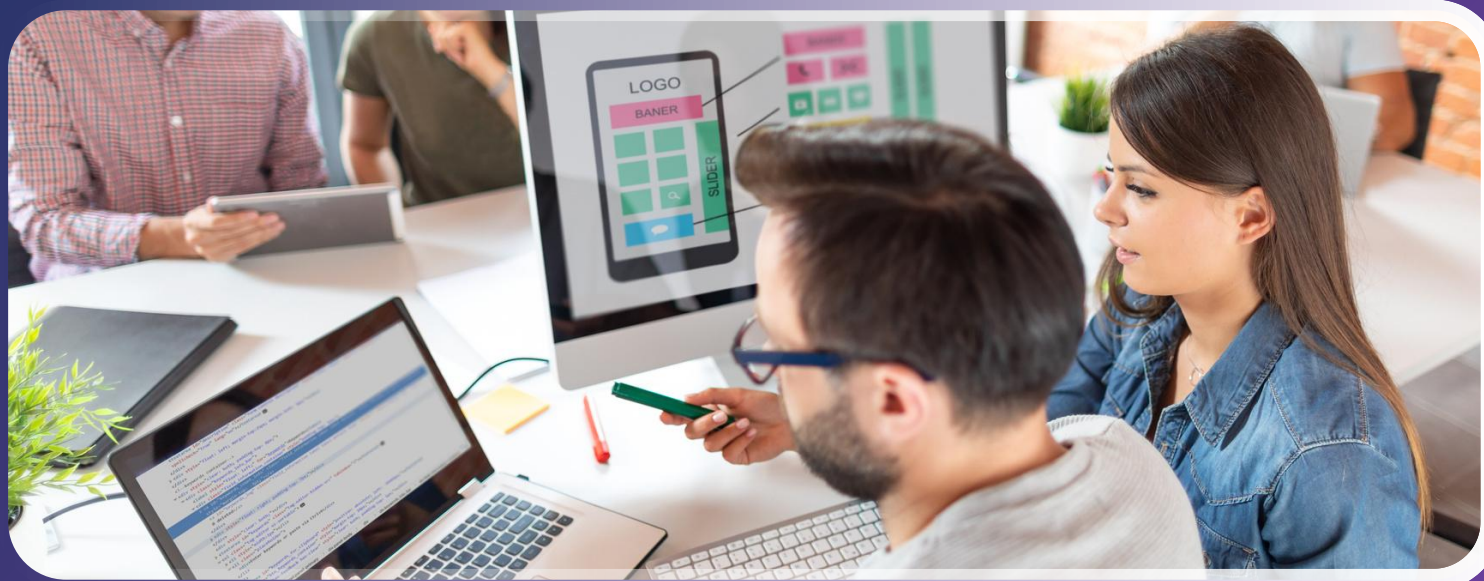

- ✓ Empower your organization with end-to-end Microsoft Power Platform services designed to accelerate automation, enhance productivity, and drive digital transformation with low-code innovation.
- ✓ From solution design to deployment and continuous optimization, we deliver secure, scalable, and high-performance applications tailored to evolving business requirements.
- ✓ We offer robust low-code solutions on Microsoft Power Platform that enhance business value with less risk, cost, and faster production times.
- ✓ Our capabilities include expert-led development, governed citizen development, reusable accelerators, IP-driven frameworks, and support from our Centre of Excellence to streamline and standardize platform adoption.

Services Features

- ✓ Financial and budget management automation
- ✓ Multi-company and business unit support
- ✓ Supplier payment scheduling and complex workflow automation
- ✓ Data validation via integrations (HMRC, CH, Experian)
- ✓ Secure 3rd-party integration through open APIs
- ✓ Productivity and insights using O365 + Power BI
- ✓ Invoice scanning and OCR using AI Builder
- ✓ Supplier onboarding workflows

Service Benefits

Accelerated solution delivery, reusable components and best-practice development methodologies.

Ensure high data quality through validation, standardized inputs, and automated checks.

Faster time-to-market via automation, DevOps, and continuous deployment pipelines.

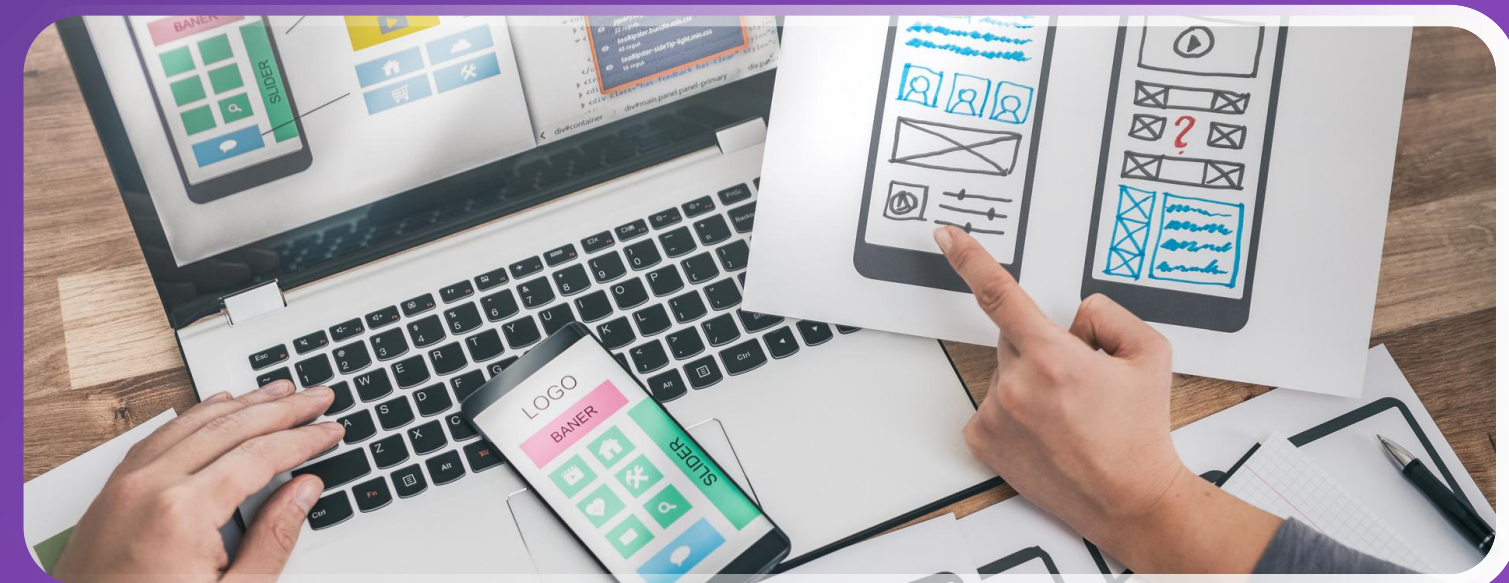

Strengthen security and compliance using Microsoft's enterprise-grade governance framework.

Unlock actionable insights with real-time analytics and Power BI dashboards.

Stay future-ready with continuous platform updates and evolving low-code capabilities.

Approach to Design

Discovery & Requirements Analysis

Assess business processes, user needs, data flows, and automation opportunities to define clear solution objectives.

Solution Architecture & Platform Design

Design a scalable, secure architecture leveraging Power Apps, Power Automate, Power BI, Dataverse, and required integrations.

Configuration & Custom Development

Build and configure apps, workflows, data models, and business rules tailored to organizational processes.

Agile & Iterative Delivery

Deliver solutions in short cycles with continuous feedback, rapid prototyping, and early user validation.

Quality Assurance & Deployment

Conduct functional, integration, and security testing, followed by controlled deployment using DevOps and governance practices.

Training & Continuous Improvement

Enable users through training and support, monitor usage and performance, and refine the solution for ongoing optimization.

Development Approach

01

Business-Aligned Development

The approach focuses on aligning technical decisions with organizational goals and delivering measurable business value every iteration.

03

Quality and Testing

Automated unit, integration, and end-to-end testing with quality gates ensure high code quality and minimize errors before deployment.

02

Modern Engineering Practices

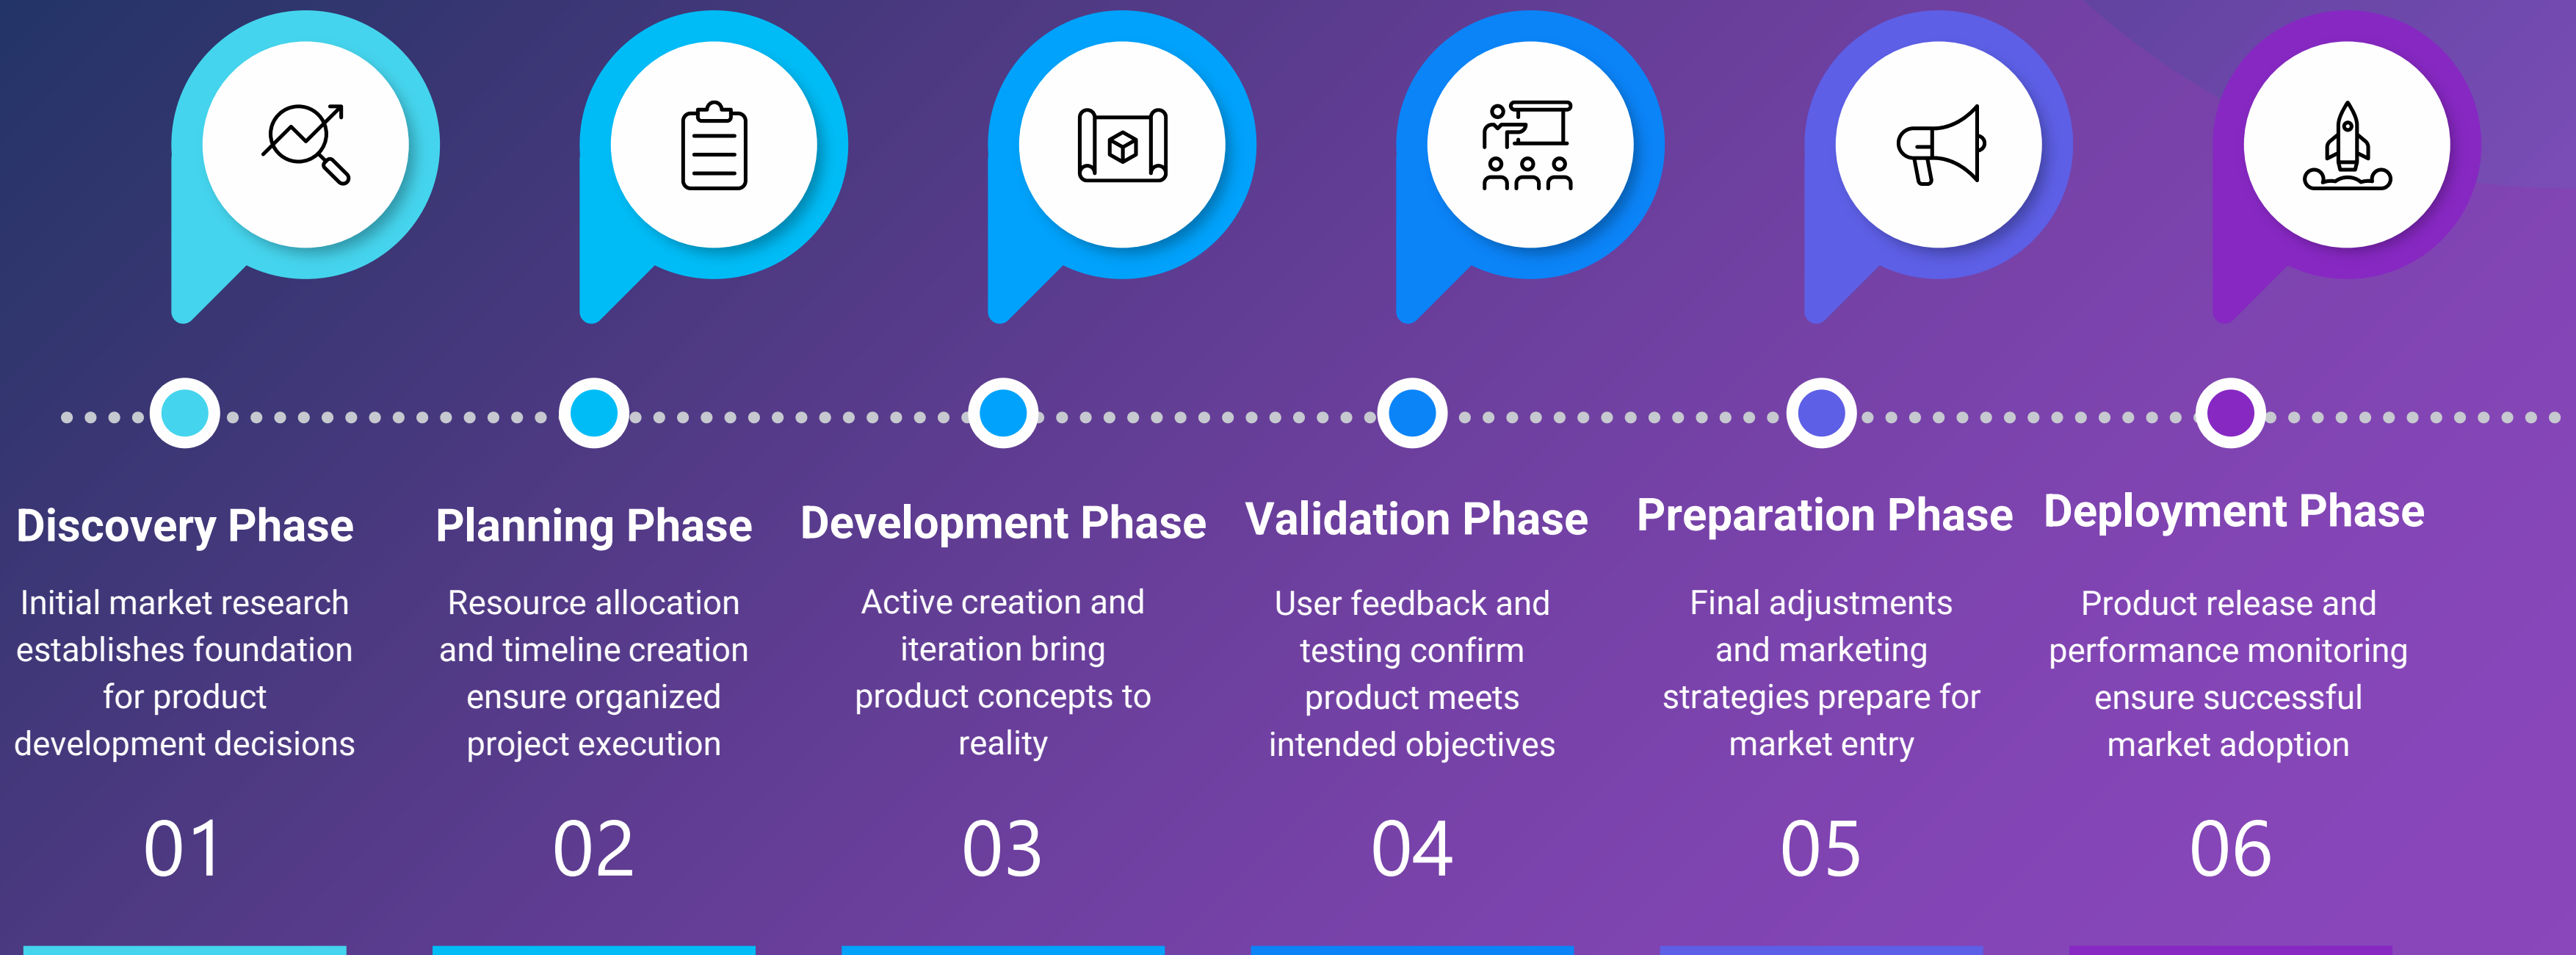

Incorporates Domain-Driven Design, incremental delivery, and continuous deployment to build scalable and robust software solutions.

04

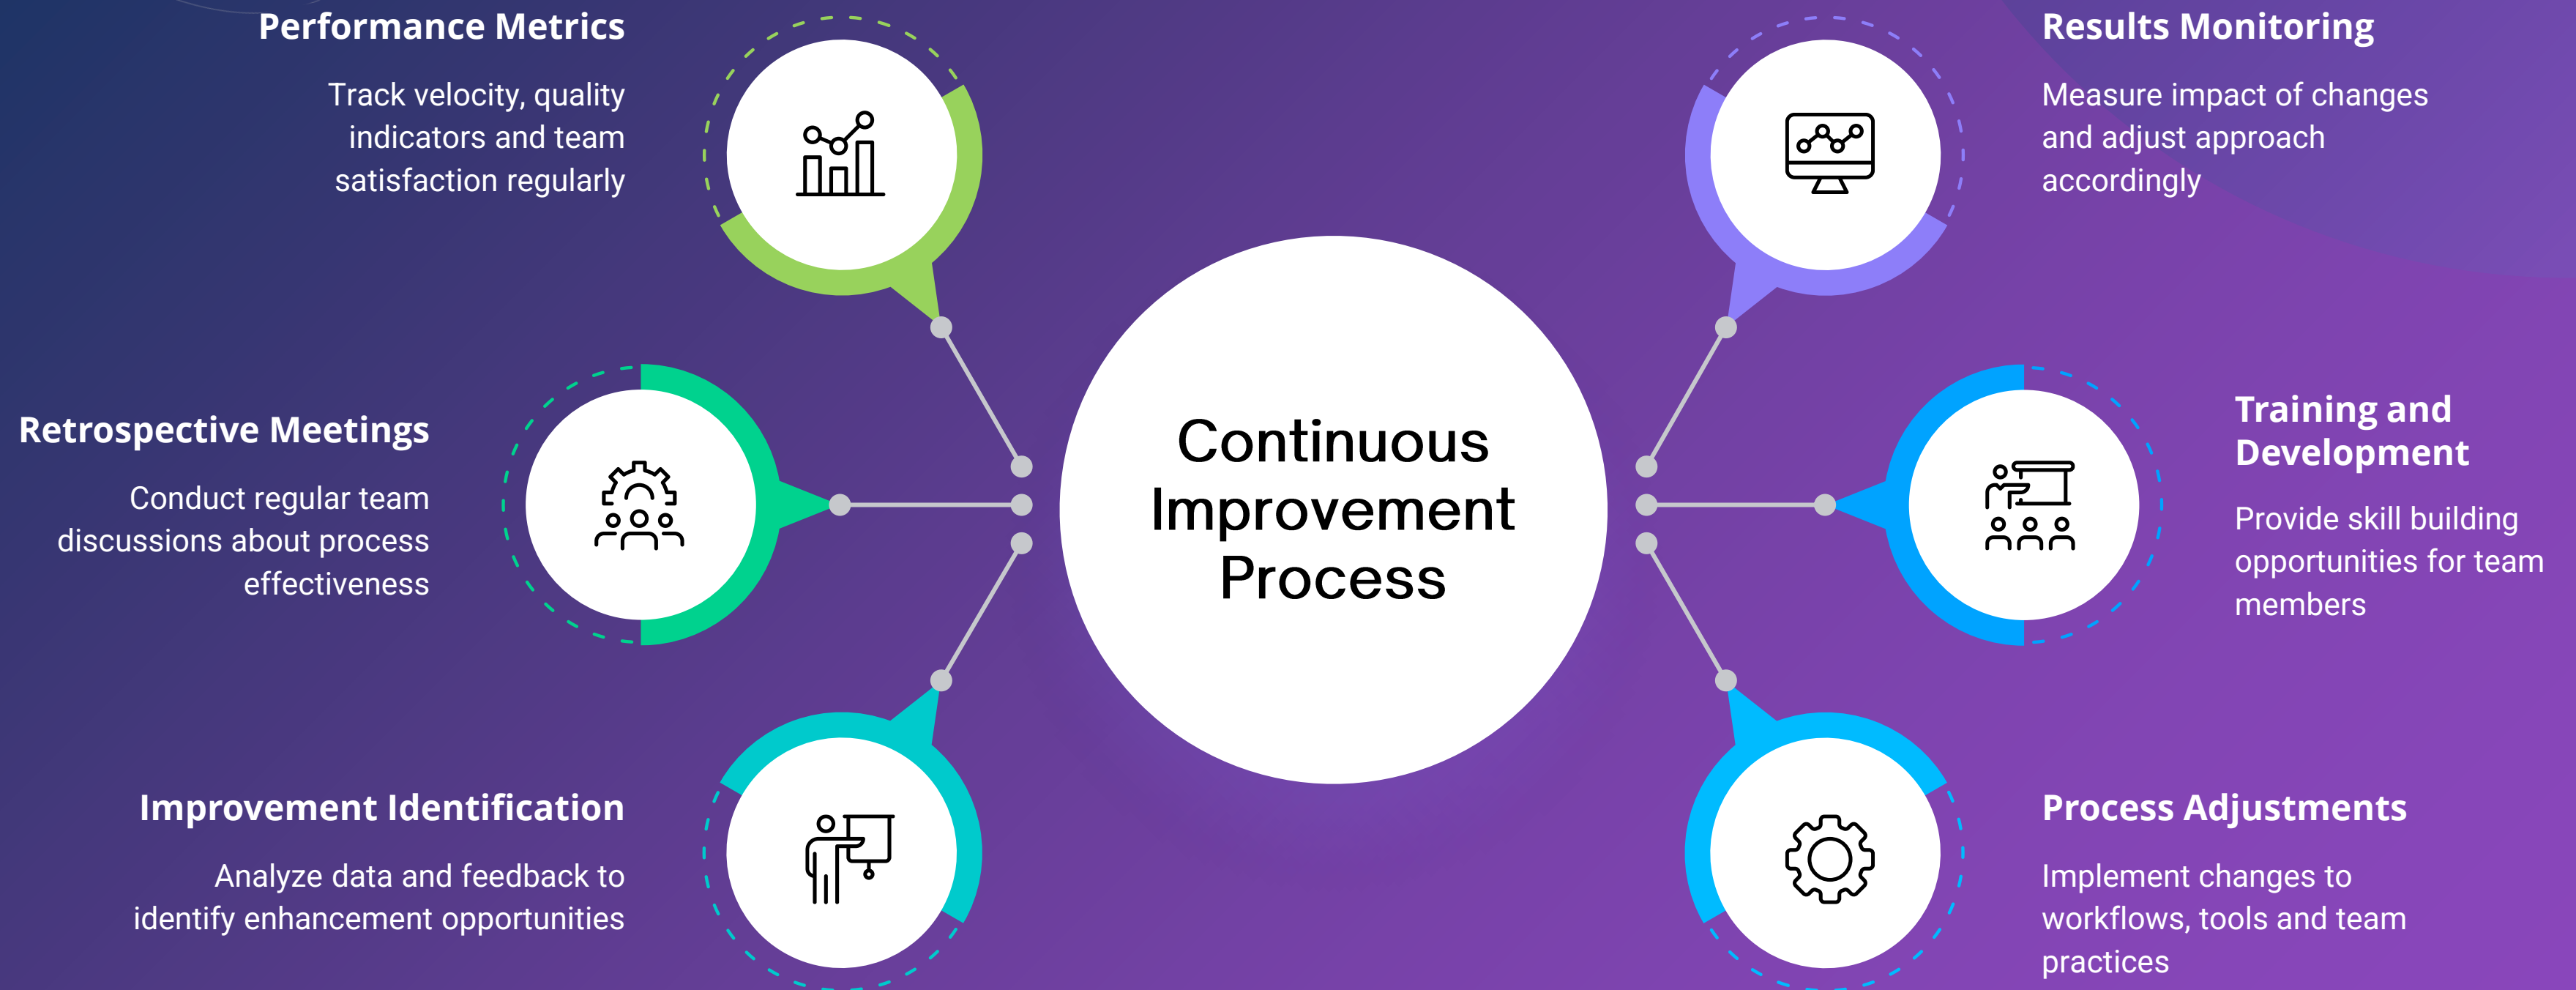

Security and Observability

Security is embedded throughout development with threat modeling and vulnerability scans; observability uses logging and metrics to optimize performance.

Strategic Product Development Roadmap

Development Approach

Our Differentiators

Virgule International, located in the heart of UK and has been serving its key clients for over a decade now. Our strong delivery model and customer focus is a key differentiator while we continue to engage into new territories with our clientele.

Partner with purpose

We embed within client ecosystems to understand unspoken cultural nuances, team dynamics, and innovation tolerance

Industry Expertise

Apply Digital Solutions to IT problems

Digital Technologies

Latest Technologies. Implemented
