

Set Up and Migration Services for Cloud

Where Curiosity Meets Creativity

Service Description

Defence and government set up and migration for maritime and C5ISR workplaces and business services. We audit and organise data, design future information structures, plan engagement communications, and run governed migration delivery. We optimise and right size target services, coordinate mobilisation, and manage outgoing providers for secure cutover.

Features

- 1 Data auditing identifies duplicates, ROT, risks, and migration readiness gaps.
- 2 Data organising applies defensible retention, tagging, and metadata hygiene.
- 3 Future information structure design improves findability, controls, and reuse.
- 4 Workload scope covers mail, files, calendars, permissions, and applications.
- 5 Engagement and communication plans drive adoption across defence user communities.
- 6 Migration governance uses clear decision logs, RAID, and control gates.
- 7 Mobilisation coordination aligns stakeholders, access, environments, and migration tooling.
- 8 Service optimisation right sizes licences, storage, performance, and configurations.
- 9 Outgoing provider coordination manages extracts, security, and handover obligations.
- 10 Secure cutover planning includes rollback, continuity, and operational constraints.

Benefits

- 1 Reduces migration risk through audited data, controls, and traceability.
- 2 Improves user adoption with structured engagement and communications planning.
- 3 Ensures secure provider handover with clear responsibilities and evidence.
- 4 Cuts licence and storage spend through right sizing and optimisation.
- 5 Improves information governance with cleaner metadata and retention alignment.
- 6 Protects operational readiness by coordinating cutovers around mission schedules.
- 7 Speeds delivery by mobilising quickly with clear roles and gates.
- 8 Enhances search and reuse via well designed information structures.
- 9 Minimises disruption using rehearsed cutovers, rollback, and continuity plans.
- 10 Builds buyer confidence with governance artefacts, auditability, and reporting.
