

Cost, Productivity, Innovation and Efficiency Improvement Service

Overview

We help organisations tackle the dual challenge of driving greater efficiencies while maintaining a commitment to improving quality. Our expert support addresses shortfalls in existing plans and provides assurance over financial controls without compromising service delivery, for example by leveraging Cloud technology.

Service Features

- Strong assessment and review process
- Considers plans within the context of priorities, finances, performance, and quality
- Identifies key risks and recommends realistic adjustments to strategy
- Develops achievable project plans and PMO arrangements
- Designed to identify new opportunities for efficiencies
- Ensures key stakeholder engagement, including users and staff
- Develops new, imaginative innovation programmes
- Improves quality and productivity while realising previously unidentified savings
- Benchmarks services to improve productivity and reduce cost and inefficiency
- Assesses risk through a robust quality impact assessment

Service Benefits

- Helps achieve real cash-releasing savings
- Provides support during implementation of initiatives
- Access to a team of expert resources
- Experts include health economists, finance specialists, commissioners, clinicians, and project managers
- Experienced in planning and implementing successful cost-efficiency strategies
