

Pricing

1. Pricing model

Pricing is provided on a time-and-materials, fixed-price, or retained support basis, depending on the agreed scope of work. Pricing is transparent and agreed prior to delivery.

2. Day rates (delivery services)

Role	Description	Day rate
Technical Architect	Solution design, architecture, assurance	£700 – £1,000
Senior Software Engineer	Application development and integration	£550 – £800
Software Engineer	Development, configuration, testing	£400 – £650
Cloud / Integration Engineer	Cloud setup and system integration	£700 – £950
Technical Lead	Delivery oversight and coordination	£650 – £900

A standard working day is 8 hours.

3. Fixed-price delivery

Fixed-price engagements may be offered for clearly defined scopes. Prices are agreed following requirements clarification and are based on the applicable day rates and estimated effort.

4. Support pricing

Support level	Description	Price
Standard Support	Business hours application support	£500 – £2,000 per month
Enhanced Support	Extended hours and prioritised support	£2,000 – £6,000 per month

Support pricing depends on scope, duration, and service hours.

5. Expenses

Reasonable travel and subsistence expenses may be charged where on-site attendance is required and will be agreed in advance. Remote delivery is supported by default.

6. Minimum contract length

There is no minimum contract length. Services can be engaged on a short-term or longer-term basis.

7. Price review and discounts

Pricing may be reviewed for longer-term engagements. Volume or duration-based discounts may be agreed at contract award.

8. Termination

Customers may terminate the service in line with G-Cloud contract terms. Charges apply only for work completed up to the termination date.
