

Ensuring Every Child's Welfare

Studybugs helps secure the best outcomes for children by improving safeguarding and school attendance through targeted early intervention.

Studybugs AP Manager gives the LA and schools full visibility of all alternative provision placements, wherever they are.

You can see attendance and absences in real time, receive instant alerts and communicate with provisions. Which means the LA and schools can all meet the voluntary [national standards for alternative provision](#).

Better information also helps you optimise placements, and achieve the ultimate aim of getting children back into mainstream (or appropriate) education sooner.

Studybugs works with dozens of local authorities and more than 6,000 schools and alternative provisions to help ensure the welfare of 1.5 million children.

“Implementation was extremely simple and it’s given us real-time visibility of attendance across all AP placements, greatly improving safeguarding and enabling proactive intervention for vulnerable children.”

– Jason Moores, Suffolk County Council
