

Agile ICT Solution Deployment

Summary

We specialize in designing and implementing ICT solutions using **Agile methodologies** to ensure innovation, flexibility, and user-centric outcomes. Our approach combines Agile principles with proportionate governance, risk management, and practical detail at every stage.

Key Features

- Expertise in **Agile PM**, **DSDM Atern**, and **Scrum**.
- Integration of Agile with **Prince2**, **ITIL**, and **MSP**.
- Techniques like **timeboxing**, **hothousing**, and **sprints**.
- Iterative development using models and prototypes.
- Prioritization via **MoSCoW**.
- Strong stakeholder management and clear roles.
- Alignment with IT strategy and architectural principles.

Benefits

- Deep understanding of cultural challenges in Agile adoption.
- Proven experience introducing Agile in the **public sector**.
- Pragmatic application of Agile principles.
- Knowledge transfer for future Agile capability.
- Successful use of Agile with other frameworks and suppliers.
- Emphasis on **Value for Money** and risk-managed delivery.
- Ability to create shared purpose across stakeholders.
