

Chronicler Pricing and Licensing Approach

For government and enterprise procurement teams

Chronicler by Chronosoft offers a flexible and transparent pricing model designed to meet the diverse needs of government and large enterprise organisations. Pricing is not fixed and is determined based on a comprehensive assessment of the configuration, functional scope, scale, and specific requirements of each deployment. This document outlines the key principles and factors influencing Chronicler's pricing and licensing approach.

Pricing Principles

Chronosoft is committed to the following pricing principles:

- **Transparency:** Providing clear and detailed pricing breakdowns.
- **Scalability:** Offering pricing models that scale with your organisation's growth and evolving needs.
- **Value for Money:** Delivering exceptional value through a robust and feature-rich solution.
- **Suitability for Government Procurement:** Adhering to procurement best practices and ensuring compliance with relevant regulations.

Licensing Models

Chronicler offers the following licensing models:

- **User-Based Licensing:** A per-user subscription model suitable for organisations with a defined number of users requiring access to the system.
- **Volume-Based Licensing:** A subscription model based on transaction volume or data processed within the system, applicable where usage is directly correlated with business activity.

Factors Influencing Pricing

The following factors are considered when determining pricing:

- **Users:** The number of active users requiring access to Chronicler.
- **Modules:** The specific modules and functionalities required.

- **Configuration Complexity:** The level of customisation and configuration needed to align with your organisation's workflows.
- **Integrations:** The number and complexity of integrations with existing systems.
- **Hosting and Data Residency:** Hosting options and data residency requirements.
- **Security and Compliance Requirements:** Specific security and compliance needs
- **Service Level Agreements (SLAs):** The level of support and uptime guarantees required.
- **Scale:** The overall scale of the deployment, including data volume and transaction throughput.
- **Concurrency:** The anticipated number of concurrent users and system load.

Configuration and Scalability

Chronicler's modular architecture enables phased rollout and flexible configuration to match your organisation's specific requirements. The solution is designed to scale from departmental deployments to enterprise-wide implementations, ensuring long-term value and adaptability.

Commercial Engagement

Pricing is confirmed following a comprehensive requirements workshop and solution design phase. This collaborative approach ensures that the proposed solution aligns precisely with your organisation's needs and budget.

To obtain a tailored pricing schedule for Chronicler, we invite you to engage with our sales team to discuss your specific requirements and explore how Chronicler can address your organisation's needs. Contact us today to schedule a consultation.
