MANAGED SECURITY OPERATIONS CENTRE

24x7 monitoring, detection, and response protect your endpoints, networks, and cloud services from modern cyberattacks.

>> Secure Nexus Services

A Managed Security Operations Centre (SOC) combines expert analysts and platforms to continuously monitor, detect, and respond to threats across your organisation's IT environment.

Secure Nexus SOC delivers continuous monitoring across endpoints, networks, and cloud. Our expert analysts combine automation and human intelligence to detect, investigate, and contain threats before they impact your business.

Protecting Your Organisation

Secure Nexus SOC safeguards all attack surfaces, identifying ransomware, suspicious activity, risky logins, and account compromise in real time. By monitoring across endpoints, networks, and cloud services, organisations gain faster detection, reduced alert noise, and actionable insights to prioritise remediation and maintain business continuity.

Key Features:

- **24x7 UK-Based Monitoring:** Round-the-clock protection by expert analysts.
- **Faster Detection and Containment:** Rapid response to minimise risk.
- **Expert-Led Analysis:** Reduces noise and prioritises critical threats.
- **Actionable Reporting:** Clear, prioritised insights for leadership.
- **Scalable:** Suitable for SMEs, public sector, and enterprise organisations.

Proactive Threat Management

We blend human expertise with automation, aligned to ISO 27001 and NCSC standards. Our proactive threat hunting, integrated protection, and clear reporting ensure organisations can respond to emerging threats with confidence.

Secure Nexus MDR provides full visibility across endpoints, networks, and the cloud while turning alerts into actionable intelligence for faster detection and response.

Key Areas of Focus

Secure Nexus proactively hunts threats to uncover hidden risks and continuously monitors for intrusions to detect breaches early. Real-time triage reduces false positives and prioritises critical alerts, while expert analysts provide actionable remediation guidance and response support. The service seamlessly integrates with endpoints, firewalls, cloud apps, SIEMs, and PSA/ITSM systems, enabling automated alerting and ticketing without additional hardware.

Benefits

- 24x7 UK-based monitoring by expert analysts.
- Faster detection and containment to minimise risk.
- Expert-led analysis reduces noise and highlights critical threats.
- Prioritised reporting delivers clear, actionable insights for decision-makers.
- Scalable for SMEs, public sector, and enterprise organisations.

Outcomes

Organisations gain enhanced visibility across all systems, faster incident response, and stronger security posture. Automated workflows and seamless integration allow IT teams to focus on strategic priorities while critical threats are detected, prioritised, and remediated efficiently, reducing operational risk and improving overall resilience against cyber attacks.
