Technology Risk Assessment

Supporting our clients with AI cloud enablement maturity – the route to production

What is our service?

- We undertake a review of your organisation's AI readiness and data maturity with the goal of providing actionable recommendations that will help position you for success.
- Our assessment will identify opportunities for optimisation, improve scalability, enhance governance alignment and future readiness with particular focus given in support of your strategic business objectives.

How do we deliver?

- We provide a bespoke delivery service best suited to your organisation's needs with advisory, operational and upskilling expertise available for every engagement.
- We will conduct interviews, artefact reviews, architectural configuration assessments, DevOps maturity reviews, Data Governance, Security and Resilience reviews for a comprehensive outlook on current state.
- Our maturity assessment will align to Cloud Adoption Framework (CAF) stages with risks, gaps and opportunities for improvements identified.

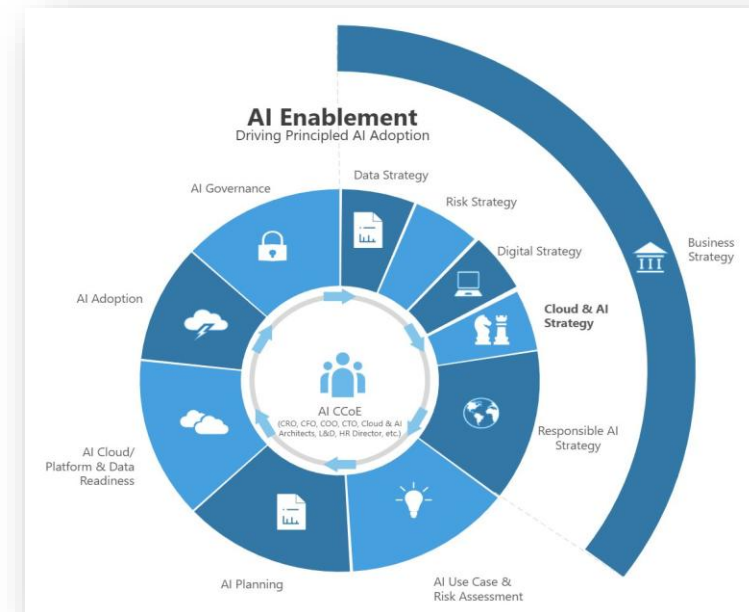

What do we deliver?

- A bespoke roadmap with prioritised actions, a remediation approach, project and training plans.

Why 4most?

- Our team has the expertise across risk, data and regulation meaning our recommendations and remediation plans are always aligned to regulatory requirements, practically implementable and aligned to the highest of standards
- We have hands-on experience scaling AI / ML and data solutions meaning we have a deep and thorough knowledge and can provide best in class assessments.
- Our experience of CAF alignment, data engineering, cloud readiness and embedding MLOps / DevOps into AI governance frameworks ensures you will have full support at every step of the process.

AI Enablement framework

Data Risk Maturity Assessment

Leveraging our internal tools and accelerators we give actionable recommendations

What is our service?

- We are an authorised partner offering in-depth assessments based on the DCAM (Data Management Capability Assessment Model) framework providing a structured assessment of key areas such as data governance, architecture, quality, privacy and operational processes.
- A comprehensive maturity assessment with key findings and actionable recommendations shared at delivery.

How do we deliver?

- We can meet the requirements of our clients with capabilities to follow an agile, collaborative and hybrid approach.
- We leverage our internal role-based survey tool to provide rapid, scalable and repeatable data risk assessments across key themes include data lineage, quality and governance.
- Our accelerator generates real time results based off submitted responses.

What do we deliver?

- A tailor insights report with findings, benchmarking and industry best practice information specific to our client.
- Actionable feedback with recommendations to address any gaps identified across all key areas.

Why 4most?

- Our suite of developed tools and accelerators mean we can streamline delivery timelines providing a trusted assessment in an extremely efficient fashion.
- Our team contains skilled leads with extensive experience leading and delivering transformation programs ensuring our advice is robust and all our solutions are practical and implementable to your environment.
- The tailor-made insight report shared will include SME inputs on best practice as well as a benchmarked assessment of your data risk maturity, providing more extensive insights specific to you.
- We combine deep regulatory expertise with technical capabilities ensuring we support our clients with effective AI adoption and data maturity assessments preparing them for successful future innovation.

AI Risk Governance Maturity Assessment

Delivery of a maturity map to promote safe and effective AI adoption

What is our service?

- We will conduct a proportionate assessment of your AI governance against regulations and leading relevant frameworks, providing a maturity map of your institution's environment.
- Our delivery will be a board-ready report identifying opportunities for optimisation, improve scalability, governance alignment and future readiness.

How do we deliver?

- Our tailored service to your organisations current maturity will leverage our own internal templates providing accelerators streamlining delivery timelines.
- We will use multiple forms of review across stakeholders and artefacts critical to your AI governance procedures, always assessing results and findings against relevant regulations and leading frameworks.

What do we deliver?

- Bespoke report directly related to your organisations AI Risk Governance Maturity with practical remediation steps to enhance your readiness and develop more comprehensive AI policies.
- Our report will provide actions across all areas reviewed with additional training plans recommended where appropriate.

Why 4most?

- We blend risk governance with hands-on validation expertise of GenAI systems to provide comprehensive assessments of your organisations AI readiness.
- With a suite of developed tools and accelerators we can provide trusted solutions in an optimal delivery process.
- Our expertise across multiple domains allows us to avoid theoretical frameworks divorced from implementation ensuring we provide a practical stance in our guidance and the internal governance we recommend.
- We are not just advisors but practical developers of AI / ML solutions meaning we know the opportunities presented. We will always ensure our governance recommendations are proportionate and support innovation from our clients.
