Pricing Overview

Pricing for Managed Detection and Response (MDR) and Extended Detection and Response (XDR) can be seen in the tables below. Our pricing is determined by the volume of monitored assets. A minimum volume of 300 assets applies. Where the number of monitored assets falls below this threshold, the minimum price will still be applied.

MDR is aligned for organisations that have deployed Microsoft E3 licences

XDR is aligned for organisations that have deployed Microsoft E5 licenses

Notes

- Total price = the volume of monitored assets * band unit price
- Published prices are the service charge to provide monitoring for a monitored asset. This can include a licensed user, device, server, firewall or other asset that generates security log events.
- Above prices do not include required licencing, data or alert ingestion that may be required to support the service.
