

Bizzdesign

Bizzdesign Support Services

Service Description

January 2026

General engagement scenarios

Mobilisation

- Establishing an Architecture Capability
- Ideal for the Buyers that want to establish their Architecture modelling capability (configuration, training, integration, modelling, coaching and transition).

Evolution

- Evolving current Architecture maturity
- For Buyers extending their existing practice into new architecture domains (e.g. extending from business into data), using new notations (e.g. BPMN, UML), increasing automation and improving operations & governance.

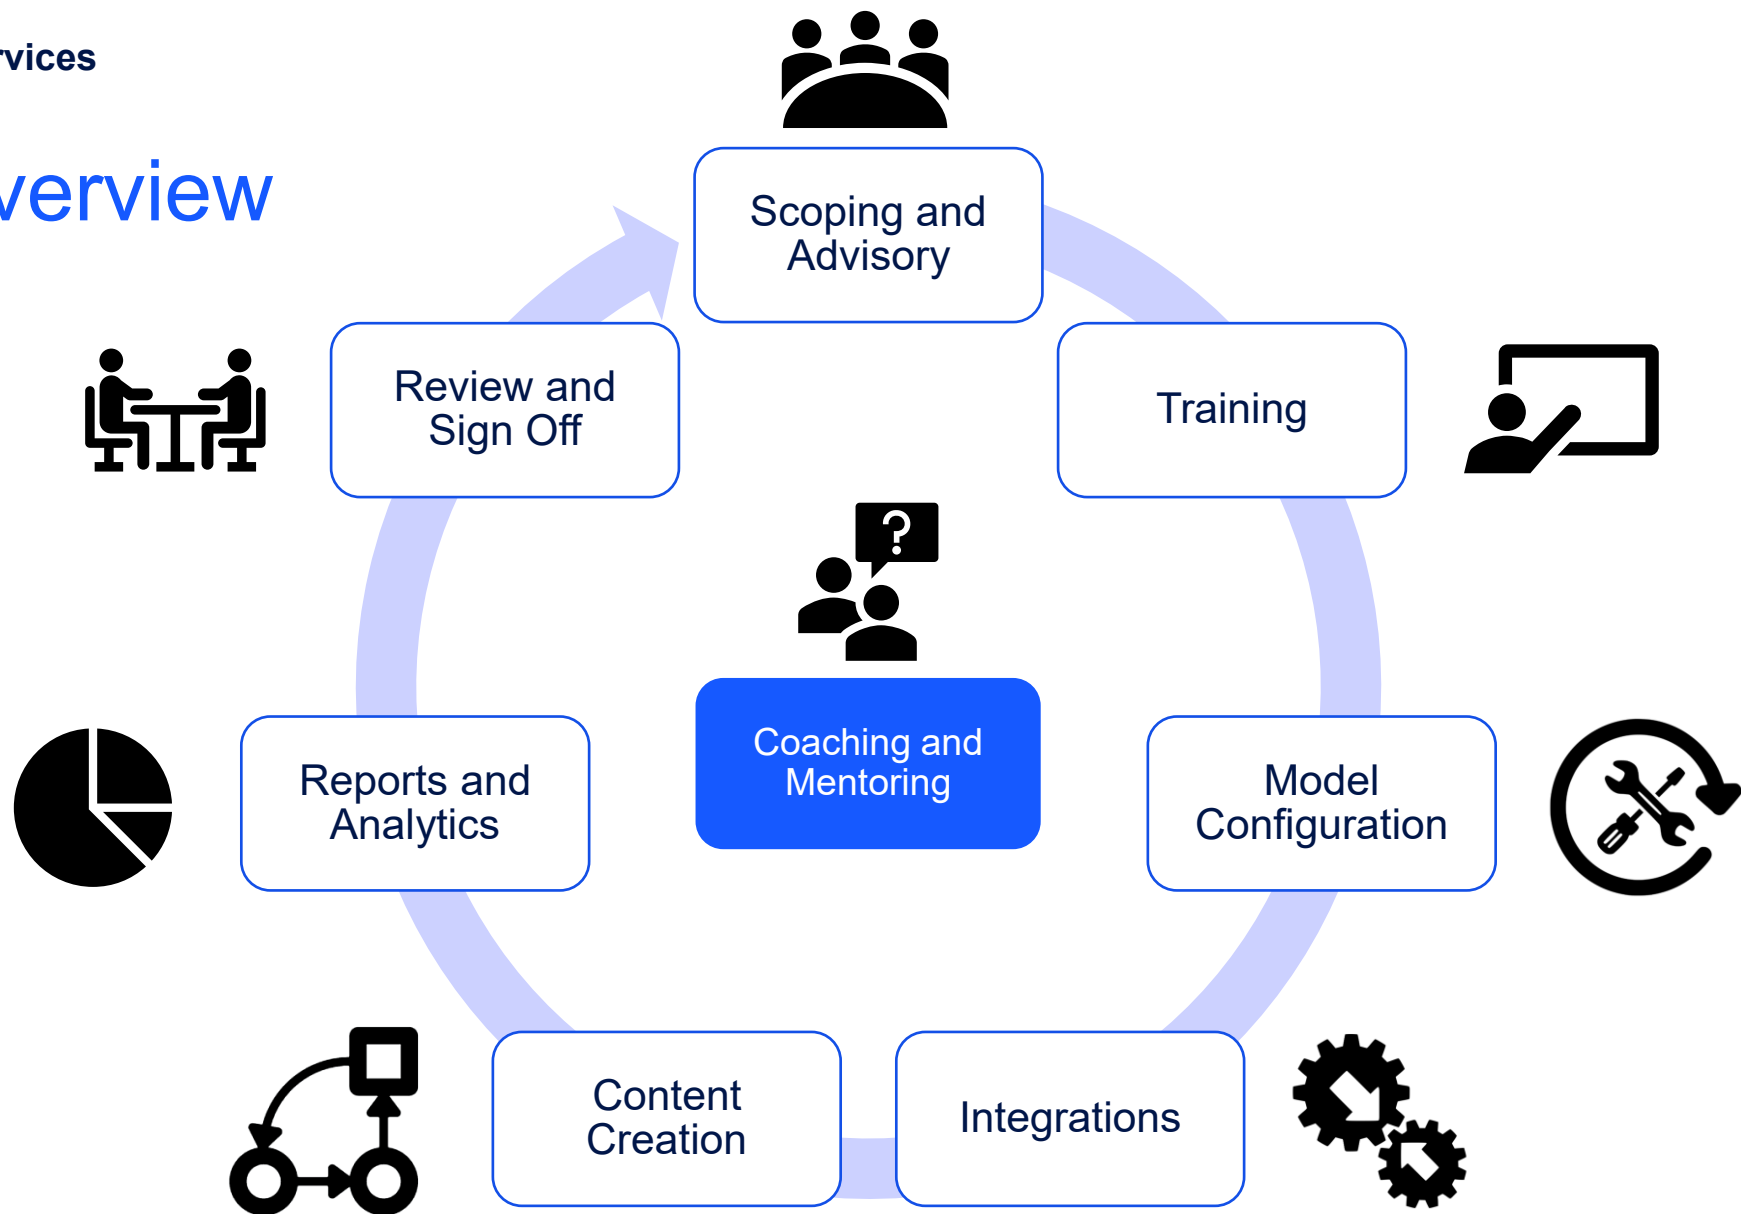

Assessment

- Reviewing an established Architecture Capability
- For Buyers requiring an impartial critique and recommendations for improving existing modelling practices; new methods and techniques, actions plans, coaching and support to enhance architecture operations.

Migration

- Migrating from other solutions to Bizzdesign
- For Buyers requiring support with data extract, cleanse and import; establishing new integration points, automation of content & view generation, dashboard and report preparation.

Services overview

Training and Advisory

Modelling and Tool Training

- Bizzdesign Horizon
- ArchiMate
- BPMN
- Business Architecture in Practice (BIZBOK)
- Decision Model and Notation (DMN)
- TOGAF 9

Scoping and Advisory

- Stakeholder analysis
- Prioritisation roadmap & Backlog refinement
- Solution specification

Coaching and Mentoring

- Viewpoints & views
- Integration operations
- Model management
- Governance & workflow
- Publishing and reports
- Support surgeries

Review & sign-off

- Stakeholder communication
- Deliverable generation
- Content approval and promotion
- Solution iteration planning
- Solution roadmap
- Solution transition

Modelling operations

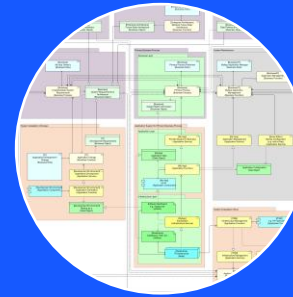

Setup & configuration

- Metamodel configuration
- Add-In configuration
- Viewpoint definition
- Roles & permissions
- Workflow
- Automation
- Model structure

Data integration

- Data collection & processing
- No-code connection models (e.g. Excel, SQL)
- Custom data import/exports
- Model exchange
- Quality checking
- API Integrations

Content creation

- ArchiMate, BPMN, DMN, ERD, UML modelling
- Capability mapping
- Heatmaps, roadmaps, lifecycles
- Baseline vs target architecture
- Value streams, Customer journey maps, SWOT, Balanced scorecards

Reporting and analytics

- Dynamic & interactive Dashboard visualisations
- Enterprise portfolio management
- Application & technology portfolio management
- Business process maturity
- Document publication & content sharing
