TECHNOLOGY TRANSFORMATION & ASSURANCE

Make complexity visible. Deliver what matters.

Independent advice, executive assessments and delivery expertise for complex technology environments.

GUIDE · GOVERN · DELIVER · TRANSFORM

From visibility to lasting change

We make complex technology visible, help leaders decide what matters and deliver the changes required.

01

GUIDE

Define the direction

Strategy, architecture and investment choices.

02

GOVERN

Strengthen control

Assurance, risk and accountable decisions.

03

DELIVER

Make change happen

Programmes, platforms and migration.

04

TRANSFORM

Make progress last

Operating models, capability and improvement.

We do what we say we will do, when we say we will do it.

Specialist help where technology decisions matter

Six service areas connect strategy to implementation and operational performance.

01 **IT Strategy & Architecture**

Direction, target architecture and investment priorities.

02 **IT Sourcing & Procurement**

Supplier selection and better commercial outcomes.

03 **Cloud & Datacentre**

Modern platforms built for resilience and scale.

04 **IT Transformation**

Control and delivery of complex change programmes.

05 **IT Operations & Service Management**

Better services, operating models and day-to-day control.

06 **Cyber Security & Compliance**

Security, resilience, governance and compliance.

An independent view of what matters

Focused four-week assessments establish the current position, priority risks and a practical route forward.

01 **Executive Capability Assessment**

02 **Executive Transformation Assessment**

03 **Executive Infrastructure Assessment**

04 **Executive AI Readiness Assessment**

05 **Executive Vendor Management Assessment**

06 **Executive Cyber Security Assessment**

07 **Executive Total Loss Cyber Recovery Assessment**

08 **Executive Service Management Assessment**

Evidence reviewed / maturity made visible / priorities agreed / action planned

Which question needs an answer?

Start with the decision you need to make. Each question points to a focused assessment.

Can our organisation deliver the strategy?	→	Executive Capability Assessment
Is the transformation under control?	→	Executive Transformation Assessment
How resilient is the technology estate?	→	Executive Infrastructure Assessment
Are we ready to adopt AI responsibly?	→	Executive AI Readiness Assessment
Where are supplier cost and risk concentrated?	→	Executive Vendor Management Assessment
What are our most significant cyber gaps?	→	Executive Cyber Security Assessment
Could we recover from a total loss cyber event?	→	Executive Total Loss Cyber Recovery Assessment
Are our IT services performing as they should?	→	Executive Service Management Assessment

Experience where technology is critical

From large enterprises to essential services, we understand environments where failure has consequences.

Enterprise

Complex estates and operating models

Transport

Reliable services at operational scale

Healthcare

Resilient clinical and corporate technology

Public Sector

Accountable change in public services

Utilities

Critical infrastructure and continuity

Aviation

Safety, reliability and control

Evidence you can act on. People who can deliver.

Independent judgement is valuable when it leads to decisions and remains accountable through delivery.

Independent

Objective advice without supplier bias.

Experienced

Senior expertise shaped by real delivery.

Outcome-focused

Priorities tied to measurable improvement.

CLEAR™

C	Clear Visibility
L	Launch Independent Assessment
E	Evaluate the Evidence
A	Align Executive Priorities
R	**Restore Control**

LET’S START THE CONVERSATION

Make the next technology decision with confidence.

Tell us the challenge. We’ll identify the right assessment, advisory support or delivery next step.
