 How to order through Org on G-Cloud 5

Org Group's G-Cloud Offering

Org will provide UK public sector buyers with access to a practical AI and Automation stack through our partnership with:

- **UiPath Cloud:** Automation platform (orchestration, robots, governance, AI features depending on your bundle).

This service is designed to help organisations scale from traditional RPA into AI agents and conversational automation, with the right governance and delivery support.

Why Org?

Org is a Platinum Partner for UiPath. We combine licensing and delivery expertise: we don't just resell software; we help you get real value from it. We support buyers with:

- Licence scoping aligned to services and operational demand.
- Governance and operating model guidance (CoE setup, controls, audit).
- Adoption planning and measurable benefits tracking.
- Practical delivery accelerators and proven implementation patterns.

Outcomes you can expect

- Faster deployment of automation and AI services using proven platforms.
- Clearer control of licensing and consumption (AI Units/Credits).
- Improved service experience through conversational channels.
- Reduced operational effort through AI-assisted straight-through processing and human-in-the-loop for exceptions.

To start the conversation, email bids@thisisorg.com with your requirements and we'll guide you through the simplest route to procurement and onboarding under G-Cloud.

Our Clinical Coding for NHS Service

Our Clinical Coding service is a managed automation and AI offering designed to help NHS organisations increase coding capacity, improve accuracy, and reduce backlogs — without adding unnecessary operational risk.

Delivered and managed by Org, the service combines deep healthcare workflow experience with the market-leading UiPath platform to automate the repeatable, time-consuming steps that slow coding teams down, while keeping human oversight where clinical judgement is required.

This pricing document outlines the commercial options for implementing and running the service, including the recommended UiPath licence mix, onboarding and configuration, integration and security considerations, and ongoing managed support.

Our approach is outcome-led: we focus on delivering measurable improvements in throughput, timeliness, and auditability, while ensuring the solution is safe, compliant, and scalable across specialties and sites.

In short, this is not 'automation for automation's sake'. It is a practical, controlled way to modernise clinical coding operations and free up valuable time for higher-value work, supported by Org's end-to-end delivery capability and governance.

Pricing approach

Org will charge licences at the vendor's recommended list price, unless the vendor confirms an approved discount mechanism (e.g. specific public sector pricing rules or multi-year upfront programmes). Our focus is on helping you buy the right licences (not too much, not too little), align them to your roadmap and avoid waste.

Pricing Framework

Pricing for UiPath depends on the components that are important to your organisation. With predictable licence consumption and cost per coded case, UiPath enables NHS organisations to forecast operational budgets with confidence. We will work with you to build the optimum service per your requirements, at the level of automation that you require and with predictable licence consumption.

Once your requirements are understood, we will provide you with a quote using the current UiPath Partner Pricelist.

- UiPath 's recommended list price (RRP): [UiPath Plans and Pricing – Scalable Agentic Automation Solutions | UiPath](#)

Licence Calculator

Agent Units / Platform Units	0.2
No of searches per batch	10
Maestro Credits / per run	1
Estimations	
Lookups processed by robot per year	50,000
Clinical Coder Fee per search (conservative)	£ 5.00

Agent Name		No of calls	Agent Units Baseline	Total Agent Units	Total Platform Units
Disease Identification Agent	LLM calls	1	1	1	0.2
Agent 1 ICD-10	LLM + Tools calls	10	2	20	4
	I/O	3	1	3	0.6
Agent 2 OCPS	LLM + Tool calls	3	2	6	1.2
	I/O	1	1	1	0.2

£ 5.00 / £1.5 = ~70%
cost reduction per search

	Year 1	Year 2+
Total units	7.2	7.2
Total Cost per Lookup (incl setup & UiPath licenses)	£ 3.00	£ 1.50

Year 1: 50,000 lookups at £3.00 per lookup = £150,000 total. This includes configuration, a phased Transformation Programme approach, and the set-up of 10 lookups across 10 specialties, bringing all specialties to 90%+ accuracy. It also includes all UiPath software, plus proactive monitoring and support of the solution.

Year 2: Minimum bundle of 50,000 lookups at £1.50 per lookup = £75,000 minimum total, including all UiPath software and proactive monitoring and support of the solution.

Consumption pricing

The 'AI lookup' consumption is calculated per clinical code lookup, driven by the number of diagnoses and procedures processed per case and the orchestration of agents. Bundled lookup allowances are included in the starter bundle, with optional top-ups to support volume spikes and specialty expansion.

Quantifiable Benefits

Working with Org, you can be assured of transparent consumption-based pricing and long-term sustainability with improved licence management and cost-certainty.

Volumes	Year 1	Year 2
Price per Search	£3.00	£1.50
Number of searches per year	50 000	50 000
NHS Savings	40%	70%
Assumption		
Clinical Coder Fee per search	£5.00	

Example: Cost Reduction Potential over two years

How to order through Org on G-Cloud

Contact Org at bids@thisisorg.com with:

- Your organisation name and purchasing contact.
- The vendor you want (UiPath).
- Estimated user volumes / bot volumes / AI Units (if known).
- Preferred contract term (e.g., 12 months) and desired start date.

We will confirm the right licence bundle(s) based on your use cases and environment (cloud-first by default). The Order Form / Call-off is prepared and agreed under the G-Cloud framework. Licences are provisioned and you receive onboarding guidance and access to Org support options.

If you already hold licences with any of these vendors, you can still procure via G-Cloud. You'll typically just need to notify the vendor that Org is your authorised reseller/partner for the contract term.
