

GCloud 15 Pricing Document – Mycelia

This document sets out the pricing for the Mycelia software service, as required under the terms of the GCloud 15 framework.

For further details about Mycelia, please see verna.earth/mycelia or contact us on mycelia@verna.earth.

Annual subscription price

The annual subscription price is a flat fee per customer. Customers can have any number of user logins, all within the single fee, and there are no additional charges for installation, support, maintenance, or the ongoing development of the software's functionality.

The subscription price is linked to inflation, so the initial annual price will change through the GCloud framework period as shown in the table below.

It is common for customers to request a multi-year Mycelia contract. For multi-year contracts, all years covered are charged at the same price (based on when the contract starts, as in the table below). I.e. no inflationary increase is applied during the initial contract term.

Customer type	Initial 12-month price for:				
	Subscriptions started in 2026	Subscriptions started in 2027	Subscriptions started in 2028	Subscriptions started in 2029	Subscriptions started in 2030
Local Planning Authorities/Organisations with smaller planning loads ¹	£12,000 + VAT	£12,600 + VAT	£13,230 + VAT	£13,900 + VAT	£14,590 + VAT
Local Planning Authorities/Organisations with larger planning loads ²	£22,000 + VAT	£23,100 + VAT	£24,255 + VAT	£25,470 + VAT	£26,740 + VAT

¹those that receive the lower level of Defra Biodiversity Net Gain burdens funding

²those that receive the higher level of Defra Biodiversity Net Gain burdens funding

Right to renew

Customers can initially contract for any number of 12-month periods (with a minimum of one, i.e. a single year).

After the initial term ends, the customer is able to renew the agreement for another 12-month period. This right continues indefinitely i.e. the agreement can continue for any number of years.

The renewal will be at the same price, except for:

- An annual increase in line with inflation: This is either 3% or the average of the Retail Prices Index over the preceding 12-month period, whichever is greater.

- Any data fee: The annual subscription price includes, at no additional cost, an allowance of 50 gigabytes of data storage. If the customer builds up more than 50 gigabytes of data stored on Mycelia, then at renewal there will be an additional data fee which passes onto the customer the cost to Verna of storing and handling the extra data (at cost i.e. with no profit for Verna).

The only circumstances in which the renewal price can change, other than the above, are if Mycelia develops to provide significant functionality that goes beyond validation, assessment, monitoring, and reporting of ecology cases. In this case, Verna will work with the customer to agree a new price which reflects the additional value being provided (and the customer always has a right to cancel should agreement not be reached).
