About the company

Jyochan Consulting is a premier IT technology and consulting firm, founded by visionary tech enthusiast Kalyan Kakaraparthi. With over 20 years of industry experience, we specialize in leveraging cutting-edge technology to deliver tailor-made solutions that precisely meet the unique business needs of our clients. Our commitment to personalized service helps us build enduring relationships and empower our clients to achieve their full potential.

Driven by a passion for innovation, Kalyan founded Jyochan Consulting with the conviction that advanced technology can revolutionize not only businesses but entire industries. Our dedicated team of experts is focused on helping your business grow through innovative, effective solutions and a commitment to excellence in all we do.

What we do

Jyochan Consulting is a tech consultancy specializing in Agile and Cloud technologies. We boost your technical capabilities and drive innovation by partnering with leading technology innovators. Our expertise lies in managing and delivering complex transformation projects, giving you full control over your teams and outcomes.

We offer strategic advisory, transformational delivery, and project outsourcing, complemented by technical teams and on-demand experts for smooth execution. Our mission is to steer your business towards technological independence and lasting success.

How we add value

Jyochan Consulting delivers unparalleled value by empowering businesses to harness the full potential of Agile and Cloud technologies. Our expert-driven approach accelerates innovation and technical capabilities, enabling businesses to not only meet current challenges but also to future-proof their operations. By providing tailored solutions, comprehensive project control, and access to specialized expertise, we help organizations optimize their processes, reduce time to market, and achieve significant operational efficiencies. Our commitment is to ensure that every client becomes more agile, resilient, and competitive in their respective markets.

We've supported

Jyochan Consulting team have successfully partnered with a diverse range of clients across both public and private sectors, delivering complex transformational projects and strategic engagements. Our expertise spans digital transformation, regulatory compliance, and leveraging the latest technological advancements to meet specific business needs. Our notable client portfolio includes esteemed organizations such as Lloyds Banking Group, MS Amlin, the UK Home Office, the Ministry of Justice, and the Office for National Statistics. These collaborations highlight our ability to deliver substantial value and drive success in various challenging environments.

About our Service

With Microsoft Power BI Certified Professionals, we transform complex data from sources such as Azure Databricks, D365 Platform, Snowflake and SharePoint into actionable insights. Our services include creating powerful visualizations and custom Power BI apps for easy access, enhancing organizational decision-making.

Features of the Service

- Connects to multiple data sources using M Code and Dataflows
- Designs efficient data models for optimized Power BI performance
- Utilizes DAX for advanced analytics like YoY comparisons
- Merges datasets and integrates complex business logic with DAX
- Creates interactive, visually appealing dashboards and reports
- Offers customization with custom visuals and Power Query transformations
- Administers Power BI, including user and Gateway management
- Manages Power BI apps, access controls, and report scheduling
- Implements row-level security to protect data integrity

Benefits of the Service

- Empowers informed decision-making through valuable data insights
- Streamlines data workflows, saving time and resources
- Provides timely information for strategic initiatives
- Adapts to growing data volumes and changing business needs
- Optimizes data processing and analysis workflows
- Tailors solutions to meet specific business requirements
- Maximizes ROI by improving operational efficiency
- Enables users to explore and understand data independently
